

C_BCBTP_2502 Exam Pdf Vce & C_BCBTP_2502 Exam Training Materials & C_BCBTP_2502 Study Questions Free

Exam Code: C_BCBTP_2502
 Total No. of Questions: 30
 Passing Percentage: 70
 Exam Duration: 60 Min

Positioning SAP Business Technology Platform as part of SAP Business Suite

Question 1

Which of the following can you do with SAP Datasphere? Note: There are 2 correct answers to this question.

- A. Create and consume in-memory caches
- B. Manage user accounts and authorizations
- C. Integrate data from different sources
- D. Provide a unified data and analytics platform

Answer C D

Positioning SAP Business Technology Platform as part of SAP Business Suite

Question 2

What are the main types of APIs commonly used in SAP BTP? Note: There are 2 correct answers to this question.

- A. SOAP APIs
- B. REST APIs
- C. FTP APIs
- D. RPC APIs

Answer A B

Positioning SAP Business Technology Platform as part of SAP Business Suite

Question 3

What are some of the SAP BTP commercial models? Note: There are 2 correct answers to this question.

- A. Modular Pricing
- B. Pay-As-You-Go
- C. Subscription
- D. Named User License

Answer B C

P.S. Free 2026 SAP C_BCBTP_2502 dumps are available on Google Drive shared by DumpsQuestion: <https://drive.google.com/open?id=19tITOS8SF2S8Gu5JqBDRHN-Hv6hkpNmD>

By imparting the knowledge of the C_BCBTP_2502 exam to those ardent exam candidates who are eager to succeed like you, they treat it as responsibility to offer help. So please prepare to get striking progress if you can get our C_BCBTP_2502 Study Guide with following steps for your information. With our C_BCBTP_2502 learning materials for 20 to 30 hours, we can claim that you will be confident to go to write your C_BCBTP_2502 exam and pass it.

SAP C_BCBTP_2502 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP's portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.

Topic 2	<ul style="list-style-type: none"> • Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.

Latest C_BCBTP_2502 Exam Dump Must Be a Great Beginning to Prepare for Your C_BCBTP_2502 Exam

All these three C_BCBTP_2502 real dumps formats contain the actual and updated SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite C_BCBTP_2502 exam questions that will surely repeat in the upcoming C_BCBTP_2502 exam and you can easily pass it with good scores. Today is the best time to learn new in-demand skills and upgrade your knowledge. Yes, you can do this easily. Just enroll in the SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite C_BCBTP_2502 Exam and start preparation with SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite C_BCBTP_2502 exam dumps. The updated, real, and verified SAP Dumps are ready for download. Just pay affordable SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite C_BCBTP_2502 exam dumps charges and get the exam dumps file in your mailbox and start DumpsQuestion C_BCBTP_2502 exam preparation.

SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Sample Questions (Q15-Q20):

NEW QUESTION # 15

Which SAP BTP product is critical for financial forecasting and analytics?

- A. SAP Fieldglass
- B. SAP Business Network
- C. SAP Ariba
- **D. SAP HANA Cloud**

Answer: D

Explanation:

For financial forecasting to be effective, it requires the ability to process massive amounts of historical and real-time data with extreme speed. SAP HANA Cloud is the critical foundational product on SAP BTP that enables this. As a cloud-native, in-memory database, it allows for the convergence of transactional (OLTP) and analytical (OLAP) processing. This means that finance teams can run complex forecasting models directly on live transactional data without the need for time-consuming data transfers to separate data warehouses.

In the context of the SAP Business Suite, SAP HANA Cloud acts as the "single source of truth." It provides the high-performance data engine required by tools like SAP Analytics Cloud to perform predictive modeling and "what-if" simulations. Whether a company is predicting cash flow, modeling market volatility, or performing year-end consolidations, HANA Cloud ensures that the underlying data is accessible and processed in sub-seconds. This capability is essential for modern finance departments that must move from descriptive analytics (what happened) to predictive and prescriptive analytics (what will happen and what should we do). While Ariba and Fieldglass provide the source data for procurement and contingent labor, it is SAP HANA Cloud that provides the computational power necessary to turn that data into strategic financial insights.

NEW QUESTION # 16

What is a key advantage of SAP BTP for enterprises?

- A. It eliminates on-premise deployments completely.
- B. It restricts integration to SAP-only applications.
- **C. It enables AI-driven process automation and decision-making.**
- D. It does not support low-code/no-code development.

Answer: C

Explanation:

A key advantage of SAP BTP is its ability to transform a standard "system of record" into an "intelligent enterprise" by enabling AI-driven process automation and decision-making. In the legacy SAP Business Suite environment, processes were often manual and reactive. By positioning BTP as the innovative extension layer, enterprises can now embed artificial intelligence and machine learning directly into their business workflows. This allows for the automation of high-volume, repetitive tasks-such as matching bank statements or verifying supplier invoices-while also providing intelligent recommendations for complex scenarios like demand forecasting or talent management.

Furthermore, this advantage extends to decision-making. By leveraging the advanced analytics and data management capabilities of BTP, business leaders gain access to real-time insights that were previously hidden in data silos. This shift from gut-based to data-driven decision-making allows enterprises to respond more agilely to market fluctuations. SAP BTP serves as the unified platform where developers and business users alike can leverage pre-built AI services to enhance the core functions of SAP S/4HANA, SuccessFactors, and other LoB solutions, ensuring that the enterprise remains competitive in a rapidly evolving digital economy.

NEW QUESTION # 17

How does SAP LeanIX enhance business IT governance when integrated with SAP BTP?

- A. By restricting governance frameworks to manual tracking.
- B. By eliminating enterprise architecture visualization.
- **C. By providing IT landscape analysis and risk management.**
- D. By preventing cloud-based integrations.

Answer: C

Explanation:

IT governance is often a challenge during rapid digital expansion. As more services are deployed on SAP BTP, maintaining a clear overview of the "who, what, and where" becomes critical. SAP LeanIX enhances business IT governance by providing a structured framework for IT landscape analysis and risk management. It acts as a "single source of truth" for the enterprise architecture, documenting all applications, their dependencies, and the business capabilities they support.

When integrated with SAP BTP, LeanIX helps organizations avoid "SaaS sprawl" (the unmanaged growth of cloud applications). It provides visibility into which BTP services are being used and identifies potential security risks, such as applications running on outdated versions or services that lack proper data privacy controls. This level of transparency is essential for compliance and cost management. By analyzing the

"Technical Fit" and "Business Fit" of the IT landscape, LeanIX allows executives to make informed decisions about decommissioning legacy systems and investing in new BTP-driven innovations. This strategic positioning ensures that the evolution of the SAP Business Suite is governed by data rather than guesswork, reducing operational risk and ensuring that the IT infrastructure is robust, secure, and fully aligned with the organization's long-term goals.

NEW QUESTION # 18

Why is SAP BTP considered a strategic platform for digital transformation?

- A. It provides a one-size-fits-all solution without customization options.
- B. It eliminates the need for external data management solutions.
- **C. It centralizes integration, automation, and data-driven decision-making.**
- D. It allows enterprises to move all workloads to SAP on-premise solutions.

Answer: C

Explanation:

SAP BTP is the strategic foundation for the "Intelligent, Sustainable Enterprise." Its primary value lies in its ability to centralize integration, automation, and data-driven decision-making into a single, unified platform. In a modern IT landscape, data is often fragmented across multiple cloud and on-premise systems.

BTP acts as the unified technical layer that breaks down these silos. By providing a common set of services for data management (SAP HANA Cloud), analytics (SAP Analytics Cloud), and integration (SAP Integration Suite), BTP ensures that business leaders have a holistic view of their operations.

Digital transformation requires more than just moving to the cloud; it requires the ability to innovate quickly.

BTP's strategic positioning allows businesses to extend their core SAP applications (like S/4HANA) using side-by-side extensions. This keeps the "core" clean and stable while allowing for rapid innovation at the edge. Furthermore, the platform's automation

capabilities (like SAP Build Process Automation) enable companies to optimize their workflows, reducing manual effort and increasing accuracy. By choosing BTP, enterprises are not just buying a set of tools; they are adopting a platform strategy that supports continuous improvement and agility, ensuring they can adapt to market changes more effectively than they could with fragmented, legacy architectures.

NEW QUESTION # 19

How does SAP LeanIX support IT landscape management when integrated with SAP BTP?

- A. By preventing real-time integration with business processes.
- B. By enforcing manual IT infrastructure tracking.
- C. By providing enterprise architecture visualization and analysis.
- D. By restricting governance of IT landscapes.

Answer: C

Explanation:

As organizations adopt SAP BTP to build and extend their applications, their IT landscapes can become increasingly complex. SAP LeanIX (now a core part of SAP's enterprise architecture strategy) supports management by providing comprehensive visualization and analysis of the enterprise architecture. When integrated with SAP BTP, LeanIX allows IT leaders to see exactly how different BTP services, cloud applications, and on-premise systems are interconnected. This "map" of the IT landscape is essential for identifying redundant applications, managing technical debt, and ensuring that the IT strategy aligns with business goals. The positioning of LeanIX alongside BTP is crucial for "Transformation Management." During a move to SAP S/4HANA or a transition to the cloud, LeanIX helps organizations plan their roadmap by showing the impact of changes on the existing architecture. It provides data-driven insights into which applications are critical, which are obsolete, and where there are gaps in security or compliance. By providing this transparency, LeanIX empowers architects to make informed decisions about where to deploy new BTP services. This prevents the "sprawl" of unmanaged cloud services and ensures that the evolution of the SAP Business Suite is organized, cost-effective, and fully aligned with the broader digital transformation objectives of the company.

NEW QUESTION # 20

.....

One of the key factors for passing the exam is practice. Candidates must use SAP C_BCBTP_2502 practice test material to be able to perform at their best on the real exam. This is why DumpsQuestion has developed three formats to assist candidates in their SAP C_BCBTP_2502 Preparation. These formats include desktop-based SAP C_BCBTP_2502 practice test software, web-based practice test, and a PDF format.
