CyberArk Defender - PAM Sample Questions (Q84-Q89):

NEW QUESTION # 84

What is the primary purpose of Dual Control?

- A. Non-repudiation (individual accountability)
- B. Reduced risk of credential theft
- **C. To force a 'collusion to commit' fraud ensuring no single actor may use a password without authorization.**
- D. More frequent password changes

Answer: C

NEW QUESTION # 85

Which user is automatically added to all Safes and cannot be removed?

- A. Administrator
- **B. Master**
- C. Operator
- D. Auditor

Answer: B

Explanation:

Explanation

The user that is automatically added to all Safes and cannot be removed is the Master user. The Master user is a predefined user that is created during the Vault installation and has full permissions on all Safes and accounts. The Master user is the only user that can perform certain tasks, such as creating other predefined users, managing the Vault configuration, and restoring the Vault from a backup. The Master user cannot be deleted or modified by any other user, and is always a member of every Safe12. References:

* Predefined users and groups - CyberArk, section "Master"

* Safes and Safe members - CyberArk, section "Safe members overview"

NEW QUESTION # 86

Where can you assign a Reconcile account? (Choose two.)

- A. at the Safe level
- B. in the Master policy of the PVWA
- C. in the CPM settings
- **D. in PVWA at the account level**
- **E. in PVWA in the platform configuration**

Answer: D,E

NEW QUESTION # 87

To manage automated onboarding rules, a CyberArk user must be a member of which group?

- A. Auditors
- B. Administrators
- C. Vault Admins
- D. CPM User

Answer: C

Explanation:

Explanation

To manage automated onboarding rules in CyberArk, a user must be a member of the Vault Admins group. This group has the necessary permissions to create and manage predefined rules that automatically onboard newly discovered accounts, which helps minimize the time it takes to onboard and securely manage accounts, reduces the time spent on reviewing pending accounts, and prevents human errors that may occur during manual onboarding¹.

References:

* CyberArk's official documentation on onboarding rules provides detailed information on the groups required to manage these rules, including the Vault Admins group¹.

NEW QUESTION # 88

When should vault keys be rotated?

- A. when migrating to a new data center
- B. when it is copied to file systems outside the vault
- C. whenever a CyberArk user leaves the organization
- D. annually

Answer: D
