

# 100% Pass 2026 Netskope NSK300: Authoritative Netskope Certified Cloud Security Architect Latest Exam Materials

BONUS!!! Download part of VCETorrent NSK300 dumps for free: [https://drive.google.com/open?id=1IOx08WJZVFW9HfzGZVaYp3\\_C48wtVhow](https://drive.google.com/open?id=1IOx08WJZVFW9HfzGZVaYp3_C48wtVhow)

What was your original intention of choosing a product? I believe that you must have something you want to get. NSK300 exam materials allow you to have greater protection on your dreams. This is due to the high passing rate of our NSK300 study questions which is high as 98% to 100%. And our NSK300 exam questions own a high quality which is easy to understand and practice. At the same time, our price is charming. Just come and buy it!

VCETorrent also offers a demo of the Netskope NSK300 exam product which is absolutely free. Up to 1 year of free Netskope Certified Cloud Security Architect (NSK300) questions updates are also available if in any case the sections of the Netskope NSK300 Actual Test changes after your purchase. Lastly, we also offer a full refund guarantee according to terms and conditions if you do not get success in the Netskope Certified Cloud Security Architect exam after using our NSK300 product.

## 100% Pass The Best Netskope - NSK300 Latest Exam Materials

we guarantee to you that our NSK300 study questions are of high quality and can help you pass the exam easily and successfully. Our NSK300 exam questions boosts 99% passing rate and high hit rate so you needn't worry that you can't pass the exam. Our NSK300 Exam Torrent is compiled by experts and approved by experienced professionals and updated according to the development situation in the theory and the practice. Our NSK300 guide torrent can simulate the exam and boosts the timing function.

### Netskope NSK300 Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	<ul style="list-style-type: none"> <li>• <b>Netskope Platform Troubleshooting:</b> This section of the exam measures the skills of Support Engineers and focuses on identifying and resolving common issues within the Netskope platform. It includes troubleshooting client connectivity problems, analyzing steering methods, resolving general connectivity concerns, and addressing SAML integration issues. The section ensures candidates can diagnose and fix issues that impact platform performance and user access.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Netskope Platform Implementation:</b> This section of the exam measures the abilities of Cloud Security Engineers and focuses on implementing the Netskope Security Cloud Platform using recommended steering architectures and deployment approaches. It includes key concepts such as API-enabled protection and real-time protection features, ensuring candidates understand how to deploy Netskope to secure cloud usage effectively within enterprise networks.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Netskope Platform Monitoring:</b> This section of the exam measures the capabilities of Security Operations Center (SOC) Analysts and focuses on monitoring the platform through reporting and analytics tools. It highlights how Netskope insights support visibility into user activity, cloud app behavior, and policy effectiveness to help organizations maintain a continuous cloud security posture.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Netskope Platform Management:</b> This section of the exam measures the skills of Security Administrators and covers essential administrative tasks required to manage the Netskope Security Cloud Platform. It includes managing DLP functions, handling identity integrations, and monitoring Netskope components to maintain platform stability. The domain ensures professionals can manage daily operations and maintain strong access, data, and security controls.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Cloud Security Solutions:</b> This section of the exam measures the skills of Cloud Security Analysts and covers the core components and functions of the Netskope Security Cloud Platform. It includes understanding how the platform integrates with enterprise environments, the deployment methods supported by Netskope, and the role of various microservices in delivering cloud-based security. The focus is on ensuring candidates can recognize how Netskope's architecture protects users, applications, and data across cloud services.</li> </ul>

## Netskope Certified Cloud Security Architect Sample Questions (Q35-Q40):

### NEW QUESTION # 35

What are three valid Instance Types for supported SaaS applications when using Netskope's API-enabled Protection? (Choose three.)

- A. Quarantine
- B. DLP Scan
- C. Forensic
- D. API Data Protection
- E. Behavior Analytics

**Answer: A,B,D**

Explanation:

When using Netskope's API-enabled Protection for supported SaaS applications, the valid instance types are:

API Data Protection (B): This type is used to connect to cloud apps using APIs to find sensitive content, enforce policy controls, and quarantine malware.

DLP Scan (D): This instance type involves scanning for data loss prevention, which is a key component of Netskope's API Data Protection.

Quarantine (E): This instance type allows for the isolation of potentially harmful or sensitive data until it can be reviewed or remediated.

Behavior Analytics and Forensic (A) are not listed as instance types for API-enabled Protection in the provided resources.

### NEW QUESTION # 36

You are implementing a solution to deploy Netskope for machine traffic in an AWS account across multiple VPCs. You want to deploy the least amount of tunnels while providing connectivity for all VPCs.

How would you accomplish this task?

- A. Use GRE tunnels from the AWS Transit Gateway.
- **B. Use IPsec tunnels from the AWS Transit Gateway.**
- C. Use GRE tunnels from the AWS Virtual Private Gateway
- D. Use IPsec tunnels from the AWS Virtual Private Gateway.

**Answer: B**

Explanation:

The best approach to deploy Netskope for machine traffic across multiple VPCs in an AWS account with the least amount of tunnels while providing connectivity for all VPCs is to use IPsec tunnels from the AWS Transit Gateway. This method allows you to use the same Site-to-Site VPN connection to Netskope for multiple VPCs, thus minimizing the number of tunnels required<sup>1</sup>. The AWS Transit Gateway acts as a network transit hub, enabling you to connect your VPCs and on-premises networks through a central point of management and control. Using IPsec tunnels with the AWS Transit Gateway ensures that all VPCs connected to it utilize the same IPsec tunnel between the transit gateway and Netskope POP<sup>1</sup>.

Detailed guidance on configuring IPsec VPN tunnels between your AWS Transit Gateway and Netskope POPs can be found in the Netskope Knowledge Portal<sup>1</sup>. Additionally, the Netskope Community Forum provides insights on setting up IPsec Tunnels for AWS egress traffic, which includes information relevant to deploying Netskope across multiple VPCs<sup>2</sup>.

### NEW QUESTION # 37

Review the exhibit.

You created an SSL decryption policy to bypass the inspection of financial and accounting Web categories. However, you still see banking websites being inspected.

Referring to the exhibit, what are two possible causes of this behavior? (Choose two.)

- **A. An incorrect action has been specified.**
- B. The policy is in a "disabled" state.
- C. An incorrect category has been selected
- **D. The policy is in a "pending changes" state.**

**Answer: A,D**

### NEW QUESTION # 38

Users in your network are attempting to reach a website that has a self-signed certificate using a GRE tunnel to Netskope. They are currently being blocked by Netskope with an SSL error. How would you allow this traffic?

- A. Set the No SNI setting in Netskope to Bypass.
- B. Ensure that the users add the self-signed certificate to their local certificate store.
- **C. Configure a Do Not Decrypt SSL Decryption rule to allow traffic to pass.**
- D. Configure a Real-time Protection policy with the action set to Allow.

**Answer: C**

Explanation:

To allow traffic from a website with a self-signed certificate that is being blocked by Netskope with an SSL error, the correct action is to configure a Do Not Decrypt SSL Decryption rule. This rule will allow the traffic to pass without being decrypted, thus bypassing the SSL error caused by the self-signed certificate. This is a common practice for handling traffic from trusted internal applications or specific external sites that use self-signed certificates<sup>1</sup>.

### NEW QUESTION # 39

You are already using Netskope CSPM to monitor your AWS accounts for compliance. Now you need to allow access from your company-managed devices running the Netskope Client to only Amazon S3 buckets owned by your organization. You must ensure that any current buckets and those created in the future will be allowed Which configuration satisfies these requirements?

- A. Steering: Cloud Apps Only, All Traffic Policy type: Real-time Protection Constraint: Storage. Bucket Does Not Match - ALLAccounts Action: Block
- B. Steering: All Web Traffic Policy type: API Data Protection  
Constraint: Storage, Bucket Does Match \*@myorganization.com Action: Allow
- C. Steering: Cloud Apps Only. All Traffic Policy type: Real-time Protection Constraint: Storage. Bucket Does Match - ALLAccounts Action: Allow
- D. Steering: Cloud Apps Only Policy type: Real-time Protection  
Constraint: Storage. Bucket Does Not Match \*@myorganization.com Action: Block

**Answer: A**

### NEW QUESTION # 40

.....

Since the NSK300 study quiz is designed by our professionals who had been studying the exam all the time according to the changes of questions and answers. Our NSK300 simulating exam is definitely making your review more durable. To add up your interests and simplify some difficult points, our experts try their best to simplify our NSK300 Study Material and help you understand the learning guide better.
