Dear every IT candidate, please pay attention to CheckPoint 156-315.81 exam training torrent which can guarantee you 100% pass. We know that time and energy is very precious. So the high efficiency of the 156-315.81 preparation is very important for the IT candidates. If you choose 156-315.81 Online Test, you just need to take 20-30 hours to review the questions and answers, then you can attend your 156-315.81 actual test with confidence.

The CheckPoint 156-315.81 exam is intended for those who have several years of experience in the field of IT security. Candidates should be familiar with Check Point's Security Management and Gateway software and have experience in implementing and managing Check Point Security solutions. 156-315.81 exam is divided into two parts, a written exam, and a practical lab exam. The written exam consists of multiple-choice questions, while the lab exam is a hands-on test where candidates are required to configure and troubleshoot a Check Point Security solution.

CheckPoint 156-315.81 Exam is targeted towards experienced security professionals with significant practical knowledge of Check Point technologies. The credentials offered by the exam are valuable for those seeking to advance their career in the security domain. 156-315.81 exam covers a wide range of topics, including security administration, VPN management, security policies, and network address translation, among others.

## Top Exam 156-315.81 Certification Cost | High Pass-Rate 156-315.81 Latest Test Braindumps: Check Point Certified Security Expert R81

Just look at the text version of the introduction, you may still be unable to determine whether this product is suitable for you, or whether it is worth your purchase. We are very fond of preparing trial versions of our 156-315.81 study materials for you so that you can have a clearly check on not only the content of the 156-315.81 Exam Braindumps, but also the displays. The content of the trial version is a small part of our 156-315.81 practice questions, and it is easy and convenient to free download.

CheckPoint 156-315.81 Certification Exam is recognized globally as a standard for security professionals working with Check Point Security Systems. Check Point Certified Security Expert R81 certification is highly valued by employers and can lead to career advancement opportunities. Security professionals who pass the exam can work as security administrators, security consultants, network security engineers, and security managers. Check Point Certified Security Expert R81 certification also demonstrates a commitment to professional development and continuous learning in the dynamic field of cybersecurity.

### CheckPoint Check Point Certified Security Expert R81 Sample Questions (Q559-Q564):

#### NEW QUESTION # 559

How do you enable virtual mac (VMAC) on-the-fly on a cluster member?

- A. `cphaconf set int fwha_vmac_global_param_enabled 1`
- B. `fw ctl set int fwha_vmac_global_param_enabled 1`
- C. `cphaprob set int fwha_vmac_global_param_enabled 1`
- D. `clusterXL set int fwha_vmac_global_param_enabled 1`

**Answer: B**

Explanation:

To enable VMAC mode on a cluster member, you need to set the value of the global kernel parameter `fwha_vmac_global_param_enabled` to 1. This can be done on-the-fly using the command `fw ctl set int fwha_vmac_global_param_enabled 1` on all cluster members. This command does not require a reboot or a policy installation. VMAC mode allows the cluster to use a virtual MAC address for its virtual IP addresses, which reduces the number of gratuitous ARP packets sent upon failover and avoids ARP cache issues on some routers and switches. Reference: How to enable ClusterXL Virtual MAC (VMAC) mode

#### NEW QUESTION # 560

IF the first packet of an UDP session is rejected by a rule definition from within a security policy (not including the clean up rule), what message is sent back through the kernel?

- A. Nothing
- B. TCP RST
- C. TCP FIN
- D. ICMP unreachable

**Answer: A**

#### NEW QUESTION # 561

What command would show the API server status?

- A. `cpm status`
- B. `show api status`
- C. `api restart`
- D. `api status`

**Answer: D**

Explanation:

Explanation

The command that would show the API server status is `api status`. API stands for Application Programming Interface, and it is a web service that allows external applications to interact with the Check Point management server using standard methods such as HTTP(S) requests and JSON objects. `API status` is a command that shows the current status of the API server, such as whether it is enabled or disabled, running or stopped, listening on which port, using which certificate, etc. The other commands are either invalid or perform different functions.

### NEW QUESTION # 562

From SecureXL perspective, what are the three paths of traffic flow:

- A. Initial Path; Medium Path; Accelerated Path
- B. Firewall Path; Accept Path; Drop Path
- C. Layer Path; Blade Path; Rule Path
- D. Firewall Path; Accelerated Path; Medium Path

**Answer: D**

Explanation:

Explanation

From SecureXL perspective, the three paths of traffic flow are Firewall Path, Accelerated Path, and Medium Path. Firewall Path is the path that handles packets that are not processed by SecureXL and are sent to the Firewall kernel for inspection. Accelerated Path is the path that handles packets that are processed by SecureXL and bypass the Firewall kernel. Medium Path is the path that handles packets that are partially processed by SecureXL and partially by the Firewall kernel. References: Check Point R81 Performance Tuning Administration Guide

### NEW QUESTION # 563

What are the three components for Check Point Capsule?

- A. Capsule Workspace, Capsule Docs, Capsule Cloud
- B. Capsule Docs, Capsule Cloud, Capsule Connect
- C. Capsule Workspace, Capsule Cloud, Capsule Connect
- D. Capsule Workspace, Capsule Docs, Capsule Connect

**Answer: A**

Explanation:

The three components for Check Point Capsule are Capsule Workspace, Capsule Docs, and Capsule Cloud.

Capsule Workspace is a secure container app that allows users to access corporate data and applications from their mobile devices. Capsule Docs is a solution that protects documents with encryption and granular access control. Capsule Cloud is a cloud-based security service that enforces security policies on devices that are outside the corporate network. References: Check Point Capsule
