NEW QUESTION # 48
An SAP Fiori app isn't displaying on the SAP Fiori Launchpad even though the business role granting permission to the app is correctly assigned to the user.
How would you troubleshoot? Note: There are 3 correct answers to this question

- A. Check the business catalogues assigned to the role.
- B. Check the Role Maintenance app.
- C. Check the restrictions for the role.
- D. Check the business role template.
- E. Check the space and page(s) assigned to the role.

Answer: A,C,E

Explanation:
When an SAP Fiori app isn't displaying on the SAP Fiori Launchpad despite the user having the correct business role, several aspects need to be checked to troubleshoot the issue effectively:
* Check the restrictions for the role: It's essential to verify if there are any restrictions applied to the role that might prevent the app from being displayed. Restrictions can be based on various factors such as geographic location, department, or specific user attributes.
* Check the business catalogues assigned to the role: Business catalogues in SAP Fiori contain groups of apps related to specific business functions. If the necessary business catalogue is not assigned to the role, the app will not appear on the SAP Fiori Launchpad. Ensuring the correct assignment of catalogues is crucial for app visibility.
* Check the space and page(s) assigned to the role: With the introduction of spaces and pages in the SAP Fiori Launchpad, it's vital to ensure that the relevant space and page that should display the app are correctly assigned to the user's role. Spaces are higher-level groupings, while pages within those spaces contain the actual apps.
