High-quality New TDA-C01 Exam Test Offer You The Best Valid Exam Materials | Tableau Certified Data Analyst

TDA-C01 training materials have now provided thousands of online test papers for the majority of test takers to perform simulation exercises, helped tens of thousands of candidates pass the TDA-C01 exam, and got their own dream industry certificates TDA-C01 exam questions have an extensive coverage of test subjects and have a large volume of test questions, and an online update program TDA-C01 Study Material has a high quality service team. First of all, the authors of study materials are experts in the field. They have been engaged in research on the development of the industry for many years, and have a keen sense of smell for changes in the examination direction.

Tableau TDA-C01 exam is a computer-based test that consists of multiple-choice questions. TDA-C01 exam is of moderate difficulty and is designed to test the candidate's understanding of Tableau's core concepts and features. TDA-C01 exam covers topics such as data connection, data blending, data analysis, and data visualization. TDA-C01 Exam is intended for individuals who have a basic understanding of data analysis and visualization and are looking to enhance their skills in the field.

Tableau Certified Data Analyst Sample Questions (Q29-Q34):

NEW QUESTION # 29

A Data Analyst at a coffee company has the following visualization already built.

The analyst wants to make this more visually appealing by coloring the bars based on whether they are above or below the Average Sales within each Product Type.

Which calculation should the analyst use to calculate the Average Sales for each Product Type?

- A. (FIXED [Product] : AVG((FIXED [Product Type] : AVG([Sales])))

- B. :**FIXED ([Product Type]) : AVG([FIXED [Product] : SUM([Sales])])**
- C. { EXCLUDE [Product] : SUM([Sales]) }
- D. { FIXED [Product Type] : AVG([Sales]) }

Answer: B

NEW QUESTION # 30

You have the following dataset.

□ Which formula calculates the percent difference in sales relative to the same quarter the previous year as shown in the Calculation field?

- A. (SUM ([Sales]) - LOOKUP (SUM ([Sales]), -4))
- B. **(SUM ([Sales]) - LOOKUP (SUM ([Sales]), -4)) / (LOOKUP (SUM ([Sales]), -4))**
- C. (ZN (SUM ([Sales])) - LOOKUP (ZN (SUM ([Sales])), -4))
- D. (SUM([Sales]) / (LOOKUP (SUM ([Sales]), -4))

Answer: B

Explanation:

The formula in option B calculates the percent difference in sales relative to the same quarter the previous year. It subtracts the sales of the same quarter from the previous year from the current year's sales, and then divides this by the previous year's sales. This gives a percentage change, which aligns with what is shown in the Calculation field of your dataset. The LOOKUP function returns the value of a specified offset from the current row in the partition. In this case, the offset is -4, which means the value of the same measure four rows above the current row. This corresponds to the same quarter of the previous year, assuming the data is sorted by quarter. Reference:

NEW QUESTION # 31

You plan to create a visualization that has a dual axis chart. The dual axis chart will contain a shape chart and a line chart will use the same measure named Population on the axis.

You need to configure be shapes to be much larger than the line.

What should you do?

- A. **Duplicate Population Drag the duplicate to the second Marks card and configure the size of the marks independently**
- B. For the second axis select Shape on the Marks card From Select Shape Palette select Custom and then select Reset
- C. Change Population to a discrete dimension
- D. Create a custom shape that is larger than the default shape and add the shape to the Shapes folder in My Repository

Answer: A

Explanation:

To configure the shapes to be much larger than the line, you need to duplicate Population and drag it to the second Marks card. This will create a dual axis chart with two measures on one axis. You can then select Shape on one Marks card and Line on another Marks card, and adjust the size of each mark independently using the Size slider or menu. Reference:

https://help.tableau.com/current/pro/desktop/en-us/multiplemeasures_dualaxes.htm https://help.tableau.com/current/pro/desktop/en-us/marks_markproperties_size.htm

NEW QUESTION # 32

You have the following map.

□ You need the map to appear as shown in the following visualization.

□ What should you do?

- A. Drag Location to Size on the Marks card
- B. Change the opacity to 75%
- C. Change the mark type to Map

- D. Drag Population to Size on the Marks card
- E. Change the mark type to Density

Answer: D

NEW QUESTION # 33

in which three formats can you export a worksheet from the Worksheet menu? Choose three

- A. .pptx
- B. .txt
- C. .xlsx
- D. .png
- E. .html
- F. .csv

Answer: A,C,D

Explanation:

Tableau provides various options to export data from a worksheet. The formats available are typically those that are best suited for visualization or further data analysis. The options include:

.png for exporting images of the visualizations

.xlsx for exporting data in a format that can be opened with Microsoft Excel

.pptx for creating PowerPoint presentations with the visualization embedded. These formats are designed to facilitate sharing and presenting the insights derived from Tableau visualizations, or for conducting further analysis in tools like Excel.

NEW QUESTION # 34

• • • • •

As the famous saying goes, time is life. Time is so important to everyone because we have to use our limited time to do many things. Especially for candidates to take the TDA-C01 exam, time is very precious. They must grasp every minute and every second to prepare for it. From the point of view of all the candidates, our TDA-C01 training quiz give full consideration to this problem. And we can claim that if you study our TDA-C01 study materials for 20 to 30 hours, you can pass the exam for sure.
