

# Pdf PSPO-I Dumps & PSPO-I Test Tutorials

P.S. Free & New PSPO-I dumps are available on Google Drive shared by TestPassKing: <https://drive.google.com/open?id=1aYW1AN9Mqu2b5FRCd7x8o05s-6EqIceG>

Our PSPO-I study materials are easy to be mastered and boost varied functions. We compile Our PSPO-I preparation questions elaborately and provide the wonderful service to you thus you can get a good learning and preparation for the PSPO-I Exam. After you know the characteristics and functions of our PSPO-I training materials in detail, you will definitely love our exam dumps and enjoy the wonderful study experience.

Scrum is a popular and widely used framework for Agile project management. It is based on the principles of transparency, inspection, and adaptation, and it emphasizes the importance of teamwork, collaboration, and continuous improvement. One of the key roles in the Scrum framework is the Product Owner, who is responsible for defining and prioritizing the product backlog, ensuring that the team is delivering value to the customers, and communicating with stakeholders.

Scrum PSPO-I, also known as Professional Scrum Product Owner I, is an exam that tests the knowledge and skills of individuals who want to become certified product owners. Professional Scrum Product Owner I certification is offered by Scrum.org, a leading global organization that provides training and certification in Scrum, an agile framework for software development.

Scrum PSPO-I Exam is designed to test the candidate's knowledge and understanding of the Scrum framework, product ownership, product backlog management, and agile product development. PSPO-I exam consists of 80 multiple-choice questions, and candidates have 60 minutes to complete the exam. PSPO-I exam is designed to test the candidate's understanding of the principles and practices of Scrum, including the roles and responsibilities of the product owner, the creation and management of the product backlog, and the techniques for effective product backlog refinement. The Scrum PSPO-I Exam is an excellent opportunity for product owners to demonstrate their expertise and differentiate themselves in the competitive job market.

## PSPO-I Learning Materials & PSPO-I Exam Resources & PSPO-I Practice Test

The world is rapidly moving forward due to the prosperous development of information. Our company is also making progress in every side. The first manifestation is downloading efficiency. A lot of exam candidates these days are facing problems like lacking of time, or lacking of accessible ways to get acquainted with high efficient PSPO-I Guide question like ours. To fill the void, we simplify the procedures of getting way, just place your order and no need to wait for arrival of our PSPO-I exam dumps or make reservation in case people get them all, our practice materials can be obtained with five minutes.

### Scrum Professional Scrum Product Owner I Sample Questions (Q49-Q54):

#### NEW QUESTION # 49

Which of the following are criteria to order Product Backlog items?  
(choose all that apply)

- A. Dependencies between Product Backlog items.
- B. Dependencies to other products.
- C. Value of Product Backlog items.
- D. The availability of the Scrum Master.
- E. All of the above.

**Answer: A,B,C**

Explanation:

The Product Owner orders the Product Backlog items according to various criteria, such as:

- \* The value of Product Backlog items. The Product Owner aims to maximize the value of the product and the work of the Scrum Team. Therefore, they prioritize the items that deliver the most value to the stakeholders and the users, considering factors such as customer satisfaction, market share, revenue, social impact, etc.
- \* The dependencies between Product Backlog items. The Product Owner tries to minimize the dependencies between items, as they may create complexity, uncertainty, and risk. Therefore, they order the items in a way that reduces or eliminates the dependencies, or resolves them as early as possible.
- \* The dependencies to other products. The Product Owner also considers the dependencies that the product has to other products, such as platforms, frameworks, libraries, services, etc. Therefore, they order the items in a way that aligns with the availability and compatibility of those products.

References:

- \* Scrum Guide 2020, page 11: "The Product Owner is accountable for effective Product Backlog management, which includes ... ordering Product Backlog items; and, ensuring that the Product Backlog is transparent, visible and understood."
- \* Scrum Guide 2020, page 11: "The ordering of the items in the Product Backlog is the sole responsibility of the Product Owner. They order Product Backlog items to best achieve goals and missions."
- \* Scrum Guide 2020, page 11: "Higher ordered Product Backlog items are clearer and more refined than lower ordered ones."

#### NEW QUESTION # 50

What are the two responsibilities of testers in a Scrum Team?  
(choose the best two answers)

- A. Tracking quality metrics.
- B. Finding bugs.
- C. Scrum has no "tester" role.
- D. Verifying the work of programmers.
- E. The Developers are responsible for quality.

**Answer: C,E**

Explanation:

Explanation

- \* Scrum is a framework for developing, delivering, and sustaining complex products. Scrum defines three roles: the Product Owner,

the Scrum Master, and the Developers. Scrum does not have any other roles or titles, such as "tester", "analyst", "designer", or "architect".

\* The Developers are the people in the Scrum Team who are accountable for creating a "Done" Increment that meets the Definition of Done each Sprint. The Developers are responsible for planning and executing the Sprint Backlog, designing and building the product functionality, testing and improving the product quality, and delivering a potentially releasable Increment. The Developers work closely with the Product Owner to understand and clarify the Product Backlog items, provide feedback and estimates, and suggest improvements and innovations.

\* The Developers are responsible for quality, not just for programming. Quality is not something that can be added or verified after the product is built. Quality is something that must be built into the product from the start, by following good practices, standards, and principles. Quality is also something that must be inspected and adapted continuously, by applying feedback loops, testing methods, and improvement actions.

\* The Developers are not divided into sub-teams or sub-roles based on their skills or specialties. The Developers are a cross-functional and self-organizing team that has all the skills and capabilities needed to create a valuable product Increment. The Developers collaborate and coordinate their work as one unit, without any hand-offs or silos.

\* The Developers may have different backgrounds or expertise, such as testing, analysis, design, or architecture. However, these are not separate roles or responsibilities in Scrum. They are part of the collective accountability and responsibility of the Developers as a whole. The Developers may perform different tasks or activities based on their skills or preferences, but they are all equally responsible for delivering a high-quality product Increment.

#### NEW QUESTION # 51

What may be included in the Sprint Backlog?

(choose the best answer)

- A. Use Cases.
- **B. Any of the above (or others) which are a decomposition of the selected Product**
- C. Tests.
- D. Tasks.
- E. User Stories.

**Answer: B**

Explanation:

Backlog items.

Explanation:

The Sprint Backlog is the set of Product Backlog items selected for the Sprint, plus a plan for delivering the product Increment and realizing the Sprint Goal. The Sprint Backlog is a forecast by the Developers about what functionality will be in the next Increment and the work needed to deliver that functionality into a "Done" Increment. The Sprint Backlog makes visible all the work that the Developers identify as necessary to meet the Sprint Goal. The Sprint Backlog can include any items that the Developers deem necessary to achieve the Sprint Goal, such as user stories, tasks, use cases, tests, or others. The Sprint Backlog is a plan with enough detail that changes in progress can be understood in the Daily Scrum.

Professional Scrum Product Owner I (PSPO I) Learning Path, section 2.2. The Product Owner and the Sprint Professional Scrum Product Owner I (PSPO I) Sample Questions, question 11

#### NEW QUESTION # 52

When does a Developer become accountable for the value of a Product Backlog item selected for the Sprint?

(choose the best answer)

- **A. Never. The entire Scrum Team is accountable for creating value every Sprint.**
- B. During the Daily Scrum.
- C. At the Sprint Planning Event.
- D. Whenever a team member can accommodate more work.

**Answer: A**

Explanation:

Explanation

Answer D. Never. The entire Scrum Team is accountable for creating value every Sprint.

Explanation: According to the Scrum Guide, the Scrum Team consists of one Product Owner, one Scrum Master, and Developers. The Scrum Team is responsible for all product-related activities, including delivering a valuable, usable product increment every Sprint. The Product Owner is accountable for maximizing the value of the product and the work of the Developers. The Developers are accountable for creating a plan for the Sprint, the Sprint Backlog; instilling quality by adhering to a Definition of Done; and adapting their plan each day toward the Sprint Goal. The Scrum Master is accountable for establishing Scrum as defined in the Scrum Guide, helping everyone understand Scrum theory and practice, and removing impediments to the Scrum Team's progress. Therefore, the Developers are not individually accountable for the value of a Product Backlog item selected for the Sprint, but collectively accountable as part of the Scrum Team. The value of a Product Backlog item is determined by the Product Owner, who orders the Product Backlog items based on stakeholder needs and feedback. The Developers collaborate with the Product Owner to understand the value and requirements of each Product Backlog item and deliver a potentially releasable product increment that meets the Definition of Done and the Sprint Goal.

References:

\* [Scrum Guide], section 2.2: "The Scrum Team is responsible for all product-related activities from stakeholder collaboration, verification, maintenance, operation, experimentation, research and development, and anything else that might be required."

\* Accountabilities in Scrum | Scrum.org: "Scrum has three accountabilities, each with a different focus :

Product Owner (green figure) The "What". With a focus on Value, time to market, return on investment and Total Cost of Ownership (TCO). Developers (red figures) The "How". Focus on building something that is Done - that the increment is useable and potentially releasable."

\* What is a Developer in Scrum? | Scrum.org: "The specific skills needed by the Developers are often broad and will vary based on the type of work they are doing. However, the Developers are always accountable for: Creating a plan for the Sprint, the Sprint Backlog Instilling quality by adhering to a Definition of Done Adapting their plan each day toward the Sprint Goal"

#### NEW QUESTION # 53

Which of the following are required by Scrum?

- A. Hardening Sprints
- B. Time boxed events
- C. Story Points
- D. Sprint Planning meetings
- E. A Sprint 0

Answer: B,D

#### NEW QUESTION # 54

.....

The only aim of our company is to help each customer pass their exam as well as getting the important certification in a short time. If you want to pass your exam and get the PSPO-I certification which is crucial for you successfully, I highly recommend that you should choose the PSPO-I certification braindumps from our company so that you can get a good understanding of the exam that you are going to prepare for. We believe that if you decide to buy the PSPO-I Exam Materials from our company, you will pass your exam and get the certification in a more relaxed way than other people.
