"Causal-comparative research is used to explore possible cause-and-effect relationships by observing existing differences among groups." Reference: Helwig, A. A. (2020). NEW QUESTION # 68

A counselor who provides services for severely depressed clients decides to take a vacation. Confident that counseling efforts have stabilized clients, the counselor concludes there is no need to provide client access to another helping professional while the counselor is away. This case illustrates unethical counselor behavior known as

- A. nonmaleficence.
- B. abandonment.
- C. faulty termination.

Answer: B

Explanation:

Abandonment occurs when a counselor ends a professional relationship with a client prematurely and without appropriate arrangements for ongoing care. Failure to do so is considered unethical and may endanger client welfare.
