Fortinet FCP - FortiSIEM 7.2 Analyst Sample Questions (Q35-Q40):

NEW QUESTION # 35

When selecting multiple rules at once on FortiSIEM, what actions can you perform?

- A. You can only view, edit, and activate a single rule at one time.
- B. You can only activate or deactivate multiple rules.
- **C. You can change the severity of multiple rules, and activate or deactivate them.**
- D. You can only change the severity of multiple rules.

Answer: C

Explanation:

In FortiSIEM, when multiple rules are selected, you can change their severity levels and activate or deactivate them simultaneously. This bulk action capability simplifies rule management by allowing analysts to apply configuration updates or operational changes across multiple correlation rules efficiently.

NEW QUESTION # 36

Refer to the exhibit.

Source IP	Reporting Device	Reporting IP	Event Type	User	Count
15.2.3.4	FW01	10.1.1.1	Logon	Mike	4
21.3.4.5	FW01	10.1.1.1	Logon	Bob	3
14.12.3.1	FW01	10.1.1.1	Logon	Alice	2
192.168.1.5	FW01	10.1.1.1	Logon	Alice	2
10.1.1.1	FW01	10.1.1.1	Logon	Bob	6
123.123.1.1	FW01	10.1.1.1	Logon	Mike	5

If you group the events by User, Source IP, and Count attributes, how many results will FortiSIEM display?

- A. Three
- B. Five
- C. Two
- **D. Six**
- E. Four

Answer: D

Explanation:

Grouping by User, Source IP, and Count means that each unique combination of those three attributes will be treated as a separate result. In the table, all six rows have distinct combinations of User, Source IP, and Count - so FortiSIEM will display 6 results.

NEW QUESTION # 37

When FortiSIEM is configured to apply ZTNA tags, what is the order of events when an analyst wants to automatically block a ZTNA tagged host?

- A. FortiEMS receives tag information > FortiEMS tags host > FortiSIEM tags host > ZTNA tags enforced on FortiGate
- B. FortiEMS tags host > FortiEMS receives tag information > FortiSIEM tags host > ZTNA tags enforced on FortiGate
- C. FortiSIEM tags host > FortiEMS receives tag information > FortiEMS tags host > ZTNA tags enforced on FortiGate
- **D. FortiEMS tags host > FortiSIEM receives tag information > FortiSIEM tags host > ZTNA tags enforced on FortiGate**

Answer: D

Explanation:

The correct sequence for ZTNA tag enforcement is:

1. FortiEMS tags the host based on endpoint posture or detected condition.
2. FortiSIEM receives the tag information from FortiEMS.
3. FortiSIEM applies its own tag (for example, "blocked") to the host based on automation or incident rules.
4. FortiGate enforces the ZTNA tag policy, blocking or restricting access according to configured rules.

Thus, the event flow is FortiEMS tags host → FortiSIEM receives tag info → FortiSIEM tags host → FortiGate enforces tags.

NEW QUESTION # 38

In FortiSIEM, which database stores discovery information?

- A. Profile DB
- B. Event DB
- C. SVN DB
- **D. CMDB**

Answer: D

Explanation:

FortiSIEM stores discovery information - such as device attributes, IPs, roles, and relationships - in the Configuration Management Database (CMDB). The CMDB maintains an up-to-date inventory of all discovered assets, serving as the central repository for device and infrastructure configuration data.

NEW QUESTION # 39

Which two settings must you configure to allow FortiSIEM to apply tags to devices in FortiClient EMS? (Choose two.)

- A. Remediation script configured
- **B. FortiSIEM API credentials defined on FortiEMS**
- **C. FortiEMS API credentials defined on FortiSIEM**
- D. ZTNA tags defined on FortiSIEM

Answer: B,C

Explanation:

To allow FortiSIEM to apply tags to devices in FortiClient EMS, FortiEMS API credentials must be defined on FortiSIEM to enable communication with EMS, and FortiSIEM API credentials must be defined on FortiEMS to allow EMS to accept tagging instructions from FortiSIEM. This bidirectional API trust is essential for tag application.

NEW QUESTION # 40

.....

The FCP_FSM_AN-7.2 guide dump from our company is compiled by a lot of excellent experts and professors in the field. In order to help all customers pass the exam in a short time, these excellent experts and professors tried their best to design the study version, which is very convenient for a lot of people who are preparing for the FCP_FSM_AN-7.2 exam.
