NEW QUESTION # 29

During data migration into a utility network, which process is used to associate related source features with target utility network features?

- A. Connectivity rules
- **B. Data mapping workbooks**
- C. Validation rules

Answer: B

Explanation:

Data mapping workbooks map relationships between source and target features to ensure proper associations.

NEW QUESTION # 30

When creating association roles, which deletion semantic ensures that all content or attached features are deleted if the container or structure is deleted?

- **A. Cascade deletion semantic**
- B. Restricted deletion semantic
- C. Unspecified deletion semantic

Answer: A

Explanation:

Cascade deletion removes all associated content when the container/structure is deleted.
