

AIGP Online Prüfungen - AIGP Quizfragen Und Antworten

P.S. Kostenlose und neue AIGP Prüfungsfragen sind auf Google Drive freigegeben von PrüfungFrage verfügbar:
<https://drive.google.com/open?id=1baFBcLZTYqaymCH9CA2sP6rPQyTSnjd>

Wollen Sie den Plan machen, dass Sie IAPP AIGP Zertifizierungsprüfung ablegen, um Ihre Fähigkeit zu entwickeln. Wenn Sie IAPP AIGP Prüfung ablegen, ob Sie die geeigneten Lernhilfe finden? Und welche Unterlage sind wertvoll? Haben Sie IAPP AIGP Dumps gewählt? Wenn ja, sorgen Sie sich bitte nicht um den Misserfolg.

IAPP AIGP Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.
Thema 2	<ul style="list-style-type: none"> Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.

Thema 3	<ul style="list-style-type: none"> • Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.
Thema 4	<ul style="list-style-type: none"> • Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.

Valid AIGP exam materials offer you accurate preparation dumps

Jede Version der IAPP AIGP Prüfungsunterlagen von uns hat ihre eigene Überlegenheit. PDF Version hat keine Beschränkung für Anlage, deshalb können Sie irgendwo die Unterlagen lesen. Wenn Sie Internet benutzen können, die Online Test Engine der IAPP AIGP können Sie sowohl mit Windows, Mac als auch Android, iOS benutzen. Mit Simulations-Software können Sie die Prüfungsumwelt der IAPP AIGP erfahren und bessere Kenntnisse darüber erwerben. Übrigens, Sie dürfen die Prüfungssoftware irgendwie viele Male installieren.

IAPP Certified Artificial Intelligence Governance Professional AIGP Prüfungsfragen mit Lösungen (Q149-Q154):

149. Frage

Your organization is searching for a new way to help accurately forecast sales predictions by various types of customers. Which of the following is the best type of model to choose if your organization wants to customize the model and avoid lock-in?

- A. A free large language model.
- **B. A classic machine learning model.**
- C. A subscription-based, multimodal model.
- D. A proprietary generative AI model.

Antwort: B

Begründung:

For customizable, interpretable models that allow organizations to retain control and avoid vendor lock-in, classic ML models (e.g., regression, decision trees, random forests) are optimal.

From the AI Governance in Practice Report 2024:

"Organizations seeking transparency, customizability, and control often prefer classic ML models due to their flexibility and ease of governance." (p. 33)

* A and C may have limited transparency and are often tied to specific providers.

* D involves ongoing costs and limited model control.

150. Frage

A Canadian company is developing an AI solution to evaluate candidates in the course of job interviews. Before offering the AI solution in the EU market, the company must take all of the following steps EXCEPT:

- A. Establish a risk and quality management system.
- **B. Engage a third-party auditor to perform a bias audit.**

- C. Register the AI solution in a public EU database.
- D. Draw up technical documentation and instructions for use.

Antwort: B

Begründung:

While bias audits are important, the EU AI Act does not mandate engaging a third-party auditor; registration, risk management systems, and technical documentation are required.

151. Frage

Why is it important that conformity requirements are satisfied before an AI system is released into production?

- A. To comply with legal and regulatory standards, ensuring the AI system is safe and trustworthy.
- B. To guarantee interoperability of the AI system across multiple platforms and environments.
- C. To ensure the visual design is fit for purpose.
- D. To ensure the AI system is easy for end-users to operate.

Antwort: A

Begründung:

The correct answer is D because conformity requirements are primarily intended to ensure that AI systems meet applicable legal, regulatory, and safety standards before deployment. AI governance frameworks, including the EU AI Act and international standards, require conformity assessments to verify that systems are safe, reliable, and compliant with risk management, documentation, and performance obligations. These assessments help identify and mitigate risks prior to market release, particularly for high-risk AI systems that may impact individuals' rights, health, or safety. Conformity ensures accountability, transparency, and trustworthiness, which are central principles of responsible AI governance. The other options relate to usability or technical considerations, but they do not address the primary purpose of conformity assessments, which is regulatory compliance and risk mitigation prior to deployment.

152. Frage

CASE STUDY

Please use the following to answer the next question:

A mid-size US healthcare network has decided to develop an AI solution to detect a type of cancer that is most likely to arise in adults. Specifically, the healthcare network intends to create a recognition algorithm that will perform an initial review of all imaging and then route records to a radiologist for secondary review pursuant to agreed-upon criteria (e.g., a confidence score below a threshold).

To date, the healthcare network has:

- Defined its AI ethical principles.
- Conducted discovery to identify the intended uses and success criteria for the system.
- Established an AI risk committee.
- Assembled a cross-functional team with clear roles and responsibilities.
- Created policies and procedures to document standards, workflows, timelines and risk thresholds during the project.

The healthcare network intends to retain a cloud provider to host the solution. It also intends to retain a large consulting firm to supplement its small data science team and help develop the algorithm using the healthcare network's existing data and de-identified data that is licensed from a large US clinical research partner.

In the design phase, which of the following steps is most important in gathering the data from the clinical research partner?

- A. Combine only anonymized data.
- B. Perform a quality assessment.
- C. Secure the combined data sets.
- D. Review the terms of use.

Antwort: B

153. Frage

Training an AI model is time-consuming because of (Choose three.)

- A. The maturity of AI governance.
- B. The complexity of the AI model.
- C. The volume of training data.
- D. The number of stakeholders.
- E. The quality of the training data.

Antwort: B,C,E

Begründung:

Training time is affected by the model's complexity, the volume of training data, and the quality of that data, all of which impact computational requirements and training effectiveness.

154. Frage

.....

Die Fragenpool zur IAPP AIGP Zertifizierungsprüfung von PrüfungFrage hat eine große Ähnlichkeit mit den realen Prüfungen. Sie können in unseren Fragenpool den realen Prüfungsfragen begegnen. Das zeigt die Fähigkeiten unseres Expertenteams. Nun sind viele IT-Fachleute ganz ambitioniert. Sie beteiligen sich an der IAPP AIGP Zertifizierungsprüfung, um sich den Bedürfnissen des Marktes anzupassen und ihren Traum zu verwirklichen.
