질문 # 301

You need to investigate the Vendor exclusion list issue.

What should you do?

- A. Navigate to the General tab, select Record Info, and then select Show all fields.
- B. Navigate to the Page options tab, select Record Info, and then select Show all fields.
- C. Navigate to the Options tab and select Database log.
- D. Navigate to the Options tab, select Record Info, and then select Show all fields.

정답: C

설명:

Scenario: A sales manager suspects a data-related issue in the vendor exclusion list. User1 must identify the user who created the referenced exclusion records.

Database logging is a feature in D365FO which helps us to track inserts, updates, and deletes on the intended tables provided if we are fine with the overhead of extra logging for every database operation on enabled tables.

질문 # 303

A company implements Dynamics 365 Finance and Dynamics 365 Supply Chain Management.

Customers place orders from the company website store or through sales representatives.

You create a Power Platform app to manage sales quotes for sales representatives who do not have direct access to the Finance and Supply Chain Management environment. The app must meet the following requirements:

- * Sales representatives must be able to create new customers.
- * Ensure that only approved products can be sold.
- * Be available when the sales representatives do not have internet access.

Web sales are imported nightly.

You need to determine a strategy to integrate apps.

What should you use? To answer, drag the appropriate options to the correct app features. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
