Overall, the Google Cloud Certified - Professional Google Workspace Administrator exam is an excellent way for IT professionals to demonstrate their expertise in managing and administering Google Workspace applications.

Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q64-Q69):

NEW QUESTION # 64

Your organization went Google six months ago. Last week, a new feature appeared in users' Gmail, and your CTO was surprised because he did not know the change was happening. The CTO wants to be updated proactively about new features. What is the best source of real-time information to keep the CTO informed?

- A. Google Workspace quarterly roadmap
- **B. Google Workspace Update blog**
- C. Quarterly business reviews
- D. Cloud Connect Community forums

Answer: B

Explanation:

A is not correct because not all launch announcements are made in CCC forums.

B is not correct because roadmap calls provide customers with warnings about future features, but no solid dates are provided during the call.

C is not correct because QBRs are not typically used for these use cases.

D is correct because this is the source of truth for all new launches.

NEW QUESTION # 65

You are in the middle of migrating email from on-premises Microsoft Exchange to Google Workspace. Users that you have already migrated are complaining of messages from internal users going into spam folders. What should you do to ensure that internal messages do not go into Gmail spam while blocking spoofing attempts?

- A. Force TLS for your domain.
- B. Add all users of your domain to an approved sender list.
- C. Train users to click on Not Spam button for emails.
- **D. Ensure that your inbound gateway is configured with all of your Exchange server IP addresses.**

Answer: D

Explanation:

<https://support.google.com/a/answer/9228551#legacy-as-primary>

After migrating from exchange, you configure a forwarding of migrated mailboxes to Workspace, and you need to configure inbound mail gateway to allow the high volume traffic coming from the exchange.

NEW QUESTION # 66

You are the administrator for a 30,000-user organization. You have multiple Workspace licensing options available to end users in your domain, according to their work responsibilities. A user may be transitioned to a different license type multiple times in a given year. Your organization has a high turnover rate for employees. What is the most efficient way to manage your organization's licensing?

- A. Update user licensing in the user portion of the Admin console on an as-needed basis.

- B. Use Google Cloud Directory Sync to modify user licensing with each sync, according to information available in the organization's LDAP
- C. Use the Directory API to create a custom batch script that modifies the user's license on a daily basis
- D. Create a license assignment rule in the Google Admin console to set user licensing based on directory attributes.

Answer: D

Explanation:

To efficiently manage licensing in an organization with a high turnover rate and multiple license types, the best approach is to create a license assignment rule in the Google Admin console based on directory attributes. This method automates the process of assigning licenses according to the user's role and other directory attributes, ensuring that each user gets the appropriate license type without manual intervention. This approach is scalable and minimizes the administrative overhead associated with frequent changes in user roles and turnover.

NEW QUESTION # 67

Your organization has confidential internal content for which only authorized employees are allowed to access. Access to this content is managed by using Google Groups. Only administrators can create and manage membership. You need to provide only the necessary functionality and follow the principle of least privilege. What should you do?

- A. Make a moderated group so all incoming communications can be monitored
- B. Use a group as a collaborative inbox that allows easier sharing
- C. Make a security group to apply access policies
- D. Make a dynamic group so security team members are automatically added

Answer: C

Explanation:

Navigate to Groups: Go to the Google Admin console and navigate to 'Groups'.

Create a Security Group: Create a new group and set it as a security group.

Assign Permissions: Set the appropriate permissions and policies that restrict access to only authorized employees.

Manage Membership: Ensure that only administrators can manage the group membership, adhering to the principle of least privilege.

Apply Policies: Apply access policies to the security group, ensuring that the confidential content is accessible only to authorized members.

NEW QUESTION # 68

Your organization allows employees to use their personal mobile devices to check their work emails. You need to remove the employee's work email data from their phone when they leave the organization. What should you do?

- A. Set up data protection rules to prevent data sharing externally.
- B. Set up basic mobile management on the devices.
- C. Set up advanced mobile management on the devices.
- D. Set up 2SV authentication on the devices.

Answer: C

Explanation:

With advanced mobile management, you can remotely manage and wipe work-related data from personal devices when an employee leaves the organization. This includes the ability to enforce policies such as requiring a password to access the device, remotely wiping corporate data, and managing access to work resources without affecting the personal data on the device. This solution provides the necessary tools to ensure data security and compliance.
