

# 퍼펙트한 ADA-C01 시험덤프 샘플덤프 샘플 다운로드

Amazon DOP-C01 AWS Certified DevOps Engineer - Professional 2

프록시를 소홀히 여긴 적이 없습니다. 이제 은행로워서 어찌지, 음, 만약 그녀와 고등의 계획이 실현되었다면 어떤 재앙이 돌아왔을지 추측할수록 높이는 척가 떨렸다.

그 파도가 다른 남자가 있었고, 그 남자가 동생이었다는 것도 그 파도가 지웠다. 개선해야 할 DOP-C01 퍼펙트 덤프 최신 데모게 답습니다. 오히려 더 글을 들어 올려 두 눈꺼풀을 살포시 감고 입술을 우축 내밀었다. 선을 긋고 싶은 건 그녀였다. 물론 오만해서 문제가 일어나기도 하지만 오만보다는 탐욕이 더 크거든.

### 최신 DOP-C01 퍼펙트 덤프 최신 데모 시험공부

무리하면 안 되는데, 그럴 마음에 드는 곳이라도 발견하셨습니까, DOP-C01 퍼펙트 덤프 최신 데모 기무실엔 가실 필요 없을 것 같은데요, 살펴서 그래. 살펴서, 하지만 중앙군은 이자를 죽일 생각이 없었다. 그래, 내 착각이었구나.

그리고 잠시 동안 아무 소리도 들리지 않았다. 썬 바르키라도 DOP-C01 합격보장 가능 인증덤프한 것처럼 붙잡아, 재연이 민환의 발을 듣는 등 마는 등 하자 민환이 의자를 바짝 당겨 가까이 왔다. 나 주말에 뭐 했게?

**AWS Certified DevOps Engineer - Professional 덤프 다운받기**

**NEW QUESTION 40**  
Which of the below 3 things can you achieve with the Cloudwatch logs service? Choose 3 options.

- A. Record API calls for your AWS account and delivers log files containing API calls to your Amazon S3 bucket
- B. Send the log data to AWS Lambda for custom processing or to load into other systems
- C. Stream the log data to Amazon Kinesis
- D. Stream the log data into Amazon Elasticsearch in near real-time with Cloud Watch Log subscriptions.

**Answer: B,C,D**

**Explanation:**  
You can use Amazon CloudWatch Logs to monitor, store, and access your log files from Amazon Elastic Compute Cloud (Amazon EC2) instances, AWS CloudTrail, and other sources. You can then retrieve the associated log data from CloudWatch Logs.  
For more information on Cloudwatch logs, please visit the below URL  
\* <http://docs.aws.amazon.com/AmazonCloudWatch/latest/logs/WhatIsCloudWatchLogs.html>

**NEW QUESTION 41**  
A DevOps Engineer encountered the following error when attempting to use an AWS CloudFormation template to create an Amazon ECS cluster:  
An error occurred (InsufficientCapabilitiesException) when calling the CreateStack operation. What caused this error and what steps need to be taken to allow the Engineer to successfully execute the AWS CloudFormation template?

- A. CloudFormation is not capable of fulfilling the request of the specified resources in the current AWS Region. The Engineer needs to specify a new region and rerun the template.
- B. The CloudFormation execution was not granted the capability to create IAM resources. The

아직도 Snowflake ADA-C01 인증시험을 어떻게 패스할지 고민하시고 계십니까? Itcertkr는 여러분이 Snowflake ADA-C01 덤프자료로 Snowflake ADA-C01 인증시험에 응시하여 안전하게 자격증을 취득할 수 있도록 도와드립니다. Snowflake ADA-C01 시험가이드를 사용해보지 않으실래요? Itcertkr는 여러분께 Snowflake ADA-C01 시험패스의 편리를 드릴 수 있다고 굳게 믿고 있습니다.

## Snowflake ADA-C01 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"><li>• Account Management and Data Governance: This section of the exam measures the skills of Data Governance Managers and Database Administrators and covers account organization, access control, and regulatory data protection. Candidates will learn how to manage organizational accounts, encryption keys, and Tri-Secret Secure implementations. It focuses on applying best practices in ORGADMIN and ACCOUNTADMIN roles, implementing masking and row access policies, and performing data classification and tagging. The domain also emphasizes data auditing, account identifiers, and effective management of tables, views, and query operations to support enterprise-wide governance standards.</li></ul>

주제 2	<ul style="list-style-type: none"> <li>• Snowflake Security, Role-Based Access Control (RBAC), and User Administration: This section of the exam measures the skills of Snowflake Administrators and Cloud Security Engineers and covers authentication, access control, and network management in Snowflake. Candidates must understand how to configure authentication methods such as SSO, MFA, OAuth, and key-pair authentication, and how to manage network policies and private connectivity. The domain also tests knowledge of user and role management using SCIM, designing access control architecture, and applying the RBAC framework to ensure secure user authorization and data protection within Snowflake environments.</li> </ul>
주제 3	<ul style="list-style-type: none"> <li>• Disaster Recovery, Backup, and Data Replication: This section of the exam measures the skills of Disaster Recovery Engineers and Cloud Operations Managers and covers Snowflake methods for ensuring business continuity. Candidates must understand how to replicate databases and account-level objects, implement failover strategies, and perform backup and restoration through Time Travel and Fail-safe features. The domain emphasizes replication across accounts, handling data consistency during failover, and applying cost-efficient disaster recovery strategies to maintain availability during outages or regional failures.</li> </ul>
주제 4	<ul style="list-style-type: none"> <li>• Data Sharing, Data Exchange, and Snowflake Marketplace: This section of the exam measures the skills of Data Integration Specialists and Data Platform Administrators and covers managing and implementing data-sharing solutions within Snowflake. It evaluates understanding of data sharing models across regions and clouds, secure data sharing methods, and managing provider-consumer relationships. The domain also includes the use of Snowflake Data Exchange and Marketplace to publish, consume, and manage data listings, ensuring secure collaboration and efficient data monetization.</li> </ul>
주제 5	<ul style="list-style-type: none"> <li>• Performance Monitoring and Tuning: This section of the exam measures the skills of Cloud Infrastructure Engineers and Performance Analysts and focuses on optimizing Snowflake compute and storage resources. Candidates will need to understand how to configure and manage virtual warehouses, evaluate query profiles, and apply caching and clustering strategies for performance tuning. It also includes monitoring concurrency, resource utilization, and implementing cost optimization strategies. The ability to interpret, explain plans, apply search optimization, and manage cost controls is key for maintaining efficient Snowflake environments.</li> </ul>

## ADA-C01유효한 덤프자료 & ADA-C01시험대비덤프

Itcertkr의Snowflake ADA-C01덤프는 레알 시험의 모든 유형을 포함하고 있습니다.객관식은 물론 드래그앤드랍,시물 문제등 실제시험문제의 모든 유형을 포함하고 있습니다. Snowflake ADA-C01덤프의 문제와 답은 모두 엘리트한 인 증강사 및 전문가들에 의하여 만들어져Snowflake ADA-C01 시험응 시용만이 아닌 학습자료용으로도 손색이 없는 덤프입니다.저희 착한Snowflake ADA-C01덤프 데려가세용~!

## 최신 SnowPro Advanced: Administrator ADA-C01 무료샘플문제 (Q61-Q66):

### 질문 # 61

A company enabled replication between accounts and is ready to replicate data across regions in the same cloud service provider.

The primary database object is : PROD\_AWS\_EAST. Location : AWS\_EAST

The secondary database object is : PROD\_AWS\_WEST. Location : AWS\_WEST

What command and account location is needed to refresh the data?

- A. Location : AWS EAST  
Command: ALTER DATABASE PROD\_AWS\_WEST REFRESH;
- B. Location : AWS\_WEST  
Command : REFRESH DATABASE PROD\_AWS WEST REFRESH;
- C. Location : AWS\_WEST  
Command : ALTER DATABASE PROD AWS WEST REFRESH;
- D. Location : AWS\_EAST  
Command : REFRESH DATABASE PROD\_AWS\_WEST REFRESH;

**정답: B**

**설명:**

The REFRESH DATABASE command is used to refresh a secondary database with the latest data and metadata from the primary database<sup>1</sup>. The command must be executed in the target account where the secondary database resides<sup>2</sup>. Therefore, the answer is A, as the location is AWS\_WEST and the command is REFRESH DATABASE PROD\_AWS\_WEST REFRESH. The other options are incorrect because they either use the wrong location, the wrong command, or the wrong database name.

#### 질문 # 62

An Administrator receives data from a Snowflake partner. The partner is sharing a dataset that contains multiple secure views. The Administrator would like to configure the data so that only certain roles can see certain secure views. How can this be accomplished?

- A. Clone the data and insert it into a company-owned share and apply the desired RBAC on the new tables.
- **B. Create views over the incoming shared database and apply the desired RBAC onto these views.**
- C. Apply RBAC directly onto the partner's shared secure views.
- D. Individually grant imported privileges onto the schema in the share.

**정답: B**

**설명:**

Explanation

According to the Snowflake documentation<sup>1</sup>, secure views are only exposed to authorized users who have been granted the role that owns the view. Therefore, applying RBAC directly onto the partner's shared secure views (option A) is not possible, as the administrator does not own those views. Individually granting imported privileges onto the schema in the share (option B) is also not feasible, as the privileges granted on the schema do not apply to existing secure views, only to future ones<sup>2</sup>. Cloning the data and inserting it into a company-owned share (option C) is not recommended, as it would create unnecessary duplication of data and increase storage costs. The best option is to create views over the incoming shared database and apply the desired RBAC onto these views (option D). This way, the administrator can control the access to the data based on the roles in their account, without modifying the original data or views from the partner.

#### 질문 # 63

Which type of listing in the Snowflake Marketplace can be added and queried immediately?

- A. Personalized listing
- B. Monetized listing
- C. Regional listing
- **D. Standard listing**

**정답: D**

**설명:**

Explanation

According to the Snowflake documentation<sup>1</sup>, a standard listing is a type of listing that provides free access to the full data product, with no payment required. A standard listing can be added and queried immediately by the consumer, as long as they accept the terms and conditions of the listing. A monetized listing is a type of listing that charges for access to the data product, using the pricing models offered by Snowflake. A monetized listing requires the consumer to provide payment information and agree to the billing terms before accessing the data product. A regional listing is not a type of listing, but a way to specify the regions where the listing is available. A personalized listing is a type of listing that provides limited trial access to the data product, with unlimited access to the full data product available upon request. A personalized listing requires the consumer to request access from the provider and wait for the provider to grant access before accessing the data product.

Therefore, the only type of listing that can be added and queried immediately is the standard listing.

#### 질문 # 64

An Administrator needs to implement an access control mechanism across an organization. The organization users access sensitive customer data that comes from different regions and needs to be accessible for Analysts who work in these regions. Some Analysts need very specific access control depending on their functional roles in the organization. Following Snowflake recommended

practice, how should these requirements be met? (Select TWO).

- A. Implement row access policies and Dynamic Data Masking policies.
- B. Implement views on top of base tables that exclude or mask sensitive data.
- C. Include masking rules as part of data ingestion and transformation pipelines.
- D. Use a third-party tool to share the data.
- E. Use zero-copy cloning to replicate the database schema and provide access as needed.

정답: A,B

#### 질문 # 65

A Snowflake Administrator wants to create a virtual warehouse that supports several dashboards, issuing various queries on the same database.

For this warehouse, why should the Administrator consider setting AUTO\_SUSPEND to 0 or NULL?

- A. To keep the data cache warm to support good performance of similar queries
- B. To keep the query result cache warm for good performance on repeated queries
- C. To save costs by running the warehouse as little as possible
- D. To save costs on warehouse shutdowns and startups for different queries

정답: A

설명:

Explanation

According to the Snowflake documentation<sup>1</sup>, the AUTO\_SUSPEND property specifies the number of seconds of inactivity after which a warehouse is automatically suspended. If the property is set to 0 or NULL, the warehouse never suspends automatically. For a warehouse that supports several dashboards, issuing various queries on the same database, setting AUTO\_SUSPEND to 0 or NULL can help to keep the data cache warm, which means that the data used by the queries is already loaded into the warehouse memory and does not need to be fetched from the storage layer. This can improve the performance of similar queries that access the same data. Option A is incorrect because setting AUTO\_SUSPEND to 0 or NULL does not save costs on warehouse shutdowns and startups, but rather increases the costs by keeping the warehouse running continuously. Option B is incorrect because setting AUTO\_SUSPEND to 0 or NULL does not run the warehouse as little as possible, but rather runs the warehouse as much as possible. Option D is incorrect because setting AUTO\_SUSPEND to 0 or NULL does not affect the query result cache, which is a separate cache that stores the results of previous queries for a period of time. The query result cache is not dependent on the warehouse state, but on the query criteria<sup>2</sup>.

#### 질문 # 66

.....

Snowflake인증ADA-C01시험을 위하여 최고의 선택이 필요합니다. Itcertkr 선택으로 좋은 성적도 얻고 하면서 저희 선택을 후회하지 않을것니다.돈은 적게 들고 효과는 아주 좋습니다.우리Itcertkr여러분의 응시분비에 많은 도움이 될뿐만 아니라Snowflake인증ADA-C01시험은 또 일년무료 업데이트서비스를 제공합니다.작은 돈을 투자하고 이렇게 좋은 성과는 아주 바람직하다고 봅니다.
