Itcertkr는 자격증 응시자에게Salesforce Order-Management-Administrator 시험 준비를 위한 현재 그리고 가장 최근의 자료들을 제공하는 이 산업 영역의 리더입니다. Itcertkr는Salesforce Order-Management-Administrator덤프를 시험문제변경에 따라 계속 갱신하여 고객님께서 받은 것이Salesforce Order-Management-Administrator 시험의 가장 최신 기출문제임을 보증해드립니다.

Salesforce Order-Management-Administrator 시험요강:

주제	소개
주제 1	Advanced Topics: This topic challenges the Salesforce Order Management Administrator Consultant to diagnose and resolve configuration issues that hinder the launch or operation of Order Management processes. Proficiency includes troubleshooting integration problems and articulating how various processes interact to support successful deployments and system functionality.

주제 2	Order Management Basics: In this topic, the Salesforce Order Management Administrator Consultant learns to position Order Management effectively within Salesforce's core architecture. By articulating the extensible platform capabilities, the ability to integrate with third-party systems, and the overall value proposition, this knowledge helps highlight Order Management's seamless adaptability and efficiency. These insights are crucial for demonstrating business value during client engagements.
주제 3	User Experience and Customization: This section emphasizes leveraging Salesforce's Lightning UI to enhance user experiences. The Salesforce Order Management Administrator Consultant will customize experiences for users and managers through tools like the Lightning Page Editor, Report Builder, and out-of-the-box components. Success in this area ensures optimized workflows and improved operational efficiency.

Salesforce인증 Order-Management-Administrator덤프는 수많은 덤프중의 한과목입니다. 다른 덤프들과 같이Salesforce인증 Order-Management-Administrator덤프 적응율과 패스율은 100% 보장해드립니다. Salesforce인증 Order-Management-Administrator시험에 도전하려는 분들은Itcertkr 의Salesforce인증 Order-Management-Administrator덤프로 시험을 준비할 것이죠?

최신 Salesforce Order Management Order-Management-Administrator 무료 샘플문제 (Q96-Q101):

질문 # 96

What is the required amount of test code coverage when deploying an Apex class?

- A. 0.85
- B. 0.75
- C. 0.65
- D. 0.55

정답: B

설명:

The required amount of test code coverage when deploying an Apex class is 75%. This means that at least 75% of the Apex code must be covered by unit tests, and all of those tests must complete successfully.

질문 # 97

The Ensure Funds process works on which set of Order Items?

- A. Only the items with a status of Waiting Payment
- B. All Items within a delivery group
- C. All Sales Order Items
- D. Only the items passed into the Ensure Funds method
- E. Only the items on the Fulfillment Order passed into the Ensure Funds method

정답: D

설명:

The Ensure Funds process works on only the items passed into the Ensure Funds method. This method is a flow core action that

verifies that there are enough funds available for each Order Item passed into it, and updates their payment status accordingly. The administrator can pass any Order Items into this method, regardless of their status or delivery group. Verified Reference: https://help.salesforce.com/s/articleView?id=sf.flow_ref_elements_om_actions_ensure_funds_async.htm&type=5

질문 # 98

Which two process exceptions are available out of the box in order management? (Choose 2)

- A. Inventory check exception
- B. Unable to capture payment
- C. Navigate invoice amount
- D. Find location fault

정답: B,D

질문 # 99

What are two reasons for using Flows instead of Apex code?

- A. Flows have better performance options for large batches of records
- B. Flows can be triggered by undelete events
- C. Flows can be modified and created without a developer
- D. Flows provide a visual debug process

정답: C,D

설명:

Two reasons for using Flows instead of Apex code are:

Flows can be modified and created without a developer. Flows are declarative tools that allow administrators to build complex business logic using clicks instead of code. Flows do not require any programming skills or knowledge, and they can be easily modified and maintained by administrators.

Flows provide a visual debug process. Flows have a built-in debugger that allows administrators to test and troubleshoot their flows in a graphical interface. The debugger shows the flow execution path, the values of variables and sObject fields, and any errors or warnings that occur in the flow.

질문 # 100

After deploying a new Lightning Web Component to an org, what should an administrator do to add the component to a Lightning Record Page?

- A. Navigate to the Page, Click on the "Custom Component Editor," Click "Publish" on the new component in the list and adjust the positioning
- B. Go to the page, edit it and drag the new component onto the page
- C. Go to Deploy LWC in Setup
- D. Create a Metadata API (MDAPI) conversion file with the Command Line interface (CLI) then go to the page and adjust the positioning

정답: B
