## Salesforce-Media-Cloud考古題推薦 & Salesforce-Media-Cloud考題套裝

多年以來，Testpdf一直致力於為廣大參加IT認證考試的考生們提供最優秀並且最值得信賴的參考資料。關於IT認證考試的出題，Testpdf有著豐富的經驗。而且，Testpdf已經幫助過無數的考生，並得到了大家的信賴和表揚。所以，不要懷疑Testpdf的Salesforce-Media-Cloud考古題的品質了。這絕對是一個可以保證你通過Salesforce-Media-Cloud考試的資料。Testpdf向你保證考不過就全額退款。有了這個保證，你完全沒有必要再猶豫到底要不要買這個

考古題了。错过了它将是很大的损失。

## Salesforce Salesforce-Media-Cloud 考試大綱：

| 主題   | 簡介                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 主題 1 | <ul style="list-style-type: none"><li>Implement: This section of the exam measures skills of a Salesforce Solution Architect and focuses on implementing the Media Cloud solution based on business and technical requirements. It includes supporting CI</li><li>CD deployment processes, planning data migration with an understanding of the data model, selecting appropriate integration approaches for media-specific contexts, applying security settings to control data access, and ensuring performance outcomes align with defined KPIs and non-functional expectations.</li></ul>                                                                                 |
| 主題 2 | <ul style="list-style-type: none"><li>Discovery: This section of the exam measures the skills of a Salesforce Solution Architect and covers the ability to assess business and technical requirements for implementing Media Cloud applications. It includes determining the technical scope for a statement of work (SOW), mapping use cases to Salesforce Media Cloud components, understanding how third-party systems integrate with the Media Cloud ecosystem, outlining system flows based on the existing business environment, and identifying relevant non-functional requirements based on customer needs.</li></ul>                                                |
| 主題 3 | <ul style="list-style-type: none"><li>Design: This section of the exam measures the skills of a Salesforce Media Cloud Consultant and covers the process of designing scalable and efficient Media Cloud solutions. It focuses on creating solution flows using ASM capabilities, applying best practices in solution architecture, recommending product model and pricing strategies, and aligning designs with the Media Cloud data model. It also evaluates the candidate's ability to set up sharing and permission sets, identify integration points, assess reporting needs, and determine deployment strategies that fit within a CI</li><li>CD environment.</li></ul> |

## 最新的 Accredited Professional Certification Salesforce-Media-Cloud 免費考試真題 (Q27-Q32):

### 問題 #27

Users receive an "Apex CPU limit exceeded" error when running the Advertising Sales Management (ASM) flow OmniScript in a Salesforce Experience site. The OmniScript includes an Integration Procedure that contains multiple Data Raptors.

In which two areas within OmniStudio should a Consultant check to troubleshoot this issue?

Choose 2 answers

- A. DataRaptor Configuration
- B. OmniScript Debugger
- C. OmniStudio Logs
- D. Action Debugger

答案： B,C

解題說明：

Comprehensive and Detailed Explanation From Exact Extract:

To troubleshoot Apex CPU limit errors in OmniStudio, checking the OmniScript Debugger helps identify heavy operations in the flow. OmniStudio Logs provide detailed execution logs that can reveal inefficient or repeated processing. DataRaptor configurations could contribute to CPU use but are not directly traceable like logs and debugger tools. Action Debugger focuses on runtime user actions rather than script performance.

Salesforce CPU Limit Troubleshooting

[https://help.salesforce.com/s/articleView?id=sf.omnistudio\\_debugging.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.omnistudio_debugging.htm&type=5)

### 問題 #28

A customer needs to implement an automated Continuous Integration and Continuous Development (CI/CD) workflow where

developers will work on their own Developer orgs to configure different OmniScripts. The developers then need to migrate the changes they have done to a sandbox that will be used for testing before promoting changes to Production. Which tool should developers use to automate the migration of OmniStudio DataPacks and Salesforce metadata within the Media Cloud orgs?

- A. Data Loader
- B. IDX Workbench
- **C. IDX Build Tool**
- D. Backup and Restore Automation

**答案： C**

解題說明：

Comprehensive and Detailed Explanation From Exact Extract:

IDX Build Tool is the recommended tool for automating migration and deployment of OmniStudio DataPacks and metadata between Salesforce orgs, supporting CI/CD workflows. IDX Workbench is more manual, and Backup and Restore Automation and Data Loader do not support OmniStudio DataPacks.

#### 問題 #29

A Media Publisher is using Advertising Sales Management (ASM) to manage their B2B Ad Sales business. During the creation of a media plan, a Consultant wants to see analytical insights using the View Insights button on the Add and Configure Placements screen.

Which system should the Consultant use to achieve this?

- A. Custom Ad Server
- **B. Marketing Cloud Intelligence**
- C. Google Ad Manager
- D. Tableau

**答案： B**

解題說明：

Comprehensive and Detailed Explanation From Exact Extract:

Marketing Cloud Intelligence provides advanced analytical insights integrated into Media Cloud ASM, including the View Insights feature in media plan placement. This system offers cross-channel campaign performance data, which cannot be achieved through custom ad servers or GAM alone.

Reference:

Media Cloud ASM Analytics Integration

Marketing Cloud Intelligence Overview

[https://help.salesforce.com/s/articleView?id=sf.media\\_cloud\\_mci\\_integration.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.media_cloud_mci_integration.htm&type=5)

#### 問題 #30

A Media Cloud customer needs to integrate Google Ad Manager (GAM) with an existing middleware system using an integration procedure.

What is the most secure way for a Consultant to implement the authentication and credentialing requirements for the integration, while also minimizing customization?

- **A. Create a new authentication provider with custom metadata and use it within a named credential.**
- B. Create a remote action in the integration procedure that calls a custom Apex Class.
- C. Modification on integration procedure is not needed since this is through middleware and the existing named credential is not utilized.
- D. Implement a custom OAuth to authenticate with middleware, storing credentials in the integration procedure.

**答案： A**

解題說明：

Comprehensive and Detailed Explanation From Exact Extract:

Using a Named Credential with a custom Authentication Provider that stores client credentials in custom metadata ensures secure storage and easy maintenance. This reduces the need for custom OAuth flows in the integration procedure or Apex code, which increases complexity and maintenance.

Reference:

Salesforce Named Credentials and Auth Providers

Media Cloud GAM Integration Best Practices

[https://help.salesforce.com/s/articleView?id=sf.media\\_cloud\\_named\\_credential\\_auth.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.media_cloud_named_credential_auth.htm&type=5)

### 問題 #31

A Media Cloud customer is already running Advertising Sales Management (ASM) on an org and wants to upgrade from an older release to a newer release.

What should a Consultant do before migration?

- **A. Take a backup of any customized or modified older ASM components**
- B. Activate Custom Lightning Web Components and FlexCards
- C. Customize or modify the newer ASM components
- D. Take a backup of any newer ASM components

答案： A

解題說明：

Comprehensive and Detailed Explanation From Exact Extract:

Before migrating ASM to a newer release, it is crucial to take a backup of any customized or modified components in the existing (older) release to avoid losing customizations. Newer components should not be customized before migration. Activating new LWC and FlexCards is a post-migration step.
