ISC CC Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Network Security: This domain assesses the knowledge of Network Security Engineers and Cybersecurity Specialists. It covers foundational computer networking concepts including OSI and TCP• IP models, IP addressing, and network ports. Candidates study network threats such as DDoS attacks, malware variants, and man-in-the-middle attacks, along with detection tools like IDS, HIDS, and NIDS. Prevention strategies including firewalls and antivirus software are included. The domain also addresses network security infrastructure encompassing on-premises data centers, design techniques like segmentation and defense in depth, and cloud security models such as SaaS, IaaS, and hybrid deployments.

Topic 2	<ul style="list-style-type: none"> • Access Control Concepts: This section measures skills of Access Control Specialists and Physical Security Managers in understanding physical and logical access controls. Topics include physical security measures like badge systems, CCTV, monitoring, and managing authorized versus unauthorized personnel. Logical access control concepts such as the principle of least privilege, segregation of duties, discretionary access control, mandatory access control, and role-based access control are essential for controlling information system access.
Topic 3	<ul style="list-style-type: none"> • Security Principles: This section of the exam measures skills of Security Analysts and Information Assurance Specialists and covers fundamental security concepts such as confidentiality, integrity, availability, authentication methods including multi-factor authentication, non-repudiation, and privacy. It also includes understanding the risk management process with emphasis on identifying, assessing, and treating risks based on priorities and tolerance. Candidates are expected to know various security controls, including technical, administrative, and physical, as well as the ISC2 professional code of ethics. Governance processes such as policies, procedures, standards, regulations, and laws are also covered to ensure adherence to organizational and legal requirements.
Topic 4	<ul style="list-style-type: none"> • Business Continuity (BC), Disaster Recovery (DR) & Incident Response Concepts: This domain targets Business Continuity Planners and Incident Response Coordinators. It focuses on the purpose, importance, and core components of business continuity, disaster recovery, and incident response. Candidates learn how to prepare for and manage disruptions while maintaining or quickly restoring critical business operations and IT services.
Topic 5	<ul style="list-style-type: none"> • Security Operations: This area targets Security Operations Center (SOC) Analysts and System Administrators. It covers data security with encryption methods, secure handling of data including classification and retention, and the importance of logging and monitoring security events. System hardening through configuration management, baselines, updates, and patching is included. Best practice security policies such as data handling, password, acceptable use, BYOD, change management, and privacy policies are emphasized. Finally, the domain highlights security awareness training addressing social engineering awareness and password protection to foster a security-conscious organizational culture.

100% Pass Useful CC - Valid Certified in Cybersecurity (CC) Exam Papers

You can access our web-based Certified in Cybersecurity (CC) (CC) practice exam from anywhere with an internet connection, and fit your studying into your busy schedule. No more traveling to a physical classroom, wasting time and money on gas or public transportation. With the web-based ISC CC Practice Test, you can evaluate and enhance your progress. Customizable web-based mock exam creates a real Certified in Cybersecurity (CC) (CC) exam environment and works on all operating systems.

ISC Certified in Cybersecurity (CC) Sample Questions (Q354-Q359):

NEW QUESTION # 354

Trina is a security practitioner at Triffid, Inc. Trina has been tasked with selecting a new product to serve as a security control in the environment. After doing some research, Trina selects a particular product. Before that product can be purchased, a manager must review Trina's selection and determine whether to approve the purchase. This is a description of:

- A. Software
- B. Segregation of duties
- C. Two-person integrity
- D. Defense in depth

Answer: B

NEW QUESTION # 355

Which type of application can intercept sensitive information such as passwords on a network segment?

- A. Protocol Analyzer
- B. Network Scanner
- C. Firewall
- D. Log server

Answer: A

NEW QUESTION # 356

Trina and Doug both work at Triffid, Inc. Doug is having trouble logging into the network. Trina offers to log in for Doug, using Trina's credentials, so that Doug can get some work done.

What is the problem with this?

- A. Doug is a bad person
- B. It is against the law
- C. If Trina logs in for Doug, then Doug will never be encouraged to remember credential without assistance
- D. Anything either of them do will be attributed to Trina

Answer: D

NEW QUESTION # 357

What is a type of system architecture where a single instance can serve multiple distinct user groups.

- A. Multi-cloud
- B. Multitenancy
- C. Multi-processing
- D. Multi-threading

Answer: B

NEW QUESTION # 358

Prachi works as a database administrator for Triffid, Inc. Prachi is allowed to add or delete users, but is not allowed to read or modify the data in the database itself. When Prachi logs onto the system, an access control list (ACL) checks to determine which permissions Prachi has.

Which security concept is being applied in this situation?

- A. Least privilege
- B. Two-person integrity
- C. Defense in depth
- D. Layered defense

Answer: A

NEW QUESTION # 359

.....
