## Easy to Use Fortinet FCP\_FMGA\_AD-7.6 PDF Questions File

A good brand is not a cheap product, but a brand that goes well beyond its users' expectations. The value of a brand is that the FCP\_FMGA\_AD-7.6 exam questions are more than just exam preparation tool -- it should be part of our lives, into our daily lives. Do this, therefore, our FCP\_FMGA\_AD-7.6 question guide has become the industry well-known brands, but even so, we have never stopped the pace of progress, we have been constantly updated the FCP\_FMGA\_AD-7.6 real study guide. Our FCP\_FMGA\_AD-7.6 real study guide provides users with comprehensive learning materials, so that users can keep abreast of the progress of The Times.

## Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q51-Q56):

### NEW QUESTION # 51

An administrator has assigned a global policy package to a new ADOM named ADOM1. What will happen if the administrator tries

to create a new policy package in ADOM1?

- A. The administrator will be able to select the option to assign the global policy package to the new policy package.
- B. The administrator will have to assign the global policy package from the global ADOM.
- **C. FortiManager will automatically assign the global policy package to the new policy package.**
- D. FortiManager will automatically install policies on the policy package in ADOM1.

**Answer: C**

Explanation:

In FortiManager, when a global policy package is assigned to an ADOM, any new policy package created within that ADOM will automatically inherit and include the assigned global policy package. This is designed to ensure consistency and centralized control over shared policies across multiple ADOMs.

#### NEW QUESTION # 52

An administrator configures a new BGP peer in the FortiManager device-level database of FortiGate. They reinstall the policy package to the managed FortiGate device without any errors. However, when the administrator logs in to FortiGate, they do not see the BGP configuration changes.

What is the most likely reason why FortiManager did not push the BGP peer changes to FortiGate?

- A. The administrator must use the Install Wizard and select Install device settings only to push BGP settings
- B. The FortiGate firmware version is different from the FortiManager ADOM version.
- C. The administrator must run a sanity check on FortiManager to make sure the database is not corrupted.
- **D. Fortigate has a BGP template assigned on the FortiManager database.**

**Answer: D**

Explanation:

If a BGP template is assigned to the FortiGate device on FortiManager, device-level BGP configurations made directly in the device-level database are overridden by the template settings, so the changes do not get pushed to the device.

#### NEW QUESTION # 53

Refer to the exhibit. A junior administrator is troubleshooting a FortiManager connectivity issue that is occurring with a managed FortiGate device.

Given the FortiManager device manager settings shown in the exhibit, what can you conclude from this scenario?

□

- **A. The administrator recently restored a FortiManager configuration file.**
- B. The administrator can reclaim the FortiGate to FortiManager protocol (FGFM) tunnel to get the device online.
- C. FortiManager lost internet connectivity, therefore, the device appears to be down.
- D. The administrator must refresh the device to restore connectivity.

**Answer: A**

Explanation:

FMG is in offline mode, which is activated after restoring a configuration file.

#### NEW QUESTION # 54

Refer to the exhibit.

□ Which two statements about the output are true? (Choose two.)

- **A. The system template default will override device-level database configurations.**
- B. The latest revision history for the managed FortiGate does match the FortiManager policy database.
- C. Configuration changes have been installed on FortiGate, updating policy and device-level database.
- **D. The latest revision history for the managed FortiGate does not match the device-level database.**

**Answer: A,D**

Explanation:

The status "pending" indicates the latest revision history does not match the device-level database, meaning there are unapplied changes.

The template is marked as [modified], so the system template default will override device-level database configurations when installed.

### NEW QUESTION # 55

An administrator sees that the policy package status of HQ-NGFW-1 is Never Installed. What can you conclude from this status?

Choose one answer

- A. The firewall policies were created or changed in the ADOM, and they need to be installed on the managed HQ-NGFW-1 for the first time.
- B. The policy package was never imported to the revision history after HQ-NGFW-1 was registered on FortiManager.
- **C. The firewall policies exist only in the HQ-NGFW-1 device-level database, and no policy package has been assigned to the firewall.**
- D. The policies have not yet been retrieved from the HQ-NGFW-1 device-level database of FortiManager.

**Answer: C**

Explanation:

The correct conclusion is D. The FortiManager 7.6 Administrator Study Guide defines Never Installed as a state where the policy package was never created and was never imported for a managed device. That means FortiManager may already know the device itself at the device layer, but the firewall policy layer has not yet been built for that device.

The lab guide confirms this behavior directly: when you choose Import Later in the Add Device wizard, the policy package status becomes Never Installed because there is still no policy package created for the added FortiGate devices.

So this is not a revision-history issue, and it does not mean ADOM policy changes are merely waiting for first install. It means the policies still exist only on the managed device side until they are imported into a FortiManager policy package.

### NEW QUESTION # 56

.....

The FCP\_FMG\_AD-7.6 is an import way to improve our competitiveness, and our FCP\_FMG\_AD-7.6 exam dump will help you 100% pass your exam and get a certification. First of all, our FCP\_FMG\_AD-7.6 study materials are constantly being updated and improved so that you can get the information you need and get a better experience. Our FCP\_FMG\_AD-7.6 test questions have been following the pace of digitalization, constantly refurbishing, and adding new things. I hope you can feel the FCP\_FMG\_AD-7.6 Exam Prep sincerely serve customers. We also attach great importance to the opinions of our customers. The duration of this benefit is one year, and FCP\_FMG\_AD-7.6 exam prep look forward to working with you.
