First of all, we have the best and most first-class operating system, in addition, we also solemnly assure users that users can receive the information from the 300-430 certification guide within 5-10 minutes after their payment. Second, once we have written the latest version of the 300-430 certification guide, our products will send them the latest version of the 300-430 Test Practice question free of charge for one year after the user buys the 300-430 exam questions. Last but not least, our perfect customer service staff will provide users with the satisfaction in the hours.

Cisco Implementing Cisco Enterprise Wireless Networks Sample Questions

(Q51-Q56):

NEW QUESTION # 51

An engineer configures the wireless LAN controller to perform 802.1x user authentication. Which configuration must be enabled to ensure that client devices can connect to the wireless, even when WLC cannot communicate with the RADIUS?

- A. pre-authentication
- **B. local EAP**
- C. authentication caching
- D. Cisco Centralized Key Management

Answer: B

Explanation:

□

NEW QUESTION # 52

A Cisco WLC has been added to the network and Cisco ISE as a network device, but authentication is failing. Which configuration within the network device configuration should be verified?

- A. SNMP RO community
- B. device interface credentials
- C. device ID
- **D. shared secret**

Answer: D

Explanation:

When a Cisco Wireless LAN Controller (WLC) is added to Cisco ISE as a network device for authentication purposes, it is crucial to verify the shared secret configured within the network device settings. The shared secret is used to secure communication between the WLC and ISE, ensuring that the authentication messages are encrypted and authenticated. If the shared secret does not match on both the WLC and ISE, the authentication will fail.

NEW QUESTION # 53

Which component must be integrated with Cisco DNA Center to display the location of a client that is experiencing connectivity issues?

- A. Cisco Hyperlocation Module
- B. Cisco Connected Mobile Experiences
- C. Wireless Intrusion Prevention System
- **D. Cisco Mobility Services Engine**

Answer: D

Explanation:

The Cisco Mobility Services Engine (MSE) integrates with Cisco DNA Center to provide advanced location services, including the tracking of clients experiencing connectivity issues. This integration allows network administrators to visualize and troubleshoot client locations effectively. References: CCNP Enterprise Wireless Design ENWLSI 300-425 and Implementation ENWLSI 300-430 Official Cert Guide, which details the integration of location services within Cisco DNA Center.

NEW QUESTION # 54

An engineer is considering an MDM integration with Cisco ISE to assist with security for lost devices. Which two functions of MDM increase security for lost devices that access data from the network? (Choose two.)

- **A. data wipe**
- **B. Jailbreak/root detection**
- C. data encryption
- D. PIN enforcement

- E. data loss prevention

Answer: A,B

Explanation:

Mobile Device Management (MDM) integration with Cisco ISE increases security for lost devices by providing functions such as data wipe and jailbreak/root detection. Data wipe allows the remote erasure of sensitive information from lost devices, preventing unauthorized access.

Jailbreak/root detection helps identify compromised devices that may bypass standard security measures, ensuring that they do not access network resources.

NEW QUESTION # 55

An enterprise has two WLANs configured on WLC. It is reported that when converting APs to FlexConnect mode. WLAN A works but WLAN B does not. When converting APs to local mode. WLAN B works, but WLAN A does not. Which action is needed to complete this configuration?

- A. Disable local switching on the WLANs.
- B. Map the AP group to the WLAN interface.
- C. Create a Cisco FlexConnect group with WLAN-VLAN mapping.
- D. Join the APs to a Cisco FlexConnect group.

Answer: C

Explanation:

NEW QUESTION # 56

.....
