## Cisco DevNet Associate Exam Sample Questions (Q287-Q292):

### NEW QUESTION # 287

Refer to the exhibit.

Which OWASP threat does this example demonstrate?

- A. broken access control
- B. man-in-the-middle
- C. SQL injection
- **D. cross-site scripting**

**Answer: D**

#### NEW QUESTION # 288

What is a capability of an agentless configuration management system?

- A. It uses compiled languages as the basis of the domain-specific language to interface with managed hosts.
- B. It requires managed hosts to have an interpreter for a high-level language such as Python or Ruby.
- C. It requires managed hosts to connect to a centralized host to receive updated configurations.
- **D. It uses existing protocols to interface with the managed host.**

**Answer: D**

Explanation:

It is agentless, meaning there is no software or service that needs to be installed on the managed device. Ansible connects to managed devices just as a regular system or network administrator would connect for management purposes-in most cases over SSH, but NETCONF and REST API interfaces are also supported.

#### NEW QUESTION # 289

Refer to the exhibit.

An engineer sends the request to collect data over Cisco AMP for Endpoints API. The Engineer must list guide and hostname data for all computers, but the first request returns only 500 items out of 2,000. Then, the engineer adds the loop to collect all the data. What must be added to the script where the code is missing to complete the requests?

- A. Option D
- B. Option C
- **C. Option A**
- D. Option B

**Answer: C**

Explanation:

To complete the requests and retrieve all the data, the correct code that needs to be added is `next_url = response_json['metadata']['links']['next']`. This ensures that the script retrieves the URL for the next set of data from the 'links' object within the 'metadata' section of the JSON response. This allows the loop to continue until all data is collected.

#### NEW QUESTION # 290

Drag and drop the Docker file instructions from the onto correct descriptions on the right. Not all options are used.

**Answer:**

Explanation:

Explanation

1 - E, 2 - B, 3 - D, 4 - A

#### NEW QUESTION # 291

What does a load balancer distribute in a network environment?

- A. traffic in the network by leveraging the switch architecture
- **B. incoming traffic across multiple servers**
- C. outgoing connections to the network
