The IT Contact needs to eventually provide all project team members access to SAP Cloud ALM, but it's most important the partner and customer project managers are given access first, because they are responsible for setting up the implementation project and assigning tasks to the other project team members<sup>1</sup>. The project manager is a partner role that has the authorization to create and manage projects in SAP Cloud ALM<sup>2</sup>. References = Setting up the Implementation Project in SAP Cloud ALM, Teams, Roles, and Access Restrictions | SAP Help Portal In the context of SAP Cloud ALM (Application Lifecycle Management), the IT Contact is typically responsible for the initial setup and assignment of roles within the project. The first role to which the IT Contact often assigns access permission is:

\* Project manager: The project manager plays a crucial role in overseeing the SAP project's planning, execution, and completion. By assigning access permission to the project manager first, the IT Contact ensures that the project manager has the necessary tools and insights to manage the project effectively within SAP Cloud ALM.
