# Three Top Cisco 350-701 Dumps Formats

BTW, DOWNLOAD part of TrainingQuiz 350-701 dumps from Cloud Storage: https://drive.google.com/open?id=1ax_2szV4pjKBRcnxL6NXaRLKRqg1TPtw

TrainingQuiz certification training exam for 350-701 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development. TrainingQuiz 350-701 certification training exam material including the examination question and the answer, complete by our senior lecturers and the 350-701 product experts, included the current newest 350-701 examination questions.

For candidates who are going to buy 350-701 test materials online, they may pay more attention to the money safety. We applied international recognition third party for the payment, all our online payment are accomplished by the third safe payment gateway. If you choose us, there is no necessary for you to worry about this, since the third party will protect interests of you. In addition, 350-701 Exam Braindumps are high quality, and you can use them at ease. You can try free demo before buying 350-701 exam dumps, so that you can know the mode of the complete version.

## Top 350-701 Study Test | Efficient Cisco 350-701: Implementing and Operating Cisco Security Core Technologies 100% Pass

Cisco 350-701 exam dumps are important because they show you where you stand. After learning everything related to the Implementing and Operating Cisco Security Core Technologies (350-701) certification, it is the right time to take a self-test and check whether you can clear the 350-701 certification exam or not. People who score well on the 350-701 Practice Questions are ready to give the final Implementing and Operating Cisco Security Core Technologies (350-701) exam. On the other hand, those who do not score well can again try reading all the 350-701 dumps questions and then give the 350-701 exam.

## Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q613-Q618):

**NEW QUESTION # 613**
An engineer is adding a Cisco DUO solution to the current TACACS+ deployment using Cisco ISE. The engineer wants to

authenticate users using their account when they log into network devices. Which action accomplishes this task?

- A. Modify the current policy with the condition MFASourceSequence DUO=true in the authorization conditions within Cisco ISE
- B. Create an identity policy within Cisco ISE to send all authentication requests to Cisco DUO.
- C. Install and configure the Cisco DUO Authentication Proxy and configure the identity source sequence within Cisco ISE
- D. Configure Cisco DUO with the external Active Directory connector and tie it to the policy set within Cisco ISE.

**Answer: C**

Explanation:
accomplish the task is to install and configure the Cisco DUO Authentication Proxy and configure the identity source sequence within Cisco ISE. This will allow the engineer to integrate Cisco ISE with Cisco DUO for TACACS+ device administration using Active Directory as the primary authentication source and Cisco DUO as the secondary authentication source for multi-factor authentication (MFA). The steps to configure this solution are as follows12:
* Install and configure the Cisco DUO Authentication Proxy on a Windows or Linux machine. The proxy will act as a RADIUS server that communicates with Cisco ISE and a RADIUS client that communicates with Cisco DUO cloud. The proxy will also connect to Active Directory for the primary authentication of the users.
* Configure the proxy by editing the authproxy.cfg file. The file should include the following sections:
* [ad_client]: This section defines the connection parameters to Active Directory, such as the host, service_account_username, service_account_password, and search_dn.
* [radius_server_auto]: This section defines the RADIUS server parameters for the proxy, such as the ikey, skey, api_host, radius_ip_1, radius_secret_1, and client parameters. The ikey, skey, and api_host are obtained from the Cisco DUO web portal when creating a RADIUS application. The radius_ip_1 and radius_secret_1 are the IP address and shared secret of the Cisco ISE node that will send authentication requests to the proxy. The client parameter specifies the authentication method for Cisco DUO, such as auto, push, phone, or passcode.
* [main]: This section defines the global settings for the proxy, such as the debug, log_max_size, and log_max_files parameters.
* Restart the proxy service after saving the authproxy.cfg file.
* Configure Cisco ISE as a TACACS+ server and add the proxy as an external RADIUS server. The steps are as follows:
* Navigate to Administration > System > Deployment and enable the Device Administration Service on the appropriate node.
* Navigate to Work Centers > Device Administration > Network Resources and add the network devices that will use TACACS+ for device administration. Specify the device name, IP address, device type, and shared secret.
* Navigate to Work Centers > Device Administration > Network Access and add the proxy as an external RADIUS server. Specify the server name, IP address, port, shared secret, and timeout.
Optionally, enable the Continue for additional authorization policy option to allow Cisco ISE to perform authorization based on the user's Active Directory attributes after successful authentication by Cisco DUO.
* Navigate to Work Centers > Device Administration > Policy Elements > Results > TACACS Profiles and create a TACACS profile for device administration. Specify the profile name, type, and custom attributes, such as the shell:roles and shell:priv-lvl attributes.
* Navigate to Work Centers > Device Administration > Policy Sets and create a policy set for device administration. Specify the policy set name, conditions, and results. The conditions can be based on the device type, the protocol, or the identity source sequence. The results can be the TACACS profile and the external RADIUS server (the proxy).
* Configure the network devices to use TACACS+ for device administration and specify Cisco ISE as the TACACS+ server and the proxy as the RADIUS server. The configuration commands may vary depending on the device type and model, but the general syntax is as follows:
* aaa new-model
* aaa authentication login default group tacacs+ local
* aaa authorization exec default group tacacs+ local
* aaa accounting exec default start-stop group tacacs+
* tacacs server ISE
* address ipv4 <ISE IP address>
* key <ISE shared secret>
* radius server DUO
* address ipv4 <proxy IP address> auth-port <proxy port>
* key <proxy shared secret>
* Test the solution by logging into the network devices using Active Directory credentials. The user should receive a Cisco DUO prompt for the second factor authentication, such as a push notification, a phone call, or a passcode. After approving the second factor authentication, the user should be granted access to the device with the appropriate privileges based on the TACACS profile and the Active Directory attributes.

## NEW QUESTION # 614
What is a feature of Cisco NetFlow Secure Event Logging for Cisco ASAs?

- A. Advanced NetFlow v9 templates and legacy v5 formatting are supported
- B. Secure NetFlow connections are optimized for Cisco Prime Infrastructure
- C. Multiple NetFlow collectors are supported
- D. Flow-create events are delayed

**Answer: D**

Explanation:
The ASA and ASASM implementations of NetFlow Secure Event Logging (NSEL) provide the following major functions: ... -
Delays the export of flow-create events. Reference:
https://www.cisco.com/c/en/us/td/docs/security/asa/asa92/configuration/general/asa-general-cli/ monitor-nsel.pdf
...
- Delays the export of flow-create events.

## NEW QUESTION # 615
An administrator enables Cisco Threat Intelligence Director on a Cisco FMC. Which process uses STIX and allows uploads and downloads of block lists?

- A. consumption
- B. editing
- C. authoring
- D. sharing

**Answer: D**

Explanation:
The process that uses STIX and allows uploads and downloads of block lists is sharing. STIX (Structured Threat Information Expression) is a standard language and format for exchanging cyber threat intelligence data. Block lists are collections of observables, such as IP addresses, URLs, or domains, that are associated with malicious activity and can be used to block or monitor network traffic. Cisco Threat Intelligence Director (TID) is a feature that operationalizes threat intelligence data by consuming, normalizing, publishing, and correlating data from various sources, including third-party STIX feeds. TID enables the administrator to upload STIX files from local or remote sources, or download STIX files from the Firepower Management Center (FMC) to share with other systems. TID also allows the administrator to configure actions (such as block or monitor) based on the indicators and observables in the STIX files, and generate incidents and observations when the system detects traffic that matches the threat intelligence data123 References ≔ 1: Firepower Management Center Configuration Guide, Version 6.2.3 - Threat Intelligence Director 2 2: Introduction to STIX - GitHub Pages 4 3: Third-Party Integration of Security Feeds with FMC (Cisco Threat Intelligence Director) - Cisco Community 3

## NEW QUESTION # 616
Drag and drop the exploits from the left onto the type of security vulnerability on the right.

**Answer:**

Explanation:

## NEW QUESTION # 617
Drag and drop the common security threats from the left onto the definitions on the right.

**Answer:**

Explanation:

☐

**NEW QUESTION # 618**

......

If you feel that you always suffer from procrastination and cannot make full use of your spare time, maybe our 350-701 study materials can help you solve your problem. We are willing to recommend you to try the 350-701 practice guide from our company. Our 350-701 learning questions are in high quality and efficiency test tools for all people. You can just try our three different versions of our 350-701 trainning quiz, you will find that you can study at anytime and anyplace.

**350-701 New Soft Simulations**: https://www.trainingquiz.com/350-701-practice-quiz.html

All these three Cisco 350-701 exam questions formats are easy to use and compatible with all devices, operating systems, and browsers, The answer lies in our valid and excellent 350-701 training guide, Compared with those practice materials which are to no avail and full of hot air, our 350-701 guide tests outshine them in every aspect, Cisco 350-701 Study Test However, if you do not get through the exam, you can take back your money in full following a simple procedure.

This definition comes from the article Amtrak all 350-701 New Soft Simulations aboard pet humanization trend, which proves I m not the only one who employs bad puns, A View of aClient, All these three Cisco 350-701 Exam Questions formats are easy to use and compatible with all devices, operating systems, and browsers.

## Use Real Cisco 350-701 Exam Questions And Achieve Brilliant Results

The answer lies in our valid and excellent 350-701 training guide, Compared with those practice materials which are to no avail and full of hot air, our 350-701 guide tests outshine them in every aspect.

However, if you do not get through the exam, you can take back 350-701 your money in full following a simple procedure, You can totally rely on our products for your future learning path.
