100% Pass CPRE-FL_Syll_3.0 - IREB Certified Professional for Requirements Engineering. Foundation Level –Efficient Interactive Questions

We learned that a majority of the candidates for the exam are office workers or students who are occupied with a lot of things, and do not have plenty of time to prepare for the CPRE-FL_Syll_3.0 exam. Taking this into consideration, we have tried to improve the quality of our CPRE-FL_Syll_3.0 training materials for all our worth. Now, I am proud to tell you that our CPRE-FL_Syll_3.0 Exam Questions are definitely the best choice for those who have been yearning for success but without enough time to put into it. Just buy them and you will pass the exam by your first attempt!

ISQI IREB Certified Professional for Requirements Engineering. Foundation Level Sample Questions (Q75-Q80):

NEW QUESTION # 75
Which of the following conflict resolution techniques tends to last longer?

- A. Overruling
- B. Agreement
- C. Random choice
- D. Voting

Answer: B

NEW QUESTION # 76
Which of the following statements is true?

- A. All the other options are wrong.
- B. The benefits of Requirements Engineering are usually short term.
- C. The RE effort should be directly proportional to the risk that the enterprise is willing to take.
- D. The costs of Requirements Engineering are immediate.

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
The CPRE handbook explains that Requirements Engineering demands effort early in the life cycle:
stakeholder analysis, elicitation workshops, modeling, documentation and validation all consume time and resources. These costs are immediate and visible. However, the benefits-reduced rework, fewer defects, better alignment with needs and lower project risk-mainly materialize later during development, operation and maintenance. Thus, RE is an investment with delayed payoff. Option A is wrong because benefits are long-term. Option C is inverted: the more risk an organization is willing to accept, the less RE it may perform.
Therefore statement B is correct.

NEW QUESTION # 77
Which sentence best characterises the term "stakeholder"? (1 Point)

- A. Stakeholders are special interest representatives who are responsible for the approval of the first project phase.
- B. The external actors interacting with a system and the technical interfaces to surrounding systems are designated as stakeholders.
- C. A stakeholder is responsible for the administration of the software development environment.
- D. Stakeholders are persons and organisations affected by the development and the use of the system or of the product.

Answer: D

NEW QUESTION # 78
Choose the right options regarding tools to support Requirements Engineering.

- A. When choosing a tool, the most important thing is to evaluate if the tool can be adapted to the existing RE process and working method.
- B. After acquiring a new tool, it is a good practice to initially use it redundantly alongside an existing project.
- C. It is perfectly fine to use basic office tools to manage requirements.
- D. The RE process can be changed due to the tool selected.

Answer: B,D

NEW QUESTION # 79

In requirements engineering, a differentiation is made between system scope and context scope. In both cases it is possible that so-called grey zones may appear. For each statement, indicate if it is true or false. (2 Points)

True	False	
A	B	The grey zone relating to system scope must be resolved immediately at the beginning of the requirements engineering.
C	D	The irrelevant part of the system environment has no impact on the requirements of the system to be developed.
E	F	The context boundary is the boundary that separates the subject of the requirements engineering from irrelevant aspects.
G	H	The grey zone relating to context scope includes aspects that are ambiguous in terms of whether they have an impact on the system or not.

Answer:

Explanation:
B, C, E, G

NEW QUESTION # 80
