SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite

Sample Questions (Q45-Q50):

NEW QUESTION # 45

While working on a customer project, the customer asks if specific details can be captured and made available in reporting for a sourcing project or contract that doesn't fit the standard fields.

What is the recommended way to handle this scenario?

- A. Configure as many custom fields as possible for data capture purposes.
- B. Create a Microsoft Form from the Actions menu for managing all the requirements.
- C. Create a dynamic form (dform) where common data can be synced with the project header through customization.
- D. Suggest the customer put a word document on the template and capture all information in that document.

Answer: C

NEW QUESTION # 46

What is the recommended order of operations for creating a required Flex Master Data (FMD) type field in a project header?:

- A.
- B.
- C.
- D.

Answer: D

NEW QUESTION # 47

During verification in Production, a stakeholder reports that the imported form template appears outdated.

What could be a likely reason for this?

- A. The system automatically reverted the template to a previous version during import.
- B. The Production site is missing certain parameter settings.
- C. The Production site does not support custom form templates.
- D. The Test site template was not the latest version when exported.

Answer: D

Explanation:

If an imported form template appears outdated in Production, the most common cause is that the version exported from Test was not the latest published version. SAP Ariba's export/import process is version-specific; only the selected version at export time is moved. If the latest updates weren't published or exported, Production will receive an older version.

SAP does not auto-revert templates to previous versions during import, and missing parameter settings typically do not affect template versions. Production supports custom templates as long as metadata and versions align.

Proper version control, including publishing the latest template version in Test before export, is essential to avoid this issue.

NEW QUESTION # 48

A customer requests a dynamic list from CSV.

Which field type supports that?

- A. Hyperlink
- B. Computed Field
- C. Flex Master Data-based field
- D. Single-Select Enum

Answer: C

NEW QUESTION # 49

Which data elements are shared in a Suite-Integrated Environment? Note: There are 3 correct answers to this question.

- A. Suppliers
- B. Exception Types
- C. Users
- D. User Group mapping
- E. Supplier Catalogs

Answer: A,B,C

NEW QUESTION # 50

.....
