For example, in order to make every customer can purchase at ease, our AD0-E124 preparation quiz will provide users with three different versions for free trial, corresponding to the three official versions.

Adobe Experience Manager DevOps Engineer Expert Sample Questions (Q161-Q166):

NEW QUESTION # 161

A company asks the DevOps engineer to add a new domain (marketplace.acmecorp.biz) to their existing AEM as a Cloud Service

program. The corporate IT department is responsible for DNS administration and SSL certificate signing. Which list of requests should the DevOps engineer submit?

- A. 1. EV Certificate for CN: marketplace.acmecorp.biz 2. TXT record for aemverification.marketplace.acmecorp.biz With a value of adobe-aem-verification=marketplace.acmecorp.biz/... 3. CNAME record for marketplace.acmecorp.biz With a value of cdn.adobeacemcloud.com
- **B. 1. DV (Domain Validation) Certificate for CN: marketplace.acmecorp.biz 2. TXT record for aemverification.marketplace.acmecorp.biz With a value of adobe-aem-verification=marketplace.acmecorp.biz/... 3. CNAME record for marketplace.acmecorp.biz With a value of cdn.adobeacemcloud.com**
- C. 1. DV Certificate for CN: marketplace.acmecorp.biz 2. TXT record for aemverification.cdn.adobeacemcloud.com With a value of adobe-aem-verification=marketplace.acmecorp.biz/... 3. CNAME record for marketplace.acmecorp.biz With a value of publish-p00000-e00000.adobeacemcloud.com
- D. 1. OV Certificate for CN: marketplace.acmecorp.biz 2. TXT record for _aemverification.cdn.adobeacemcloud.com With a value of adobe-aem-verification=marketplace.acmecorp.biz/... 3. CNAME record for marketplace.acmecorp.biz With a value of publish-p00000-e00000.adobeacemcloud.com

Answer: B

Explanation:

When adding a custom domain to AEM as a Cloud Service, three things are required from the DNS/IT side:

- * An SSL Certificate (DV, OV, or EV are all valid, but DV is standard for this context).
- * A TXT record added to aemverification. < your-domain > to prove domain ownership to Adobe.
- * A CNAME record that routes the traffic from your custom domain (marketplace.acmecorp.biz) directly to the generic Adobe Fastly CDN edge endpoint (cdn.adobeacemcloud.com, or a specific edge node depending on exact implementation, but cdn.adobeacemcloud.com is the standard architectural target).

Option A correctly identifies the TXT record format and the CNAME target.

NEW QUESTION # 162

A multinational customer's "warning threshold" for the Folder Size: AEM Segment Store metric on the System Monitoring page in Cloud Manager is not the same as other customers and needs to be changed to match.

What should the DevOps engineer do?

- **A. Contact the Adobe Customer Success Engineer.**
- B. Define a new Folder Size KPI in the Setup Program panel.
- C. Configure the Cloud Manager Integration in Adobe I/O console.
- D. Deploy the new metric using the Developer Console.

Answer: A

Explanation:

In Adobe Cloud Manager, system-level monitoring metrics and their associated alerting thresholds (like CPU limits, Memory usage, and Segment Store disk space) are managed by Adobe's internal operations team.

Standard DevOps engineers and customer administrators do not have the ability to alter these foundational infrastructure thresholds via the Cloud Manager UI or APIs. To request a configuration change to alerting thresholds, the engineer must file a request via their Adobe Customer Success Engineer (CSE) or Adobe Support.

NEW QUESTION # 163

Which actions help identify bottlenecks affecting AEM performance? (Choose two)

- A. Modifying the sling.properties file to boost performance
- **B. Analyzing request latency using Cloud Manager metrics**
- **C. Reviewing logs for long-running queries**
- D. Increasing the number of publish instances without checking load balancer settings

Answer: B,C

NEW QUESTION # 164

What is the correct method to submit an Adobe support request via the Admin Console?

- A. Use the Support Cases section in the Admin Console
- B. Log a request in CRXDE Lite
- C. Modify the AEM error logs and send them to Adobe
- D. Email Adobe Support directly

Answer: A

NEW QUESTION # 165

A DevOps engineer receives a ticket to fix a page that is not displaying the latest data.

The environment consists of an author instance, two publish instances, two dispatcher instances, and a load balancer.

The page is a single page application that uses JSON based resources.

No CDN is being used.

The page is loading properly when directly accessing a publish instance.

Requesting the resource using wget through the load balancer delivers an invalid JSON.

The dispatcher flush agent is working on the publish instance.

The issue is reproducible when accessing the page through the load balancer.

What is the issue?

- A. The proxy in the user's office is caching the JSON improperly.
- B. The user did not empty the browser cache properly.
- C. The dispatcher is configured to cache the JSON.
- D. The author dispatcher flush agent is working improperly.

Answer: C

NEW QUESTION # 166

.....

Let me tell the advantages of using the AD0-E124 practice engine. First of all, AD0-E124 exam materials will combine your fragmented time for greater effectiveness, and secondly, you can use the shortest time to pass the exam to get your desired certification. Our AD0-E124 Study Materials allow you to improve your competitiveness in a short period of time. With the help of our AD0-E124 guide prep, you will be the best star better than others.
