

Practical Vce PVIP Format & Leader in Qualification Exams & High Pass-Rate Exam PVIP Review

VCE Physical Education - Units 3 and 4, 2019-2024

Sample teaching schedule

Unit 3 and 4

Unit 3 (Theoretical and testing for physical activity)

Week	Topic	Content
1	Introduction to Physical Education	Overview of the course, including the importance of physical activity for health and well-being.
2	Physical Activity and Health	Understanding the relationship between physical activity and health, including the benefits of regular exercise.
3	Physical Activity and Performance	Exploring the factors that influence physical performance, including fitness, technique, and mental preparation.
4	Physical Activity and Injury Prevention	Identifying common injuries in physical activity and strategies for preventing them.
5	Physical Activity and the Environment	Discussing the impact of the environment on physical activity and the role of physical education in promoting sustainable living.
6	Physical Activity and the Community	Exploring the role of physical education in promoting community health and well-being.
7	Physical Activity and the Future	Reflecting on the future of physical education and the role of physical activity in a healthy and active lifestyle.

Unit 4 (Practical and testing for physical activity)

Week	Topic	Content
1	Introduction to Physical Education	Overview of the course, including the importance of physical activity for health and well-being.
2	Physical Activity and Health	Understanding the relationship between physical activity and health, including the benefits of regular exercise.
3	Physical Activity and Performance	Exploring the factors that influence physical performance, including fitness, technique, and mental preparation.
4	Physical Activity and Injury Prevention	Identifying common injuries in physical activity and strategies for preventing them.
5	Physical Activity and the Environment	Discussing the impact of the environment on physical activity and the role of physical education in promoting sustainable living.
6	Physical Activity and the Community	Exploring the role of physical education in promoting community health and well-being.
7	Physical Activity and the Future	Reflecting on the future of physical education and the role of physical activity in a healthy and active lifestyle.

Exam PVIP Review - PVIP Dump File

To stay updated and competitive in the market you have to upgrade your skills and knowledge level. Fortunately, with the PV Installation Professional (PVIP) Board Certification (PVIP) certification exam you can do this job easily and quickly. To do this you just need to pass the PV Installation Professional (PVIP) Board Certification (PVIP) certification exam. The PV Installation Professional (PVIP) Board Certification (PVIP) certification exam is the top-rated and career advancement NABCEP PVIP certification in the market.

The PV Installation Professional Board Certification exam comprises both a computer-based knowledge exam and a hands-on, visual inspection and installation type exam. These exams assess an applicant's comprehension of fundamental PV principles, design concepts, as well as installation, commissioning, and troubleshooting of PV systems. The hands-on portion of the exam also assesses an applicant's ability to perform safe and correct installations and inspections of PV systems.

NABCEP PV Installation Professional (PVIP) Board Certification Sample Questions (Q78-Q83):

NEW QUESTION # 78

A PV output circuit requires a disconnecting means per NEC 690.13. Where must it be located?

- A. Within 10 feet of the array
- B. At the point of interconnection
- C. At the main service panel
- D. Within sight of the inverter

Answer: D

NEW QUESTION # 79

Which of the following tests measures axial uplift when performing load testing of driven-pile foundation members

- A. Resistance to horizontal movement
- B. Resistance to withdraw (pull-out) force
- C. Resistance to downward (Sinking force)
- D. Resistance to twisting

Answer: B

NEW QUESTION # 80

A homeowner is concerned that a 6kWdc PV system might be experiencing a performance issue. The homeowner has noticed what appears to be declining production. The installer analyzes the following data acquisition system (DAS) results for each year since the installation:

Month/Year	kWh produced	Peak sun hours measured
June 2014	750	150
June 2015	770	145
June 2016	710	145
June 2017	670	138
Dec 2014	225	45
Dec 2015	212	43
Dec 2016	255	50
Dec 2017	246	50

Given the data, which is the MOST likely conclusion to draw?

- A. The system has experienced above-average degradation and a module warranty claim should be explored.
- B. There is an intermittent inverter failure that is causing production to be lower than expected and the inverter should be repaired.
- C. There is a problem with the DAS because the peak sun hours do not correlate with production values and the das should be repaired.
- D. A combination of normal module degradation combined with cloudy weather has caused lower output in the past few years.

Answer: D

NEW QUESTION # 81

A homeowner is weighing the PV module options for a roof-mounted solar array. Which is a correct option to present to the

homeowner?

- A. Rapid shutdown requirements within 1 ft of the array boundary.
- B. Polycrystalline modules are more shade-tolerant than either amorphous or monocrystalline modules and allow a larger array to be installed, including in areas where shading could be seasonally problematic.
- **C. Microinverters can be installed with either polycrystalline or monocrystalline modules, negating the need for rapid shutdown compliance.**
- D. Building-integrated PV shingles will be flush or nearly flush with other shingles, but the electrical energy produced will be less than polycrystalline or monocrystalline modules.

Answer: C

NEW QUESTION # 82

A 15 kW system has a total derate factor of 0.90. After 5 years, output drops by 2% annually due to degradation. What is the AC output in year 5?

- A. 12.2 kW
- B. 11.5 kW
- **C. 12.9 kW**
- D. 13.5 kW

Answer: C

NEW QUESTION # 83
