## I27001F Exam Collection Pdf, I27001F Actual Dumps

Have you been many years at your position but haven't got a promotion? Or are you a new comer in your company and eager to make yourself outstanding? Our I27001F exam materials can help you. After a few days' studying and practicing with our products you will easily pass the I27001F examination. God helps those who help themselves. If you choose our study materials, you will find God just by your side. The only thing you have to do is just to make your choice and study our I27001F Exam Questions. Isn't it very easy? So know more about our I27001F study guide right now!

## CertiProf Certified ISO/IEC 27001:2022 Foundation Sample Questions (Q15-Q20):

### NEW QUESTION # 15

According to ISO/IEC 27001:2022, is it necessary to ensure that the Information Security Management System can achieve its intended results?

- **A. It is a requirement to be fulfilled**
- B. None of the above
- C. It is only an observation to keep in mind when auditing the management system
- D. It is a recommendation, but not a requirement

**Answer: A**

Explanation:

ISO/IEC 27001:2022 requires the organization to plan actions to address risks and opportunities so that the ISMS can achieve its intended outcomes, prevent or reduce undesired effects, and achieve continual improvement. This is a direct requirement of the standard and not optional guidance. Therefore, option B is the correct answer.

---

#### NEW QUESTION # 16

According to ISO/IEC 27001:2022, is it necessary to formulate an information security risk treatment plan?

- A. It is a requirement to be fulfilled
- B. None of the above
- C. It is only an observation to keep in mind when auditing the management system
- D. It is a recommendation, but not a requirement

**Answer: A**

Explanation:

ISO/IEC 27001:2022 requires the organization to define and apply an information security risk treatment process and to prepare a risk treatment plan. This is a mandatory requirement within clause 6 on planning.

The purpose of the plan is to define how identified information security risks will be treated, which controls will be selected, and how the treatment decisions will be implemented. Therefore, it is not optional guidance or an audit note, but a formal requirement. For that reason, option B is correct.

---

#### NEW QUESTION # 17

According to the terms and definitions associated with ISO 27001, authenticity is defined as:

- A. The ability to prove that a claimed event has occurred or that a claimed action was performed by the entities that originated it
- B. None of the above
- C. The property that an entity is what it claims to be
- D. The property of consistency in behaviour and intended results

**Answer: C**

Explanation:

In ISO information security terminology, authenticity means the property that an entity is what it claims to be.

This concept is distinct from non-repudiation, which relates to the ability to prove that an event or action occurred and cannot later be denied. It is also distinct from integrity, which concerns accuracy and completeness. Therefore, option B is correct.

#### NEW QUESTION # 18

What does ISO/IEC 27001:2022 require in order to evaluate information security performance and the effectiveness of the Information Security Management System?

- A. Information security tools to evaluate information security performance and system effectiveness
- B. The organization must determine what needs to be monitored and measured, including information security processes and controls
- C. A person designated by top management with expertise to evaluate information security performance and system effectiveness
- D. A consultancy to accurately perform the evaluation of information security performance and validate the effectiveness of the management system

**Answer: B**

Explanation:

ISO/IEC 27001:2022 requires the organization to determine what needs to be monitored and measured, including information security processes and controls, the methods for monitoring, measurement, analysis, and evaluation, when these activities will be performed, and when the results will be analyzed and evaluated.

The standard does not mandate a specific tool, consultant, or designated individual for compliance. Therefore, option C is the correct answer.

---

### NEW QUESTION # 19

Which statement describes a critical success factor for an Information Security Management System ISMS?

- A. Appointing at least two internal auditors for the information security system
- B. Performing a second-party audit
- C. Hiring an information security coordinator
- **D. Implementing a measurement system used to evaluate information security management performance and provide suggestions for improvement**

**Answer: D**

Explanation:

An effective ISMS depends on monitoring, measurement, analysis, and evaluation. ISO/IEC 27001:2022 requires the organization to determine what needs to be monitored and measured, how this will be done, and when the results will be analyzed and evaluated. A measurement system supports informed decision-making, demonstrates performance, and enables continual improvement. The other options may be useful in some organizations, but they are not critical success factors defined by the standard. Therefore, option B is the best answer.

---

### NEW QUESTION # 20

.....

In this cut-throat competitive world of CertiProf, the CertiProf I27001F certification is the most desired one. But what creates an obstacle in the way of the aspirants of the CertiProf I27001F certificate is their failure to find up-to-date, unique, and reliable Certified ISO/IEC 27001:2022 Foundation (I27001F) practice material to succeed in passing the CertiProf I27001F Certification Exam. If you are one of such frustrated candidates, don't get panic. 2Pass4sure declares its services in providing the real I27001F PDF Questions. It ensures that you would qualify for the Certified ISO/IEC 27001:2022 Foundation (I27001F) certification exam on the maiden strive with brilliant grades.
