

Latest CyberArk CPC-CDE-RECERT Exam Topics, CPC-CDE-RECERT Valid Test Tips

BONUS!!! Download part of PDF4Test CPC-CDE-RECERT dumps for free: https://drive.google.com/open?id=1M_vIo4w6QPKk94sUpCKisLnZDz3S2tqu

Maybe you will find that the number of its CPC-CDE-RECERT test questions is several times of the traditional problem set, which basically covers all the knowledge points to be mastered in the exam or maybe you will find the number is the same with the real exam questions. You only need to review according to the content of our CPC-CDE-RECERT practice quiz, no need to refer to other materials. With the help of our CPC-CDE-RECERT study materials, your preparation process will be relaxed and pleasant.

Because our CPC-CDE-RECERT practice materials are including the best thinking from upfront experts with experience more than ten years. By using our CPC-CDE-RECERT study guide, your possibility of getting certificate and being success will increase dramatically and a series of benefits will come along in your life. So our CPC-CDE-RECERT real quiz is versatile and accessible to various exam candidates. Just trust us and you can get what you want for sure!

Unparalleled Latest CPC-CDE-RECERT Exam Topics | Amazing Pass Rate For CPC-CDE-RECERT Exam | Fantastic CPC-CDE-RECERT: CyberArk CDE-CPC Recertification

Preparing for the CyberArk CDE-CPC Recertification (CPC-CDE-RECERT) test can be challenging, especially when you are busy with other responsibilities. Candidates who don't use CPC-CDE-RECERT dumps fail in the CPC-CDE-RECERT examination and waste their resources. Using updated and valid CPC-CDE-RECERT Questions; can help you develop skills essential to achieve success in the CPC-CDE-RECERT certification exam.

CyberArk CDE-CPC Recertification Sample Questions (Q42-Q47):

NEW QUESTION # 42

In large-scale environments, it is important to enable the CPM to focus its search operations on specific Safes instead of scanning all Safes it sees in the Vault. How is this accomplished?

- A. Administration > Options > CPM Scanner.
- **B. AllowedSafes Parameter on each platform policy**
- C. Administration Options > CPM Settings
- D. MaxConcurrentConnection parameter on each platform policy

Answer: B

Explanation:

In large-scale environments, to enable the Central Policy Manager (CPM) to focus its search operations on specific Safes instead of scanning all Safes it sees in the Vault, the AllowedSafes parameter on each platform policy is used. This parameter can be configured within the platform settings in the CyberArk administration interface. By specifying safes in the AllowedSafes parameter, the CPM will only manage credentials within those designated safes, thereby optimizing performance and managing resources more efficiently by not scanning unnecessary safes. This setting is crucial for large environments where the CPM needs to be as efficient as possible due to the volume of managed accounts.

NEW QUESTION # 43

You plan to install the Privilege Cloud Connector on Windows Server 2019 and must leverage your existing RDS Per-user licenses for PSM connections. What must you do?

- A. Migrate the local PSMConnect users to Domain users.
- B. Install the RDS License Server Service on Windows 2016.
- C. Add the UseRDSPerUser=Yes line to the basic_psm.ini parameters file.
- D. Modify the UseRDSPerUser parameter to Yes on every Windows-related platform.

Answer: A

Explanation:

CyberArk documents that due to RDS licensing enforcement in Windows 2019/2022, Per-user licensing is not supported for local users, and (when Per-user CALs are required) you should move the built-in PSM application users (PSMConnect / PSMAdminConnect) from local to domain users.

Therefore, to leverage existing Per-user RDS licensing on Windows 2019 PSM servers, you must migrate the local PSM users to domain users # C.

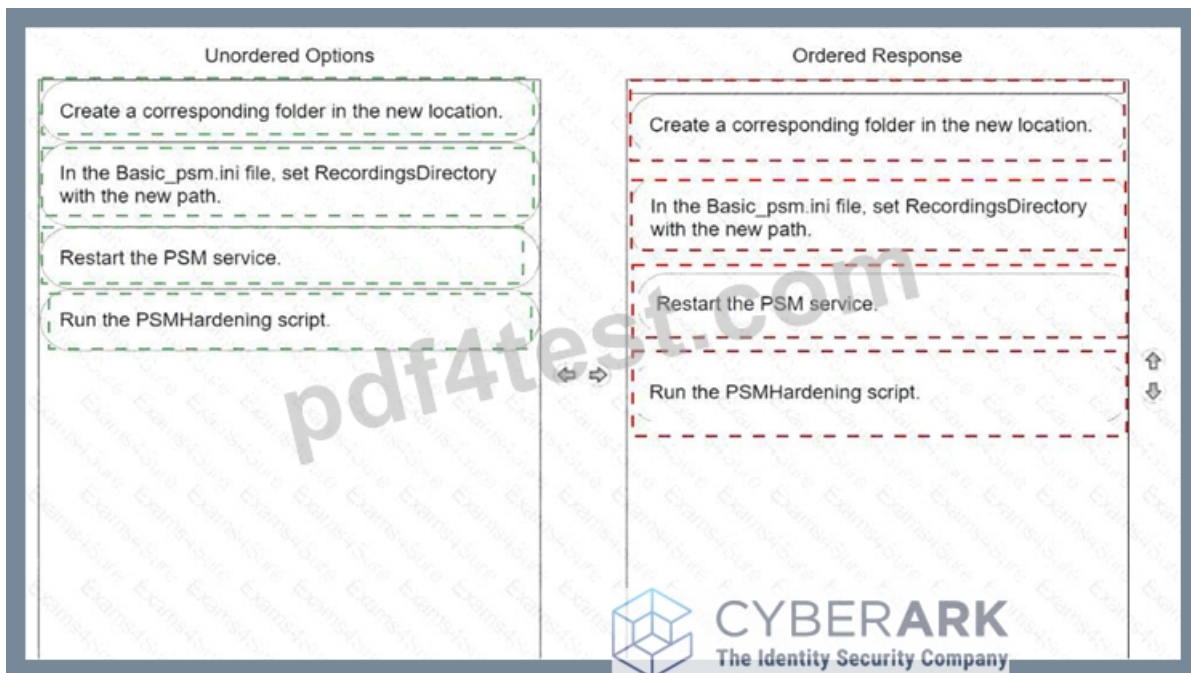

NEW QUESTION # 44

You want to change the default PSM recordings folder path on the Privilege Cloud Connector Arrange the steps to accomplish this in the correct sequence.

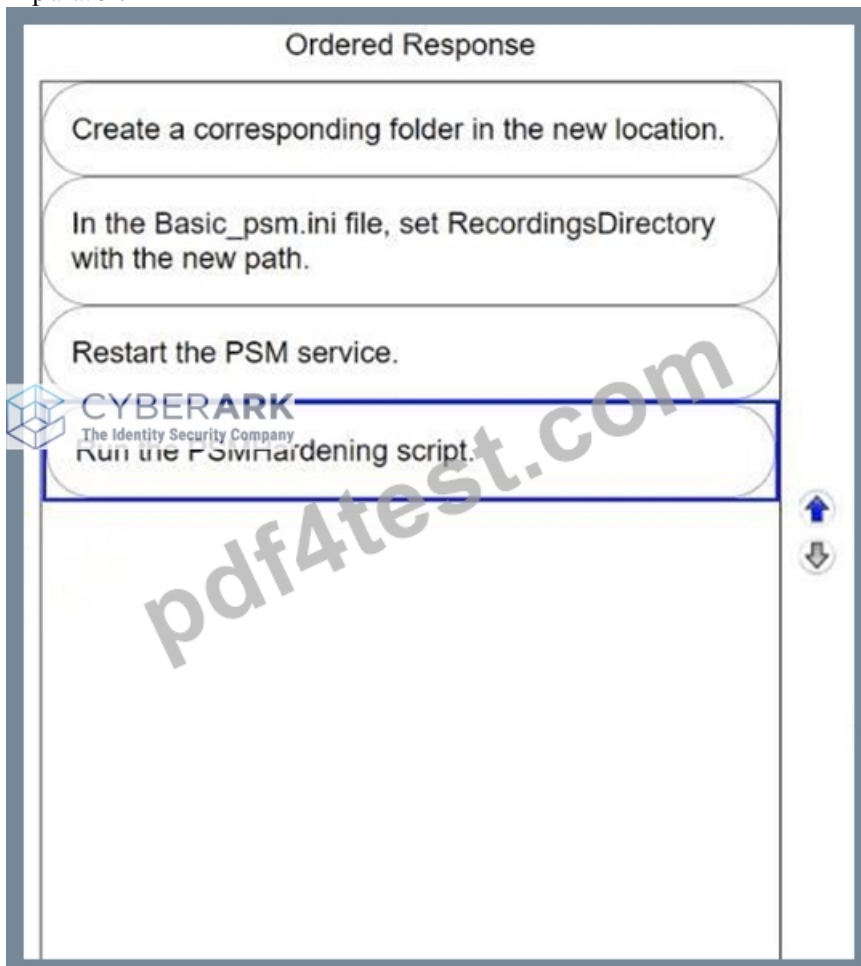

Unordered Options	Ordered Response
Create a corresponding folder in the new location.	
In the Basic_psm.ini file, set RecordingsDirectory with the new path.	
Restart the PSM service.	
Run the PSMHardening script.	

Answer:

Explanation:

Explanation:

- To correctly change the default PSM recordings folder path on the Privilege Cloud Connector, the sequence of steps should be:
- * Create a corresponding folder in the new location. Before making changes to configuration files, ensure the new directory for PSM recordings is created. This is where all session recordings will be stored moving forward.
 - * In the Basic_psm.ini file, set RecordingsDirectory with the new path. Update the Basic_psm.ini file to reflect the new path for the recordings. This step is crucial as it directs the PSM to start using the newly created directory for all future session recordings.
 - * Restart the PSM service. After updating the path in the configuration file, restart the PSM service to apply the changes. This ensures that all new sessions are recorded in the new specified location.
 - * Run the PSMHardening script. Once the service is restarted and the new settings are in place, run the PSMHardening script. This script ensures that all security measures are re-applied to the new recordings directory, maintaining the security integrity of the

session recordings.

Following these steps in the given order will successfully change the recording directory for PSM sessions on the Privilege Cloud Connector, ensuring a smooth transition to the new storage location with all necessary security measures intact.

NEW QUESTION # 45

When performing "In Domain" hardening of a PSM server, which steps are recommended? (Choose two.)

- **A. Apply GPO to the CyberArk PSM servers.**
- B. Configure AppLocker rules to block running unknown executables.
- C. Apply advanced audit on the PSM server.
- D. Import an INF file to the local machine.
- **E. Import CyberArk policy settings from the provided file into a new GPO.**

Answer: A,E

Explanation:

https://docs.cyberark.com/pam-self-hosted/latest/en/content/pas%20inst/install_psm_harden.htm#HardenInDomaindeployments

NEW QUESTION # 46

You need to map an enterprise's Active Directory to Privilege Cloud Shared Services to enable users to log in to CyberArk through their LDAP credentials. What do you need to accomplish this? (Choose two.)

- A. Configuration of a Federated Domain on the Identity Platform
- **B. Installation and configuration of the Identity Connector**
- C. Port 636 open to the Privilege Cloud back-end
- **D. Trusted certificate for LDAP server installed on Identity Connector**
- E. Read-only domain user to facilitate the LDAP mapping

Answer: B,D

Explanation:

CyberArk documents that to provision/authenticate users based on on-prem directory services using LDAP with Shared Services, you must first install the Identity Connector.

CyberArk also states LDAP communication to the Identity Connector is over TLS/SSL, and during the TLS handshake the LDAP server must present an X.509 certificate, meaning the connector must be able to trust the LDAP/LDAPS certificate chain (i.e., a trusted certificate on the connector side is required for LDAPS trust).

Therefore, the correct choices are B (Identity Connector) and D (trusted LDAP server certificate on the connector).

Why the other options are not correct as stated:

* C is wrong because LDAPS (636) is between the Identity Connector and the domain controllers /LDAP server, not "opened to the Privilege Cloud back-end" directly.

* E is not required for LDAP credential login; federated domains are used for federation/SSO use cases, while LDAP mapping is handled via the connector + LDAPS trust.

* A (read-only domain user) is commonly used as the Bind DN/service account, but in the Shared Services LDAP requirement set here, the two must-have items that CyberArk calls out for enabling this path are the Identity Connector and the LDAPS certificate trust.

NEW QUESTION # 47

.....

Another great way to assess readiness is the CyberArk CPC-CDE-RECERT web-based practice test. This is one of the trusted online CyberArk CPC-CDE-RECERT prep materials to strengthen your concepts. All specs of the desktop software are present in the web-based CyberArk CPC-CDE-RECERT Practice Exam.
