

# Arch-303 Test Sample Online - Training Arch-303 Materials

If you buy our Arch-303 training quiz, you will find three different versions are available on our test platform. According to your need, you can choose the suitable version for you. The three different versions of our Arch-303 study materials include the PDF version, the software version and the online version. We can promise that the three different versions are equipment with the high quality. If you purchase our Arch-303 Preparation questions, it will be very easy for you to easily and efficiently find the exam focus and pass the Arch-303 exam.

Our company was built in 2008 since all our education experts have more than ten years' experience in Arch-303 guide torrent. The most important characters we pay attention on are our quality and pass rate. We devote ourselves to improve passing rate constantly and service satisfaction degree of our Arch-303 training guide. And now you can find the data provided from our loyal customers that our pass rate of Arch-303 learning guide is more than 98%. You will successfully pass your Arch-303 exam for sure.

## Pass Guaranteed Quiz 2026 Salesforce Professional Arch-303: Salesforce Certified B2C Commerce Architect Test Sample Online

You will notice the above features in the Salesforce Arch-303 Web-based format too. But the difference is that it is suitable for all operating systems: Macs, Linux, iOS, Androids, and Windows. There is no need to go through time-taking installations or agitating plugins to use this format. It will lead to your convenience while preparing for the Salesforce Arch-303 Certification test. Above all, it operates on all browsers: Mozilla, Safari, Opera, Google Chrome, and Internet Explorer.

## Salesforce Certified B2C Commerce Architect Sample Questions (Q58-Q63):

### **NEW QUESTION # 58**

A new dent is moving from their existing ecommerce platform to B2C Commerce. They have an existing service that connects to the Email Marketing System. The endpoint of the service can directly parse the data posted by the customer from the Storefront page for marketing materials subscriptions. It is required that the service implementation on the B2C Commerce site supports authentication and encoding.

What type should the Architect document this new service as?

- A. Generic
- **B. HTTP**
- C. SOAP
- D. HTTP Form

**Answer: B**

Explanation:

For a service that connects to an Email Marketing System where the endpoint can directly parse data posted by the customer from the storefront for marketing material subscriptions, documenting the service as an HTTP service is appropriate. This type of service will likely involve straightforward HTTP requests with authentication and encoding to ensure data integrity and security. The HTTP service type supports these requirements effectively, facilitating secure, reliable data transmission between the storefront and the email marketing system.

#### NEW QUESTION # 59

The Architect has been presented with a requirement from the business to implement a new LINK cartridge.

The current site is built on the Storefront Reference Architecture, and the LINK cartridge is certified for Pipelines and Controllers.

On review, the Architect notes that the Jobs are all created in Pipelines.

How should the Architect implement that cartridge to make sure the required jobs runs properly?

- A. The Job Pipelines must be updated to use SiteGenesis Controllers.
- **B. The job Pipelines must be updated to work as custom job steps.**
- C. The job Pipelines must be updated to useSFRA Controllers.
- D. The job Pipelines must be removed and recreated with scripts.

**Answer: B**

Explanation:

For integrating a LINK cartridge that is certified for pipelines and controllers into a system using the Storefront Reference Architecture (SFRA), which primarily uses scripts instead of the older pipeline technology, the architect should update the job pipelines to work as custom job steps. This approach allows the existing LINK cartridge functionalities to be maintained while making them compatible with the SFRA framework. Custom job steps enable more flexibility and the ability to leverage the full capabilities of SFRA, ensuring that the jobs run correctly within the newer architecture.

#### NEW QUESTION # 60

The client provided these business requirements:

- \* The B2C Commerce platform will integrate with the Client's Order Management System (OMS).
- \* The OMS supports Integration using REST services.
- \* The OMS is hosted on the Client's infrastructure.

What configurations are needed for this integration with the OMS?

- A. A service configuration, a service profile configuration, and a user credential configuration.
- B. A service profile configuration, a WAF configuration, and a service credential configuration.
- C. A service configuration, a hostname alias configuration, and a user credential configuration.
- **D. A service configuration, a service profile configuration, and a service credential configuration.**

**Answer: D**

Explanation:

For integrating the B2C Commerce platform with the client's OMS using REST services, the required configurations include:

\* Service Configuration: This specifies the service endpoints, HTTP methods, and any other service-specific settings necessary for the integration.

\* Service Profile Configuration: This defines the behavior of the service such as timeout settings, retry logic, and cache settings.

\* Service Credential Configuration: This involves setting up the credentials that will be used to authenticate the requests to the client's OMS. These credentials are often managed securely through encrypted storage and retrieval mechanisms.

These configurations ensure secure, efficient, and reliable communication between the B2C Commerce platform and the client's OMS, adhering to best practices in web service integration.

## NEW QUESTION # 61

Northern Trail Outfitters (NTO) wants to migrate its online shop from a custom ecommerce platform to B2CCommerce. NTO needs to migrate several thousands of customer records (profile information, address book). WTO can provide a B2C Commerce feed. It is currently using SHA-256 as an encryption mechanism for the customer passwords.

What approach can the Architect propose?

- A. Do not import customer records and asks customers to create new accounts the first time they try to log in to the B2C Commerce storefront.
- B. Import the customer records, excluding the password field, and B2C Commerce will automatically require a password reset the first time a customer logs in to the storefront.
- C. Import the customer records, with the hashed password as a custom attribute, and during the login compare the entered password with the hashed password and save it in the password field.
- D. Import the customer records, including the hashed password, as B2C Commerce supports SHA-256, and they will be able to log in with their existing password.

**Answer: B**

Explanation:

B2C Commerce does not directly support the import of hashed passwords for use in authentication due to security protocols and the platform's password management system. The best approach is to import customer records without the password field. Upon their first login attempt on the new system, customers would be prompted to reset their password. This method ensures that password security is maintained according to B2C Commerce standards and that customer data remains secure during the transition from the old platform.

## NEW QUESTION # 62

During load testing, a third party service is constantly failing to respond in a timely manner on the Product Listing Page. The page is not affected at it is collecting data with the server side call, however the loading time is increasing.

Which two recommendations should the developer take in order to minimize the risk and Improve the loading time?

Choose 2 answers

- A. Ask the third party to improve the reliability of the service.
- B. Load the data asynchronously after the page is loaded
- C. Enable the Circuit Breaker.
- D. Remove the service.
- E. Decrease the service timeout.

**Answer: B,C**

Explanation:

In scenarios where a third-party service impacts page performance, implementing a Circuit Breaker pattern (Option C) can prevent the service from becoming a bottleneck. This pattern helps manage failing service calls by temporarily disabling the service interaction when failures reach a certain threshold, allowing it to recover. Asynchronously loading the data (Option E) ensures the page's primary content loads without delay, while data from the third-party service is fetched in the background, improving the user's perceived performance and page load times.

## NEW QUESTION # 63

.....

Which one is your favorite way to prepare for the exam, PDF, online questions or using simulation of exam software? Fortunately, the three methods will be included in our Arch-303 exam software provided by ValidBraindumps, so you can download the free demo of the three version. Choosing the right method to have your exam preparation is an important step to obtain Arch-303 Exam Certification. Certainly, we ensure that each version of Arch-303 exam materials will be helpful and comprehensive.
