

Enhance Your Success Rate with ExamBoosts's NETA NETA_2 Practice Test

NETA Practice Test Questions With Correct Answers

Anterior - Answer The front of the body.

Which represents an outcome oriented goal? - Answer I will reduce my body weight by 15 pounds over the next 3 months.

Visual - Answer Client learns best by observing your demonstrations.

Pectoralis Major - Answer Prime mover in horizontal adduction of the arm (humerus) is the:

High resistance to fatigue - Answer A characteristic of type I (slow oxidative) muscle fiber?

Ice - Answer Based on P.R.I.C.E acronym

Calcium, Potassium & Magnesium - Answer Major minerals

Self-confidence - Answer Self-efficacy

Extrinsic motivation - Answer Driven by outside forces

Intrinsic motivation - Answer Within ones self

Mike weight 150 pounds and has 15% body fat. His goal is to reduce his body fat to 10%. What is her goal body weight to achieve this target body - Answer 141 pounds

Instructor, referral source & role model - Answer Role of a Fitness Professional

All-or-None Principle - Answer Once the necessary threshold of stimulation has been achieved, every muscle fiber associated with a single motor unit will contract.

Recruitment - Answer Simultaneous activation of additional muscle fibers which contributes to greater force production.

F.I.T.T - Answer Frequency, Intensity, Time, Type

Risk factors for CVD. - Answer Family History, Obesity & Diabetes

Component of an Informed Consent document - Answer An explanation of the potential risks associated with exercise.

35 yr old male client has a resting heart rate of 68. Using Karvonen Formula, calculate his target heart rate range from 50% to 85% of the heart rate reserve. - Answer 127-167 beats

According to the physical Activity Guidelines for Americans, for substantial health benefits, adults should: - Answer Perform at least 150 minutes of moderate-intensity aerobic physical activity each week.

BONUS!!! Download part of ExamBoosts NETA_2 dumps for free: https://drive.google.com/open?id=1QR7UwrOrmXfwL22U_1UP5thC9GPwt6S

If you choose the help of ExamBoosts, we will spare no effort to help you pass the exam. Moreover, we also provide you with a year of free after-sales service to update the exam practice questions and answers. Do not hesitate! Please select ExamBoosts, it will be the best guarantee for you to pass NETA_2 Certification Exam. Now please add ExamBoosts to your shopping cart.

NETA NETA_2 Exam Syllabus Topics:

Section	Weight	Objectives
---------	--------	------------

		- Electrical Safety Principles • 1. Personal Protective Equipment • 2. Lockout/Tagout Procedures • 3. Arc Flash Safety
Topic 1: Electrical Theory and Fundamentals	15-20%	- AC/DC Circuit Analysis • 1. Kirchhoff's Laws • 2. Series and Parallel Circuits • 3. Ohm's Law and Power Calculations • 4. Three-Phase Systems - Transformers Testing • 1. Turns Ratio Tests • 2. Excitation Current Tests • 3. Winding Resistance Tests - Protective Devices Testing • 1. Overcurrent Relay Tests • 2. Coordination Studies
Topic 2: Component Testing	20-25%	- Switchgear Testing • 1. Contact Resistance Tests • 2. Circuit Breaker Timing Tests • 3. Dielectric Withstand Tests - Conductors and Cables Testing • 1. Continuity Tests • 2. Insulation Resistance Tests • 3. Hi-Pot Tests - NETA Maintenance Testing Specifications • 1. Electrical Testing Procedures • 2. Visual Inspection Procedures • 3. Acceptance Testing Standards - IEEE Testing Standards • 1. IEEE 4 High-Voltage Testing • 2. IEEE 62.45 Low-Voltage Testing
Topic 3: Testing Procedures and Standards	25-30%	- NFPA 70E Electrical Safety • 1. Arc Flash Hazard Analysis • 2. energized Work Permits - Reports and Certification • 1. NRTL Certification Requirements • 2. Test Report Writing
Topic 4: Documentation and Reporting	10-15%	- Test Documentation • 1. Data Recording Procedures • 2. Test Results Interpretation

- Insulation Testing Equipment

- 1. Megohmmeters
- 2. Insulation Resistance Analyzers
- 3. Hipot Testers

- Grounding and Bonding Testers

- 1. Ground Bond Testers
- 2. Earth Resistance Testers

- Relay Testing Equipment

- 1. Protective Relay Testers

- Circuit Breaker Testers

- 1. Secondary Injection Test Sets
- 2. Primary Injection Test Sets

- Voltmeters and Ammeters

- 1. Digital Multimeters
- 2. Clamp Meters

Topic 5: Testing Equipment and Instrumentation 20-25%

Latest NETA_2 Exam Bootcamp & Reliable NETA_2 Test Materials

Downloading the NETA_2 free demo doesn't cost you anything and you will learn about the pattern of our practice exam and the accuracy of our NETA_2 test answers. We constantly check the updating of NETA_2 vce pdf to follow the current exam requirement and you will be allowed to free update your pdf files one-year. Don't hesitate to get help from our customer assisting.

NETA Level 2 Certified Assistant Electrical Testing Specialist Sample Questions (Q74-Q79):

NEW QUESTION # 74

A 1500:5 multi-ratio CT produces 400 V at the 1200:5 tap during saturation testing. What voltage is expected at the 1500:5 tap?

- A. 400 V
- B. 320 V
- C. 500 V
- D. 480 V

Answer: C

Explanation:

Voltage is proportional to the number of turns. Moving from a 1200:5 ratio to 1500:5 increases turns by a factor of:

$$1500 / 1200 = 1.25$$

$$\text{Expected voltage} = 400 \times 1.25 = 500 \text{ V}$$

NETA Level 2 technicians must accurately scale saturation test results across CT taps to verify performance and protection reliability.

NEW QUESTION # 75

In ANSI/IEEE device numbering, which device best corresponds to Device 52?

- A. Synchronizing relay
- B. AC circuit breaker
- C. Undervoltage relay

- D. Differential relay

Answer: B

Explanation:

ANSI/IEEE device numbers provide a standardized way to identify protective and control functions in power systems. Device 52 designates an AC circuit breaker. It is one of the most commonly referenced device numbers on one-lines, schematics, relay settings sheets, and commissioning documentation.

NETA Level 2 technicians must be comfortable identifying device numbers because testing tasks frequently reference them. For example, when verifying breaker control circuits, interlocks, trip/close coil operation, auxiliary contacts, or anti-pump circuits, drawings may refer to "52a" and "52b" auxiliary contacts (breaker position contacts). Similarly, protection schemes may call for verifying that a relay output properly operates the 52 trip circuit.

Correct identification reduces errors during functional testing, secondary injection, and commissioning checks. Misinterpreting device numbers can lead to wiring mistakes, incorrect test points, or a failure to validate protective functions. Therefore, recognizing device 52 as the AC breaker is a core competency within Level 2 electrical testing fundamentals and component testing.

NEW QUESTION # 76

Which ANSI device number corresponds to an undervoltage relay?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

ANSI device 27 designates an undervoltage relay. This relay operates when system voltage falls below a preset threshold and is commonly used for motor protection, load shedding, and system interlocking. NETA Level 2 technicians must recognize ANSI device numbers to correctly identify protective functions during testing, troubleshooting, and commissioning.

NEW QUESTION # 77

The smallest particle of a substance that still retains the properties of that substance is a:

- A. Electron
- **B. Molecule**
- C. Atom
- D. Ion

Answer: B

Explanation:

A molecule is the smallest unit of a substance that retains its chemical and physical properties. This basic scientific principle supports understanding of insulating materials, gases, and liquids used in electrical equipment, particularly when discussing dielectric behavior and contamination effects.

NEW QUESTION # 78

Secondary injection testing of a low-voltage air circuit breaker is:

- A. Not permitted by NETA standards
- B. Equivalent to primary injection testing for acceptance
- **C. Less comprehensive than primary injection testing**
- D. More comprehensive than primary injection testing

Answer: C

Explanation:

Secondary injection testing verifies the operation of the trip unit electronics, but it does not test the entire current path, sensors, or

mechanical trip linkage under load conditions. Primary injection testing is more comprehensive because it verifies the breaker's response to actual current flowing through the primary circuit.

NETA Level 2 technicians must understand the limitations of secondary injection and when primary injection is required for acceptance testing.

NEW QUESTION # 79

.....

We offer money back guarantee if anyone fails but that doesn't happen if one use our NETA_2 dumps. These NETA NETA_2 exam dumps are authentic and help you in achieving success. Do not lose hope and only focus on your goal if you are using NETA_2 dumps. It is a package of NETA_2 braindumps that is prepared by the proficient experts. These NETA_2 Exam Questions dumps are of high quality and are designed for the convenience of the candidates. These are based on the NETA_2 Exam content that covers the entire syllabus. The NETA_2 practice test content is very easy and simple to understand.
