Lpi LPIC Exam 303: Security, version 3.0 Sample Questions (Q70-Q75):

NEW QUESTION # 70

Which command is used to view the access control list of a file?

- A. ls
- B. getfacl
- C. chmod
- D. setfacl

Answer: B

NEW QUESTION # 71

What is the purpose of the Linux Audit system?

- A. To manage system log files
- **B. To detect intrusions and system changes**
- C. To automate host scans
- D. To manage installed packages

Answer: B

NEW QUESTION # 72

Which command installs and configures a new FreeIPA server, including all sub-components, and creates a new FreeIPA domain? (Specially ONLY the command without any path or parameters).

Solution: ipa-server-install

Determine whether the given solution is correct?

- A. Incorrect
- **B. Correct**

Answer: B

NEW QUESTION # 73

What is the purpose of a LUKS key slot?

- A. It defines the filesystem type used on the encrypted volume.
- B. It stores the device's UUID.
- C. It stores a copy of the encrypted data for redundancy.
- **D. It stores an encrypted copy of the master key, protected by a specific passphrase or keyfile, allowing multiple independent unlock methods.**

Answer: D

Explanation:

LUKS supports multiple key slots (typically up to eight), each of which stores an independently encrypted copy of the volume's master encryption key, protected by a different passphrase or keyfile. This allows multiple users or unlock methods to access the same encrypted volume without sharing a single passphrase, and allows a passphrase to be changed or revoked (by clearing its key slot) without needing to re-encrypt the entire underlying data, since the actual master key used to encrypt the data itself never changes.

NEW QUESTION # 74

Which of the following information, within a DNSSEC- signed zone, is signed by the key signing key?

- A. The RRSIG records of the zone.
- B. The non-DNSSEC records like A, AAAA or MX.
- **C. The zone signing key of the zone.**
- D. The DS records pointing to the zone.
- E. The NSEC or NSEC3 records of the zone.

Answer: C

NEW QUESTION # 75
