

Arch-303 Practice Test Pdf & Arch-303 Actual Dump

Practice Tests and Answer Keys	
Practice Test	
Name _____	Date _____

① Which agency enforces food safety in a restaurant or foodservice operation?

- A Centers for Disease Control and Prevention
- B Food and Drug Administration
- C State or local regulatory authority
- D U.S. Department of Agriculture

② Three components of active managerial control include

- A Identifying risks, creating specifications, and training.
- B Identifying risks, corrective action, and training.
- C Identifying risks, creating purchase orders, and training.
- D Identifying risks, record keeping, and training.

③ A broken water main has caused the water in an operation to appear brown. What should the manager do?

- A Contact the local regulatory authority before use.
- B Use the water for everything except dishwashing.
- C Boil the water for 1 minute before use.
- D Use the water for everything except handwashing.

④ To prevent the deliberate contamination of food, a manager should know who is in the facility, monitor the security of products, keep information related to food security on file, and know

- A when to register with the EPA.
- B how to fill out an incident report.
- C where to find Safety Data Sheets in the operation.
- D whom to contact about suspicious activity.

⑤ A food handler who has just bused tables must do what before handling food?

- A Change apron
- B Wash hands
- C Put disposable gloves back on
- D Wipe hands on a cloth towel

⑥ As part of handwashing, food handlers must scrub their hands and arms for at least

- A 3 seconds.
- B 5 seconds.
- C 10 seconds.
- D 20 seconds.

Arch-303 Actual Dump, Reliable Arch-303 Test Book

Life is beset with all different obstacles that are not easily overcome. For instance, Arch-303 exams may be insurmountable barriers for the majority of population. However, with the help of our exam test, exams are no longer problems for you. The reason why our Arch-303 Training Materials outweigh other study prep can be attributed to three aspects, namely free renewal in one year, immediate download after payment and simulation for the software version.

Salesforce Certified B2C Commerce Architect Sample Questions (Q47-Q52):

NEW QUESTION # 47

An ecommerce site has dynamic shipping cost calculation. it allows the customers to see their potential shipping costs on the Product Detail Page before adding an item to the cart.

For this feature, shipping costs are calculated using the following logic:

- * Set the shipping method on the Basket
- * Add the item to the basket, calculate the basket total and get the shipping cost for this method
- * Remove the item from the Basket to restore the original state
- * The above process is repeated for each shipping method

During the testing it was discovered that the above code violates the `spi.basket.addResolveInSameRequest` quota.

What should the Architect do to resolve this issue and maintain the business requirement?

- A. Omit the removal of the Item and speed up the process for the customer by adding the product to the basket for them.
- B. Omit the calculation of shipping cost until the customer is ready to check out and has chosen the shipping method they want to
- C. Wrap each Individual step of the process its own transaction Instead of using one transaction for all steps.
- **D. Wrap the adding of product and shipping cost calculation in a transaction which is then rolled back to restore the original state**

Answer: D

Explanation:

To resolve the issue of violating the `spi.basket.addResolveInSameRequest` quota and to maintain the functionality of dynamically calculating shipping costs for items before they are added to the basket, the best approach is:

* Option D: Wrapping the adding of product and shipping cost calculation in a transaction, which is then rolled back to restore the original state. This method ensures that the system can calculate potential shipping costs without permanently altering the state of the basket. This approach keeps the basket's original state intact while allowing for multiple shipping calculations, effectively managing the load on system resources and adhering to platform quotas.

NEW QUESTION # 48

The Client identifies that a segment of customers need to see some products on the site that other customers should not be able to access. All products are maintained within one catalog but in separate categories. A custom attribute will be used on the Profile system object to identify customers that belong to this special segment. A customer group will be made that is qualified for by this Profile custom attribute. The storefront will be customized to include navigation to relevant categories for this customer group. Unfortunately during technical review the Client points out that the business teams have raised a concern with maintenance and want to use a shared navigation within the catalog and not use separate categories.

Which item should the Architect suggest to efficiently fulfil this new requirement while maintaining scalability?

- A. Customize the Storefront to use a hidden search refinement and modify the customer group to be qualified for by a new product custom attribute
- B. Customize the Storefront to use a hidden search refinement that if the user is in the customer group then the result includes those products with a new custom attribute.
- **C. Customize the Storefront to modify the search result that if the user is in the customer group then the result includes those products appropriately.**
- D. Customize the Storefront to use separate storefront catalogs with the same navigation that If the customer is in the customer group gets assigned products appropriately.

Answer: C

Explanation:

The optimal solution for this requirement is to modify the search results dynamically based on the user's customer group membership. This approach:

- * Ensures that all users can navigate the same catalog and categories without seeing separate categories for special segments.
- * Dynamically includes or excludes products from search results based on the user's membership in the special segment, effectively using existing catalog structures while personalizing product visibility.
- * Maintains scalability by leveraging existing catalog and category infrastructure without needing additional custom attributes for navigation purposes.

This method aligns with best practices for creating personalized customer experiences in B2C Commerce without complicating catalog management.

NEW QUESTION # 49

A new version of the Page Show controller is required for implementation of Page Designer specific look. It requires implementation of a specific, cache period for Page Designer pages, which is not currently available in the base Storefront Reference Architecture (SFRA) cache.js module. What two steps should the Architect instruct the developer to implement?
Choose 2 answers

- A. Create new Page.js controller in client's cartridge. Copy code from base and modify the Page-Show route to include the new cache middleware function.
- B. Create new cache.js in client's cartridge. Extend cache.js from app_storefront_base and add a function for the Page Designer caching.
- C. Create new Page.js controller in client's cartridge. Extend the code from base and prepend the new cache middleware function to Page-Show route.
- D. Create new cache.js in client's cartridge. Copy cache.js from app_storefront_base and add a function for the Page Designer caching.

Answer: A,B

Explanation:

To implement a specific cache period for Page Designer pages in SFRA:

* Option A involves creating a new Page.js controller in the client's cartridge, where the existing Page-Show route can be modified to include a custom caching logic. This ensures that the specific caching requirements for Page Designer pages are met without altering the base functionality for other pages.

* Option D calls for extending the existing cache.js module in the client's cartridge to include a function specifically for Page Designer caching. This allows for reusing the existing caching logic while adding enhancements specific to the Page Designer pages, thus maintaining efficiency and clarity in the codebase.

Both options provide a clean, maintainable approach to customizing caching for specific requirements in SFRA, avoiding disruptions in other areas of the site functionality.

NEW QUESTION # 50

Which two activities should an Architect encourage the replication team to follow based on S2C Commerce best practices?
Choose 2 answers

- A. Use the undo replication process to roll back code replications only, not data replications.
- B. Replicate the latest data to Production during periods of increased site use to ensure freshness.
- C. Use the undo replication process to roll back to the previous replication if necessary.
- D. Wait 15 minutes after the recreation process completes for the cache to clear automatically.

Answer: A,C

Explanation:

* Option A (Use the undo replication process to roll back to the previous replication if necessary):

This best practice ensures that if a replication introduces errors or issues, there is a way to quickly revert to a previous state without impacting the ongoing operations of the commerce site.

* Option C (Use the undo replication process to roll back code replications only, not data replications): Focusing undo operations on code replication rather than data ensures that functional issues caused by code changes can be quickly addressed without affecting the integrity or consistency of the data within the system.

These practices help maintain the stability and reliability of the production environment by providing mechanisms to manage and mitigate risks associated with updates and changes.

NEW QUESTION # 51

The Client is planning to switch to a new Payment Service Provider (PSP). They have approached an Architect to understand the time and effort to integrate the new PSP. The PSP offers a LINK cartridge compatible with SiteGenesis Pipelines, but the Client's website is built on Controllers.

Which two options should the Architect take into consideration before starting analysis? Choose 2 answers

- A. Look for a different PSP that supports controllers and would not require conversion efforts.
- B. Estimate the effort and risk to convert the LINK cartridge from pipelines to controllers.
- C. Produce a proof of concept converting the most essential pipelines into controllers and integrate the cartridge.
- D. Reach out to the PSP development team and ask if a new cartridge version that supports controllers is under development.

Answer: B,D

Explanation:

When integrating a new Payment Service Provider (PSP) LINK cartridge designed for SiteGenesis Pipelines into a site built on Controllers, consider these options:

* Option A (Estimate the effort and risk to convert the LINK cartridge from pipelines to controllers): Assessing the effort involved in converting the cartridge provides insight into the project scope, helping to manage risk and allocate resources effectively.

* Option B (Reach out to the PSP development team and ask if a new cartridge version that supports controllers is under development): This can potentially save significant development time and resources if a compatible version is already planned or in progress.

These approaches help in making an informed decision on integration strategies, balancing between customization efforts and leveraging existing solutions.

NEW QUESTION # 52

.....

These mock tests are specially built for you to assess what you have studied. These Salesforce Certified B2C Commerce Architect (Arch-303) practice tests are customizable, which means you can change the time and questions according to your needs. Taking practice exams teaches you time management so you can pass the Salesforce Certified B2C Commerce Architect (Arch-303) exam. DumpsMaterials's Arch-303 practice exam makes an image of a real-based examination which is helpful for you to not feel much pressure when you are giving the final examination.

Arch-303 Actual Dump: <https://www.dumpsmaterials.com/Arch-303-real-torrent.html>

Salesforce Arch-303 Practice Test Pdf About the updated versions, we will send them to you instantly within one year, so be careful with your mailbox, Salesforce Arch-303 Practice Test Pdf How can I get discounts, Our professional experts devote plenty of time and energy to developing the Arch-303 Actual Dump - Salesforce Certified B2C Commerce Architect update exam training, Now our Arch-303 exam cram review can give you some reference.

The three of them can put their heads together Arch-303 Practice Mock at any instant to jointly invent something better than any one of them could do, Overview of Server Functions, About the updated versions, Arch-303 we will send them to you instantly within one year, so be careful with your mailbox.
