최신 Salesforce Developers MCE-Dev-201 무료샘플문제 (Q28-Q33):

질문 # 28

A developer started a Contact Delete process that is now complete.
In which twoplaces would the Contact Delete process remove data? Choose 2 answers

- A. Non-Sendable Data Extensions
- B. Sendable Data Extensions
- C. Mobile Lists
- D. Import Files on the Enhanced SFTP

정답: B,C

설명:

The Contact Delete process in Marketing Cloud removes contact data from various locations to ensure complete deletion. This includes both sendable data extensions and mobile lists.

* Sendable Data Extensions: The Contact Delete process will remove contact data from sendable data extensions, ensuring that the contact is no longer present in any data used for sending.

* Mobile Lists: Contact data will also be removed from mobile lists, ensuring that the contact is fully deleted across all communication channels.

Salesforce Contact Deletion Process

질문 # 29

A developer receives Error Code 5 when performing a SOAP API call. The error states: "Cannot Perform 'Post' on objects of type 'SentEvent'".
What could be the issue?

- A. The authentication token has expired.
- B. SOAP does not support POST; useREST
- C. 'SentEvent' is not able to be updated using SOAP.
- D. It may be a temporary network issue.

정답: C

설명:

The error message "Cannot Perform 'Post' on objects of type 'SentEvent'" indicates that the SentEvent object is not updatable via the SOAP API. The SentEvent object is typically read-only and is used for tracking purposes.

* Read-Only Object: The SentEvent object is used to log events and is not designed to be modified via API calls. This is why attempts to perform POST operations on it will result in an error.

Salesforce SOAP API Error Codes

질문 # 30

How can SSJS variables be referenced for content personalization? Choose 1.

- A. <ctrl:var name="{variableName}" />

- B. <ctrl:field name="variableName" />
- C. <ctrl:eval name="variableName" />
- D. <ctrl:eval>variableName</ctrl:eval>

정답: D

설명:

To reference SSJS (Server-Side JavaScript) variables for content personalization in Salesforce Marketing Cloud, you use the <ctrl:eval> tag. This tag evaluates the SSJS variable and inserts its value into the content.

The correct usage is:

```
<ctrl:eval>variableName</ctrl:eval>
```

This syntax allows you to dynamically insert the value of variableName into the email content.

질문 # 31

A developer is using the legacy endpoint www.exacttargetapis.com and has been asked to switch to Tenant Specific Endpoints (TSEs). What is a benefit of switching to TSEs?

- A. Gain access to TSE-specific REST routes
- B. API calls will no longer fail
- C. A longer lasting OAuth token
- D. Improved API performance

정답: D

설명:

Switching to Tenant Specific Endpoints (TSEs) provides the benefit of improved API performance (D).

Tenant Specific Endpoints are designed to provide optimized performance by ensuring that API calls are routed through endpoints that are dedicated to a specific tenant, reducing latency and potential congestion issues associated with shared endpoints.

질문 # 32

The Contact Delete feature can be used within an Enterprise 2.0 account from which business unit?

- A. The Parent account
- B. Any business unit
- C. The business unit where the contact was introduced
- D. None of these
- E. Only in Agency accounts

정답: A

설명:

The Contact Delete feature can be used within an Enterprise 2.0 account from the Parent account (A). This ensures centralized management and compliance with organizational data governance policies.
