JN0-336 exam torrent & Juniper JN0-336 study guide - valid JN0-336 torrent

We try to offer the best JN0-336 exam braindumps to our customers. First of all, in order to give users a better experience, we have been updating the system of JN0-336 simulating exam to meet the needs of more users. After the new version appears, we will also notify the user at the first time. Second, in terms of content, we guarantee that the content provided by our JN0-336 Study Materials is the most comprehensive.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q29-Q34):

NEW QUESTION # 29

Which two statements are correct about a reth LAG? (Choose two.)

- A. Links must use the same cable type
- B. You must have a "minimum-links" statement value of two.
- **C. Links must have the same speed and duplex setting.**
- **D. You should have two or more interfaces.**

Answer: C,D

Explanation:

A reth LAG is a redundant Ethernet link aggregation group that combines multiple physical interfaces into a single logical interface in a chassis cluster. A reth LAG provides load balancing and redundancy for traffic within or between redundancy groups. Two statements that are correct about a reth LAG are:

Links must have the same speed and duplex setting: To form a reth LAG, the physical interfaces must have the same speed and duplex setting. This ensures that the links can operate at the same capacity and avoid performance issues or errors.

You should have two or more interfaces: To create a reth LAG, you need to have at least two physical interfaces. One interface should be connected to node 0 and the other interface should be connected to node 1. You can also have more than two interfaces in a reth LAG for increased bandwidth and redundancy.

NEW QUESTION # 30

You need to deploy an SRX Series device in your virtual environment. In this scenario, what are two benefits of using a cSRX? (Choose two.)

- A. The cSRX default configuration contains three default zones: trust, untrust, and management.
- **B. The cSRX has low memory requirements.**
- C. The cSRX supports Layer 2 and Layer 3 deployments.
- **D. The cSRX supports firewall, NAT, IPS, and UTM services.**

Answer: B,D

Explanation:

Two benefits of using a cSRX in your virtual environment are:

The cSRX supports firewall, NAT, IPS, and UTM services: The cSRX is a containerized version of the SRX Series firewall that runs as a Docker container on Linux hosts. It provides the same features and functionality as the SRX Series physical firewalls, such as firewall, NAT, IPS, and UTM services. The cSRX can protect your virtual workloads and applications from various threats and attacks.

The cSRX has low memory requirements: The cSRX is designed to be lightweight and efficient, with low memory and CPU requirements. The cSRX can run on as little as 1 GB of RAM and 1 vCPU, making it suitable for resource-constrained environments. Reference: = cSRX Overview, cSRX Container Firewall Datasheet

NEW QUESTION # 31

Which two statements are correct about SSL proxy server protection? (Choose two.)

- **A. You must load the server certificates on the SRX Series device.**
- **B. You do not need to configure the servers to use the SSL proxy the function on the SRX Series device.**
- C. You must import the root CA on the servers.
- D. The servers must be configured to use the SSL proxy function on the SRX Series device.

Answer: A,B

Explanation:

When using SSL proxy, the servers themselves do not require any special configuration to utilize the SSL proxy function on the SRX device. The SSL proxy operates transparently, intercepting and decrypting SSL/TLS traffic before it reaches the servers.

For the SSL proxy to function effectively, especially in server protection mode where it impersonates the server to the client, it is necessary to load the server's certificates onto the SRX device. This allows the SRX to establish a trusted connection with the client using the server's credentials.

NEW QUESTION # 32

Which statement about security policy schedulers is correct?

- A. When the scheduler is disabled, the policy will still be available.
- B. A policy can have multiple schedulers.
- C. A policy without a defined scheduler will not become active
- **D. Multiple policies can use the same scheduler.**

Answer: D

Explanation:

Schedulers can be defined and reused by multiple policies, allowing for more efficient management of policy activation and deactivation. This can be particularly useful for policies that need to be activated during specific time periods, such as business hours or maintenance windows.

NEW QUESTION # 33

You are asked to create an IPS-exempt rule base to eliminate false positives from happening.

Which two configuration parameters are available to exclude traffic from being examined? (Choose two.)

- A. source port
- B. destination port
- C. destination IP address
- D. source IP address

Answer: C,D

Explanation:

You can specify the source IP address or a range of IP addresses to exclude certain traffic originating from specific network segments or devices. This is useful for whitelisting traffic from known, secure sources that are otherwise triggering false positives in the IPS system.

Similarly, you can specify the destination IP address or a range of addresses to exclude traffic destined for particular network hosts or segments. This helps in reducing false positives for traffic directed towards trusted internal resources or specific external services that are known to be safe.

NEW QUESTION # 34

.....

If you prefer to practice JN0-336 exam dumps on paper, then our exam dumps is your best choice. JN0-336 PDF version is printable, and you can print them into hard one if you like, and you can also take some notes on them and practice them anytime and anyplace. Moreover, JN0-336 training materials cover most of knowledge points for the exam, and you can have a good command of the major knowledge points as well as improve your professional ability in the process of practicing. We offer you free update for 365 days for JN0-336 Exam Materials after purchasing. Our system will send the update version to you automatically.
