

Professional Latest JN0-336 Exam Pattern - 100% Pass JN0-336 Exam

4 Tips to Achieve Best Results in JN0-363 JNCIS-SP Exam

Our company has successfully created ourselves famous brands in the past years, and all of the JN0-336 valid study guide materials from our company have been authenticated by the international authoritative institutes and cater for the demands of all customers at the same time. We are attested that the quality of the JN0-336 Test Prep from our company have won great faith and favor of customers. We persist in keeping creating the best helpful and most suitable JN0-336 study practice question for all customers.

In order to better meet users' needs, our JN0-336 study materials have set up a complete set of service system, so that users can enjoy our professional one-stop service. We not only in the pre-sale for users provide free demo, when buy the user can choose in we provide in the three versions, at the same time, our JN0-336 Study Materials also provides 24-hour after-sales service, even if you are failing the exam, don't pass the exam, the user may also demand a full refund with purchase vouchers, make the best use of the test data, not for the user to increase the economic burden.

JN0-336 Free Practice | Latest JN0-336 Exam Online

There are more opportunities for possessing with a certification, and our JN0-336 study materials are the greatest resource to get a leg up on your competition, and stage yourself for promotion. When it comes to our time-tested JN0-336 study materials, for one thing, we have a professional team contains a lot of experts who have devoted themselves to the research and development of our JN0-336 Study Materials, thus we feel confident enough under the intensely competitive market. For another thing, conforming to the real exam our JN0-336 study materials have the ability to catch the core knowledge.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q55-Q60):

NEW QUESTION # 55

Which two statements are true about Juniper ATP Cloud? (Choose two.)

- A. Dynamic analysis is always performed to determine if a file contains malware.
- B. Dynamic analysis is not always necessary to determine if a file contains malware.
- C. If the cache lookup determines that a file contains malware, static analysis is not performed to verify the results.
- D. If the cache lookup determines that a file contains malware, performed to verify the results.

Answer: B,C

Explanation:

Dynamic analysis is not always necessary to determine if a file contains malware, as the ATP Cloud uses a cache lookup to quickly identify known malicious files. If the cache lookup determines that a file contains malware, static analysis is not performed to verify the results. This information can be found on the Juniper website here: https://www.juniper.net/documentation/en_US/release-independent/security/jnpr-security-srx-series/inform

NEW QUESTION # 56

Click the Exhibit button.

```
[edit services]
user@srx# show
security-intelligence {
    profile ATP_Infected-Hosts {
        category Infected-Hosts;
        rule Rule-1 {
            match {
                threat-level 8;
            }
            then {
                action {
                    block {
                        drop;
                    }
                }
            }
        }
    }
}
```

Referring to the exhibit, what will the SRX Series device do in this configuration?

- A. Packets from the infected hosts with a threat level of 8 or above will be dropped and a log message will be generated.
- B. Packets from the infected hosts with a threat level of 8 will be dropped and a log message will be generated.
- C. Packets from the infected hosts with a threat level of 8 or above will be dropped and no log message will be generated.
- D. Packets from the infected hosts with a threat level of 8 will be dropped and no log message will be generated.

Answer: C

Explanation:

The exhibit shows a configuration snippet for security intelligence on an SRX Series device. Security intelligence is a feature that allows you to block or monitor traffic from malicious sources based on threat intelligence feeds from Juniper ATP Cloud or other providers. The configuration defines a profile for ATP Infected-Hosts, which is a feed that contains IP addresses of hosts that are infected with malware and communicate with command-and-control servers. The configuration also defines a rule for threat level 8, which is a parameter that indicates the severity of the threat.

Based on this configuration, the SRX Series device will do the following:

Packets from the infected hosts with a threat level of 8 or above will be dropped: The action block-and- drop under the rule means that the device will block any traffic from the infected hosts that have a threat level equal to or higher than 8. This will prevent the hosts from sending or receiving malicious commands or data.

No log message will be generated: The absence of any log option under the rule means that the device will not generate any log message for the blocked traffic. This may reduce the load on the device and the logging server, but it may also limit the visibility and analysis of the security events. NEW QUESTION # 57

You need to deploy an SRX Series device in your virtual environment. In this scenario, what are two benefits of using a CSRX? (Choose two.)

- A. The cSRX has low memory requirements.
- B. The cSRX supports Layer 2 and Layer 3 deployments.
- C. The cSRX supports firewall, NAT, IPS, and UTM services.
- D. The cSRX default configuration contains three default zones: trust, untrust, and management.

Answer: A,C

Explanation:

Two benefits of using a cSRX in your virtual environment are:

The cSRX supports firewall, NAT, IPS, and UTM services: The cSRX is a containerized version of the SRX Series firewall that runs as a Docker container on Linux hosts. It provides the same features and functionality as the SRX Series physical firewalls, such as firewall, NAT, IPS, and UTM services. The cSRX can protect your virtual workloads and applications from various threats and attacks.

The cSRX has low memory requirements: The cSRX is designed to be lightweight and efficient, with low memory and CPU requirements. The cSRX can run on as little as 1 GB of RAM and 1 vCPU, making it suitable for resource-constrained environments. Reference: = cSRX Overview, cSRX Container Firewall Datasheet

NEW QUESTION # 58

Which two statements are correct when considering IPS rule base evaluation? (Choose two.)

- A. IPS evaluates rules sequentially
- B. IPS applies the most severe action to traffic matching multiple rules,
- C. IPS applies the least severe action to traffic matching multiple rules.
- D. IPS evaluates rules concurrently.

Answer: A,B

NEW QUESTION # 59

Which two sources are used by Juniper Identity Management Service (JIMS) for collecting username and device IP addresses? (Choose two.)

- A. Microsoft Exchange Server event logs
- B. Active Directory domain controller event logs
- C. DNS
- D. OpenLDAP service ports

Answer: B,C

Explanation:

Juniper Identity Management Service (JIMS) collects username and device IP addresses from both DNS and Active Directory domain controller event logs. DNS is used to resolve hostnames to IP addresses, while Active Directory domain controller event logs are used to get information about user accounts, such as when they last logged in.

NEW QUESTION # 60

.....

As the famous saying goes, time is life. Time is so important to everyone because we have to use our limited time to do many things. Especially for candidates to take the JN0-336 exam, time is very precious. They must grasp every minute and every second to prepare for it. From the point of view of all the candidates, our JN0-336 training quiz give full consideration to this problem. And we can claim that if you study our JN0-336 study materials for 20 to 30 hours, you can pass the exam for sure.

JN0-336 Free Practice: <https://www.pass4suresvce.com/JN0-336-pass4sure-vce-dumps.html>

Since there is such a high rate of return, why hesitate to buy the JN0-336 exam questions, Juniper Latest JN0-336 Exam Pattern It will add more colors to your life, Juniper Latest JN0-336 Exam Pattern It passed the test of practice, and with the best quality, Pass your tests with the always up-to-date JN0-336 APP dumps, And with high pass rate as 98% to 100%, you will be bound to pass the exam as long as you choose our JN0-336 Dumps preparation questions.
