

Fortinet NSE6_SDW_AD-7.6 Frenquent Update - NSE6_SDW_AD-7.6 Valid Exam Voucher

DOWNLOAD the newest ActualVCE NSE6_SDW_AD-7.6 PDF dumps from Cloud Storage for free:
https://drive.google.com/open?id=1OawUO3_oNj6yYTUm0NoGbAt11K7ItymI

If you still have questions with passing the exam, choose us, and we will help you pass the exam successfully. Our NSE6_SDW_AD-7.6 training materials contain the both the questions and answers. You can have a practice through different versions. If you prefer to practice on paper, then NSE6_SDW_AD-7.6 Pdf Version will satisfy you. If you want to have a good command of the NSE6_SDW_AD-7.6 exam dumps, you can buy all three versions, which can assist you for practice.

If you still have no confidence for passing test, here we will recommend you an excellent reference material. Our valid NSE6_SDW_AD-7.6 exam collection pdf will help you pass exam and go to success, you will approach to IT field top. You can just spend short time in preparing for real test with our latest NSE6_SDW_AD-7.6 Exam Collection Pdf. You can download free demo in our website for your reference to verify the reliability of our dumps before purchasing.

Fortinet NSE6_SDW_AD-7.6 Valid Exam Voucher | NSE6_SDW_AD-7.6 Latest Exam Papers

For some candidates who are caring about the protection of the privacy, our NSE6_SDW_AD-7.6 exam materials will be your best choice. We respect the personal information of our customers. If you buy NSE6_SDW_AD-7.6 exam materials from us, we can ensure you that your personal information, such as the name and email address will be protected well. Once the order finishes, your personal information will be concealed. In addition, we are pass guarantee and money back guarantee. If you fail to pass the exam after buying NSE6_SDW_AD-7.6 Exam Dumps from us, we will refund your money.

Fortinet NSE 6 - SD-WAN 7.6 Enterprise Administrator Sample Questions (Q87-Q92):

NEW QUESTION # 87
Refer to the exhibit.

SD-WAN configuration on FortiGate

```
branch1_fgt # get router info routing-table all
...
S* 0.0.0.0/0 [1/0] via 192.2.0.2, port1, [1/0]
   [1/0] via 192.2.0.10, port2, [10/0]
C 10.0.1.0/24 is directly connected, port5
B 10.1.0.0/24 [200/0] via 192.168.1.61 (recursive is directly connected, HUB1-VPN1), 1d03h58m, [1/0]
   [200/0] via 192.168.1.125 (recursive is directly connected, HUB1-VPN2), 1d03h58m, [1/0]
   [200/0] via 192.168.1.189 (recursive is directly connected, HUB1-VPN3), 1d03h58m, [1/0]
C 10.200.99.1/32 is directly connected, Branch-Lo
B 10.2.0.0/16 [200/0] via 192.168.1.61 (recursive is directly connected, HUB1-VPN1), 00:00:51, [1/0]
   [200/0] via 192.168.1.125 (recursive is directly connected, HUB1-VPN2), 00:00:51, [1/0]
   [200/0] via 192.168.1.189 (recursive is directly connected, HUB1-VPN3), 00:00:51, [1/0]
B 10.2.5.0/24 [200/0] via 192.168.1.61 (recursive is directly connected, HUB1-VPN3), 00:00:01, [1/0]
...

branch1_fgt # diag sys sdwan service4

Service(3): Address Mode(IPV4) flags=0x4200 use-shortcut-sla use-shortcut
Tie break: fib
Shortcut priority: 2
Gen(3), TOS(0x0/0x0), Protocol(0): src(1->65535):dst(1->65535), Mode(sla), sla-compare-order

Which SD-WAN rule and interface uses FortiGate to steer the traffic from the LAN subnet 10.0.1.0/24 to the corporate server 10.2.5.254?

- A. SD-WAN service rule 4 and interface port2.
- B. SD-WAN service rule 3 and interface HUB1-VPN3.
- C. SD-WAN service rule 4 and port1 or port2.
- D. SD-WAN service rule 3 and interface HUB1-VPN2.

Answer: A

Explanation:

Traffic steering in Fortinet SD-WAN is based on defined rules and the corresponding outgoing interfaces. The exhibit (not shown here) would indicate that the traffic from the LAN subnet 10.0.1.0/24 to the server 10.2.5.254 is matched by SD-WAN rule 3 and sent out via the HUB1-VPN3 interface.

FortiOS 7.4 SD-WAN Concept Guide - Rule Matching

NEW QUESTION # 88

Refer to the exhibits, which show the configuration of an SD-WAN rule and the corresponding rule status and routing table.

SD-WAN rule

```
branch_fgt (3) # show
config service
  edit 3
    set name "Corp"
    set mode sla
    set dst "LAN-net"
    set src "LAN-net"
    config sla
      edit "HUB1_EC"
        set id 1
      next
      edit "HUB1_HTTP"
        set id 1
      next
    end
    set priority-members 4 5 6
  next
end
```

SD-WAN rule status and routing table

```
branch1_fgt # diagnose sys sdwan service4 3

Service (3): Address Mode(IPV4) flags=0x4200 use-shortcut-sla use-shortcut
Tie break: cfg
Shortcut priority: 2
  Gen(3), TOS(0x0/0x0), Protocol (0): src(1->65535):dst (1->65535),
Mode(sla), sla-compare-order
Members (3):
  1: Seq_num(6 HUB1-VPN3 HUB1), alive, sla(0x3), gid(0), cfg order(2),
local cost (0), selected
  2: Seq num(5 HUB1-VPN2 HUB1), alive, sla(0x2), gid(0), cfg order
(1), local cost (0), selected
  3: Seq num(4 HUB1-VPN1 HUB1), alive, sla(0x0), gid(0), cfg order
(0), local cost (0), selected
Src address(1):
  10.0.1.0-10.0.1.255
Dst address (1):
  10.1.0.0-10.1.255.255

branch1_fgt # get router info routing-table all | grep HUB1
B 10.1.0.0/24 [200/0] via 192.168.1.61 (recursive is directly connected,
HUB1-VPN1), 00:20:06, [1/0]
  [200/0] via 192.168.1.125 (recursive is directly connected,
HUB1-VPN2), 00:20:06, [1/0]
B 10.2.0.0/24 [200/0] via 192.168.1.189 (recursive is directly connected,
HUB1-VPN3), 00:20:06, [1/0]
C 192.168.1.0/26 is directly connected, HUB1-VPN1
C 192.168.1.1/32 is directly connected, HUB1-VPN1

C 192.168.1.65/32 is directly connected, HUB1-VPN2
C 192.168.1.128/26 is directly connected, HUB1-VPN3
C 192.168.1.129/32 is directly connected, HUB1-VPN3
```

The administrator wants to understand the expected behavior for traffic matching the SD-WAN rule.

Based on the exhibits, what can the administrator expect for traffic matching the SD-WAN rule?

- A. The traffic will be routed over HUB1-VPN1.
- B. The traffic will be routed over HUB1-VPN3.
- C. The traffic will be load balanced across all three overlays
- **D. The traffic will be routed over HUB1-VPN2**

Answer: D

Explanation:

The rule is in SLA mode with two SLAs. From the status, HUB1-VPN2 and HUB1-VPN3 meet the SLA (sla (0x2) and sla(0x3)), while HUB1-VPN1 does not (sla(0x0)). Among members that meet SLA, FortiGate uses the configured order (priority-members 4 5 6) to pick the first eligible one-HUB1-VPN2-so traffic is routed over HUB1-VPN2.

NEW QUESTION # 89

You manage an SD-WAN topology. You will soon deploy 50 new branches.

Which three tasks can you do in advance to simplify this deployment? (Choose three.)

- **A. Create a ZTP template.**
- **B. Create policy blueprint.**
- C. Update the DHCP server configuration.
- **D. Create model devices.**
- E. Define metadata variables value for each device.

Answer: A,B,D

Explanation:

When planning to deploy a large number of branches (e.g., 50), Fortinet recommends several preparatory steps to simplify and automate the rollout. Creating model devices allows you to predefine configurations and settings that can be cloned or adapted for each branch, saving time and minimizing manual errors. Preparing a Zero Touch Provisioning (ZTP) template enables automatic onboarding and provisioning of new FortiGates as soon as they come online, reducing manual intervention. Lastly, creating a policy blueprint allows for standardized policy deployment across all branches, ensuring consistent security and SD-WAN rule enforcement. This holistic approach streamlines the deployment process, allows for rapid scaling, and ensures that all devices are configured according to corporate policy from day one.

NEW QUESTION # 90

(You are configuring SD-WAN to load balance network traffic and you want to take into account the link quality. Which two facts should you consider? Choose two answers.)

- A. The best quality strategy supports only the round-robin hash mode.
- B. When applicable, FortiGate load balances the traffic through all members that meet the SLA target.
- C. You can select the lowest cost service level agreement (SLA) strategy and allow SD-WAN load balancing.
- D. You can select the best quality strategy and allow SD-WAN load balancing.

Answer: B,C

Explanation:

When SD-WAN load balancing is required with link quality awareness, FortiOS relies on SLA-based strategies. These strategies evaluate link performance using performance SLAs (latency, jitter, packet loss, MOS) and then make forwarding decisions accordingly.

Option A is correct.

In FortiOS 7.6, when an SLA-based SD-WAN rule has load balancing enabled, FortiGate distributes traffic only across the members that meet the SLA targets. Any member that is out of SLA is excluded from load balancing. This behavior ensures that traffic is not forwarded over degraded links while still allowing load distribution across healthy paths.

Option C is correct.

The lowest cost (SLA) strategy is an SLA-based strategy that considers link quality while also allowing SD-WAN load balancing. When multiple members meet the SLA requirements and have equal cost, FortiGate can load balance traffic across them using the configured hash mode. This makes the lowest cost SLA strategy suitable when both link quality and load balancing are required.

Why the other options are incorrect:

* Option B is incorrect because the best quality strategy is designed to select the single best-performing link based on SLA metrics. It does not support SD-WAN load balancing across multiple links.

* Option D is incorrect because the best quality strategy does not support load balancing at all, so the statement about round-robin hash mode is invalid.

Therefore, the two correct facts to consider are A and C.

NEW QUESTION # 91

You are tasked with configuring ADVPN 2.0 on an SD-WAN topology already configured for ADVPN. What should you do to implement ADVPN 2.0 in this scenario?

- A. Delete the existing ADVPN configuration and configure ADVPN 2.0.
- B. Update the IPsec tunnel configuration on the branches.
- C. Update the SD-WAN configuration on the branches.
- D. Update the IPsec tunnel configurations on the hub.

Answer: C

Explanation:

"To adjust the configuration for ADVPN 2.0: - Edit the SD-WAN template... - IPsec templates: No changes required..."

Therefore, the configuration changes occur with the SD-WAN configuration and not the IPsec configuration.

NEW QUESTION # 92

.....

Our NSE6_SDW_AD-7.6 learning guide allows you to study anytime, anywhere. If you are concerned that your study time cannot be guaranteed, then our NSE6_SDW_AD-7.6 learning guide is your best choice because it allows you to learn from time to time and make full use of all the time available for learning. Our NSE6_SDW_AD-7.6 learning guide is for the world and users are very extensive. In order to give users a better experience, we have been constantly improving. The high quality and efficiency of NSE6_SDW_AD-7.6 Test Guide has been recognized by users. The high passing rate of NSE6_SDW_AD-7.6 exam training is its biggest feature. As long as you use NSE6_SDW_AD-7.6 test guide, you can certainly harvest what you want thing.
