

Express Greetings to a Useful Future by Getting Nutanix NCP-MCI-6.10 Dumps

BONUS!!! Download part of Itcerttest NCP-MCI-6.10 dumps for free: https://drive.google.com/open?id=1Wl_Hkfq1i7hgedUQdTMj4tvmdW3X7ocA

All of our NCP-MCI-6.10 pdf torrent are up-to-date and reviewed by our IT experts and professionals. We have written our NCP-MCI-6.10 study guide in such a way that you don't need to prepare anything else after practice our NCP-MCI-6.10 Exam Questions. You can pass the real exam easily with our latest NCP-MCI-6.10 vce dumps and this is the only smartest way to get success. Just contact us if you have any questions.

Nutanix NCP-MCI-6.10 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Configure Disaster Recovery and Data Protection within a Nutanix Multicloud Environment: This section of the exam measures the skills of Disaster Recovery Specialists and Cloud Engineers and covers configuring protection policies and domains for data security and recovery. Candidates need to identify the right entities for protection, schedule backups, define retention policies, and set up replication to remote sites. Recovery plans must be configured and executed with proper scripting, network mapping, and failover strategies. Metro replication requires understanding failover methodologies, comparing solutions on different hypervisors, and preventing split-brain scenarios. Effective disaster recovery planning ensures minimal downtime and data integrity across environments.
Topic 2	<ul style="list-style-type: none">• Troubleshoot a Nutanix Multicloud Environment: This section of the exam measures the skills of Technical Support Engineers and IT Operations Specialists and covers diagnosing and resolving common issues within a Nutanix multi-cloud environment. Troubleshooting protection policies and recovery plans requires identifying network mapping failures, vNIC issues, script execution problems, and connectivity failures. Metro replication troubleshooting involves addressing naming conventions, network limitations, and replication states. Security issues in AOS and Prism Central must be resolved by managing CVM communications, security warnings, and log analysis. LCM operations require diagnosing failures in inventory updates and version upgrades. Performance troubleshooting involves analyzing logs, reading performance charts, and adjusting VM configurations to meet performance needs.
Topic 3	<ul style="list-style-type: none">• Conduct Custom Monitoring within a Nutanix Multicloud Environment: This section of the exam measures the skills of Cloud Analysts and Systems Engineers and covers custom monitoring for optimized performance management. Candidates must analyze performance charts, set retention policies, create custom service level agreements (SLAs), and manage storage based on policies. Creating reports involves identifying the required type, selecting generation frequency, determining retention properties, and customizing report formats for different monitoring needs. Effective monitoring ensures better resource utilization, system efficiency, and proactive issue resolution within the multi-cloud environment.

Topic 4	<ul style="list-style-type: none"> • Manage VMs within a Nutanix Multicloud Environment: This section of the exam measures the skills of Cloud Administrators and Virtualization Engineers and covers managing virtual machines (VMs) within a Nutanix multicloud environment. It includes creating and updating VMs by determining hardware requirements, boot modes, sizing, and configuration based on application needs. Candidates must understand how to deploy VMs using templates, snapshots, and image configurations, ensuring the correct formats for importing and exporting VMs. Migration processes require knowledge of prerequisites, storage, network settings, and software compatibility. Additionally, configuring VM categories and attributes is essential for proper organization and management within the environment, ensuring alignment with labels, storage policies, and security settings.
Topic 5	<ul style="list-style-type: none"> • Manage Clusters within a Nutanix Multicloud Environment: This section of the exam measures the skills of Infrastructure Engineers and Systems Administrators and covers the administration of Nutanix clusters. Storage management includes creating, reading, updating, and deleting storage containers and volume groups. Configuring AOS and Prism Central settings involves authentication, SSL certificate management, IAM role-based access control, and configuring network segmentation. Network administration procedures focus on creating VLAN-backed subnets, virtual switches, and load-balancing policies while monitoring NIC usage. Lifecycle management includes performing hardware and software updates and maintaining firmware. Hardware maintenance involves adding or removing nodes and physical disks while ensuring proper upgrades and replacements. Intelligent operations require configuring capacity policies, discovering application relationships, and simulating scenarios to optimize performance.

Real Hot NCP-MCI-6.10 Spot Questions, Best NCP-MCI-6.10 Study Material

No matter how good the product is users will encounter some difficult problems in the process of use. Our NCP-MCI-6.10 real exam materials are not exceptional also, in order to enjoy the best product experience, as long as the user is in use process found any problem, can timely feedback to us, for the first time you check our NCP-MCI-6.10 Exam Question performance, professional maintenance staff to help users solve problems. Our NCP-MCI-6.10 learning reference files have a high efficient product maintenance team, and they can send the NCP-MCI-6.10 exam questions to you in a few minutes.

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) Sample Questions (Q167-Q172):

NEW QUESTION # 167

An administrator needs to create a single chart showing multiple storage bandwidth metrics a VM is consuming. Which type of chart should the administrator create?

- A. Metric Chart
- B. VM Summary Chart
- **C. Entity Chart**
- D. Hypervisor Performance Chart

Answer: C

Explanation:

Entity Charts in Nutanix Prism Central allow multiple metrics from a single entity (e.g., VM, storage container) to be displayed on a single graph.

* Option B (Entity Chart) is correct:

* This allows the administrator to track multiple performance metrics (e.g., read/write bandwidth, IOPS) for a specific VM.

* Option A (Metric Chart) is incorrect:

* Metric Charts track a single metric across multiple entities, which does not meet the requirement of displaying multiple metrics for a single VM.

* Option C (Hypervisor Performance Chart) is incorrect:

* Hypervisor Performance Chart tracks host-level metrics, not VM-specific bandwidth metrics.

* Option D (VM Summary Chart) is incorrect:

* VM Summary Chart only provides an overview and does not support custom multi-metric tracking

References:

- * Nutanix Prism Central Guide#Entity vs. Metric Charts for Performance Analysis
- * Nutanix KB#Creating Custom Charts in Prism Central

NEW QUESTION # 168

An administrator needs to optimize a VM's storage by leveraging compression features. The VM's vDisks are currently stored in a default storage container with no optimizations enabled.

How should the administrator proceed?

- A. Migrate the VM to the Production storage container.
- B. Recreate the VM in the Production storage container and copy data.
- **C. Migrate vDisks to the Production storage container.**
- D. Recreate the vDisk in the Production storage container and copy data.

Answer: C

Explanation:

Moving vDisks to a storage container with compression enabled ensures better data efficiency without downtime.

- * Option A (Migrate vDisks) is correct:
- * vDisk migration is non-disruptive and allows compression settings to be applied dynamically.
- * Option B (Recreate the VM) is incorrect:
- * Rebuilding the VM is unnecessary and would cause downtime.
- * Option C (Migrate the VM) is incorrect:
- * VM migration does not guarantee that only vDisks move, and it may disrupt performance.
- * Option D (Recreate vDisk) is incorrect:
- * This method is manual and time-consuming, while Nutanix provides an automated approach.

References:

- * Nutanix Storage Optimization Guide#Enabling Compression on Existing vDisks
- * Nutanix KB#Migrate vDisks Between Storage Containers for Optimization

NEW QUESTION # 169

An administrator is configuring a replication schedule on multiple remote locations deployed using a single-node cluster. The goal is to achieve the lowest possible RPO (Recovery Point Objective).

How should the administrator configure the replication schedule?

- A. Configure Async replication.
- B. Configure a schedule for 16 minutes up to 59 minutes.
- C. Configure NearSync replication.
- **D. Configure a schedule for 1 minute up to 15 minutes.**

Answer: D

Explanation:

Nutanix NearSync replication provides the lowest RPO (as low as 1 minute) and is the best option for minimizing data loss in DR scenarios.

- * Option D (Configure a schedule for 1 minute up to 15 minutes) is correct:
- * NearSync allows an RPO as low as 1 minute, providing near-continuous data protection.
- * This is ideal for mission-critical applications where minimal data loss is required.
- * Option A (Configure NearSync) is incorrect:
- * While NearSync is the best choice, just enabling it is not enough—the schedule must be set to 1-15 minutes.
- * Option B (16 to 59 minutes) is incorrect:
- * NearSync operates within a 1-15 minute range. If set above 15 minutes, it defaults to Async replication.
- * Option C (Async replication) is incorrect:
- * Async replication typically has an RPO of 1 hour or more, which does not meet the lowest RPO requirement.

References:

- * Nutanix Protection Policies Guide#NearSync vs. Async Replication
- * Nutanix Bible#RPO and RTO in Disaster Recovery

NEW QUESTION # 170

Which Nutanix solution integrates with third-party backup tools for long-term data retention?

- A. Nutanix Move
- **B. Nutanix Mine**
- C. Nutanix Leap
- D. Nutanix Beam

Answer: B

NEW QUESTION # 171

Which Nutanix product is used for automating application deployment across clouds?

- **A. Calm**
- B. Prism Central
- C. Flow
- D. Xi Frame

Answer: A

NEW QUESTION # 172

.....

If you failed to do so then the customer gets a full refund from Itcerttest according to the terms and conditions. Users can start using Nutanix NCP-MCI-6.10 instantly after purchasing it. Three NCP-MCI-6.10 Exam Questions format is provided to customers so that they can access the Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) (NCP-MCI-6.10) prep material in every possible way according to their needs.
