

1z0-1093-25 Originale Fragen, 1z0-1093-25 Lerntipps

Laden Sie die neuesten ZertSoft 1z0-1093-25 PDF-Versionen von Prüfungsfragen kostenlos von Google Drive herunter:
https://drive.google.com/open?id=1H1tBW8Qy3G56RUVKi8XHnLdyLBE_s0Y0

Kein Wunder, dass die Schulungsunterlagen zur Oracle 1z0-1093-25 Prüfungs von ZertSoft von der Mehrheit der Kandidaten gelobt werden. Das zeigt, dass unsere Schulungsunterlagen doch zuverlässig sind und den Kandidaten tatsächlich Hilfe leisten können. Die Kandidaten sind in der Lage, die 1z0-1093-25 Prüfung unbesorgt zu bestehen. Im Vergleich zu anderen Websites ist ZertSoft immer noch der Best-Seller auf dem Markt. Unter den Kunden hat der ZertSoft einen guten Ruf und wird von vielen anerkannt. Wenn Sie an der Oracle 1z0-1093-25 Prüfung teilnehmen wollen, klicken Sie doch schnell ZertSoft. Ich glaube, Sie werden sicher was bekommen, was Sie wollen. Sonst würden Sie sicher bereuen. Wenn Sie ein professionelle IT-Experte werden wollen, dann fügen Sie es schnell in den Warenkorb hinzu.

Oracle 1z0-1093-25 Prüfungsplan:

Thema	Einzelheiten
Thema 1	MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.
Thema 2	NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.

Thema 3	• Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.
Thema 4	• Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.
Thema 5	• Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.

1z0-1093-25 Lerntipps, 1z0-1093-25 Fragen Beantworten

Um die Oracle 1z0-1093-25 Zertifizierungsprüfung zu bestehen, brauchen Sie eine ausreichende Vorbereitung und eine vollständige Wissensstruktur. Die von ZertSoft gebotenen Oracle 1z0-1093-25 Ressourcen würden Ihre Bedürfnisse sicher abdecken.

Oracle Cloud Database Services 2025 Professional 1z0-1093-25 Prüfungsfragen mit Lösungen (Q60-Q65):

60. Frage

Which characteristic is MOST indicative of an Oracle Cloud Infrastructure (OCI) Base Database Service (BaseDB) virtual machine (VM) deployment compared to using Autonomous Database?

- A. Automated patching and upgrades handled by Oracle.
- B. Shared Exadata infrastructure with other tenants for cost optimization.
- **C. Direct control over the operating system and database configuration.**
- D. Automatic scaling of compute and storage resources based on workload demands.

Antwort: C

Begründung:

Direct Control in BaseDB VM:

In a BaseDB VM deployment, users have root-level access to the operating system and can directly manage the database configuration. This contrasts with Autonomous Database, where Oracle handles most administrative tasks, including patching and resource scaling.

* BaseDB VM offers flexibility for custom configurations and control over OS-level operations.

* This is particularly useful for environments requiring custom scripts, configurations, or database tuning.

Why the other options are incorrect:

* A: Autonomous Database features automatic patching, not BaseDB VM.

* B: Exadata infrastructure is typically associated with Autonomous Database rather than VM-based BaseDB.

* D: Automatic scaling is a feature of Autonomous Database, not BaseDB.

61. Frage

When provisioning an Oracle Cloud Infrastructure (OCI) Base Database Service (BaseDB) on a virtual machine (VM), what is a primary factor that distinguishes it from using a Bare Metal database service?

- A. The ability to create multiple database homes on a single server.

- B. The database software binaries are always pre-installed.
- C. The ability to choose your own hypervisor for virtualization.
- **D. The underlying hardware is dedicated solely to your instance.**

Antwort: D

Begründung:

Primary Distinction:

The primary difference between BaseDB on a VM and Bare Metal is how the underlying hardware is allocated:

- * BaseDB on VM: The infrastructure is shared among multiple tenants, using virtualization to isolate instances.
- * Bare Metal Database Service: The server's physical hardware is dedicated exclusively to a single tenant, offering maximum performance and isolation.
- * This exclusive access to hardware in Bare Metal allows for better performance and control compared to VM-based instances.

Why the other options are incorrect:

- * A: Binaries are not always pre-installed in both cases; it depends on the configuration.
- * B: Oracle handles hypervisor configuration, not the user.
- * D: Both VM and Bare Metal allow multiple database homes if configured properly.

62. Frage

Which two functionalities are provided by the SQL Performance Analyzer (SPA) within Database Management, aiding in cloud database tuning?

- **A. Compare the performance of SQL statements before and after a database change (e.g., upgrade, parameter change).**
- B. Automatically rewrite SQL queries to improve their performance.
- C. Analyze the execution plan of a SQL statement and suggest alternative indexing strategies.
- **D. Generate a report highlighting the performance impact of a specific database change on a set of SQL statements.**

Antwort: A,D

Begründung:

B: Compare SQL performance before and after changes:

- * SPA evaluates the effect of configuration changes, upgrades, or patches on SQL performance.
- * Provides insights into whether a change improves or degrades query performance.

C: Generate performance impact reports:

- * SPA generates reports summarizing the effects of specific changes on SQL workload performance.
- * Helps DBAs make informed decisions before implementing changes in production.

Why the other options are incorrect:

- * A. Automatically rewriting SQL: SPA does not modify queries; it only analyzes and compares performance.
- * D. Suggesting indexing strategies: SPA evaluates performance impacts, but indexing recommendations are made by the SQL Tuning Advisor.

63. Frage

You need to implement a backup and recovery strategy for your MySQL HeatWave Database System. What is the recommended method for backing up and restoring your HeatWave cluster?

- A. Relying solely on MySQL replication to another MySQL instance.
- B. Using the MySQL Enterprise Backup tool directly on the HeatWave nodes.
- **C. Utilizing OCI Database backups, which include both the MySQL Database System and the HeatWave cluster.**
- D. Using the OCI Object Storage service for storing manual database dumps.
- E. Manually copying the data files from the HeatWave cluster's storage.

Antwort: C

Begründung:

C: Utilizing OCI Database backups:

- * Integrated with Oracle Cloud Infrastructure (OCI), providing consistent and complete backups.
- * Supports both the MySQL Database System and the HeatWave cluster, ensuring data integrity.
- * Automates backup scheduling and retention policies.
- * Facilitates easy restoration in case of data loss or corruption.

Why the other options are incorrect:

- * A. Manual copying: Prone to errors and lacks consistency.
- * B. Manual dumps to Object Storage: Labor-intensive and not automated.
- * D. MySQL replication: Suitable for high availability, but not a substitute for regular backups.
- * E. MySQL Enterprise Backup on nodes: Complex and not designed for HeatWave's distributed environment.

64. Frage

Which two requirements must be met before you can create an Exadata Database Service VM Cluster?

- A. A configured Oracle Cloud Infrastructure (OCI) Vault and Key.
- **B. A Virtual Cloud Network (VCN) with necessary subnets for client access and backups.**
- C. A valid support identifier (SI) associated with the OCI account.
- **D. An Exadata Infrastructure resource must be created first.**
- E. A configured Exadata Cloud@Customer infrastructure.

Antwort: B,D

Begründung:

* B. VCN and Subnets: Exadata Database Service VM Clusters require a VCN to provide network connectivity for database instances, client access, and backups. Proper subnets are essential for this network setup.

* E. Exadata Infrastructure Resource: Before creating a VM Cluster, an Exadata Infrastructure resource must be provisioned. The VM Cluster resides within this infrastructure.

Why the other options are incorrect:

- * A: OCI Vault and Key are used for encryption but not mandatory for VM Cluster creation.
- * C: A valid SI is needed for support but not a technical requirement for VM cluster creation.
- * D: Exadata Cloud@Customer is a separate service from Exadata Database Service.

65. Frage

.....

Wenn Sie die neuesten und genauesten Prüfungsfragen zur Oracle 1z0-1093-25 Zertifizierungsprüfung von ZertSoft wählen, ist der Erfolg nicht weit entfernt.

1z0-1093-25 Lerntipps: <https://www.zertsoft.com/1z0-1093-25-pruefungsfragen.html>
