Latest Test FCP_GCS_AD-7.6 Simulations - Preparation FCP_GCS_AD-7.6 Store

All FCP_GCS_AD-7.6 online tests begin somewhere, and that is what the FCP_GCS_AD-7.6 training course will do for you: create a foundation to build on. Study guides are essentially a detailed FCP_GCS_AD-7.6 tutorial and are great introductions to new FCP_GCS_AD-7.6 training courses as you advance. The content is always relevant, and compound again to make you pass your FCP_GCS_AD-7.6 Exams on the first attempt. You will frequently find these FCP_GCS_AD-7.6 PDF files downloadable and can then archive or print them for extra reading or studying on-the-go.

Fortinet FCP - Google Cloud Security 7.6 Administrator Sample Questions (Q30-Q35):

NEW QUESTION # 30

Refer to the exhibit.

```
FortiGate-VM64-GCP # gcp: add GCP Lab
gcpd sdn connector GCP Lab prepare to update
gcpd get token
gcpd metadata url: http://169.254.169.254/computeMetadata/v1/instance/service-accounts/default/token
gcpd metadata result:200
Token expires in: 3599 seconds
gcpd metadata url: http://169.254.169.254/computeMetadata/v1/project/project-id
gcpd metadata result:200
gcpd got project id from metadata: fcp-fcss-course-development
gcpd sdn connector GCP Lab start updating
gcpd sdn connector GCP Lab got empty project list, trying sdn update from metadata project: fcp-fcss-course-development
gcpd sdn connector GCP Lab get instance list successfully
gcpd didn't find any GKE cluster for project fcp-fcss-course-development
gcpd sdn connector GCP Lab list GKE cluster failed
GCP Lab got 3 addresses
gcpd sdn connector GCP Lab start updating IP addresses
gcpd sdn connector GCP Lab finish updating IP addresses
```

An administrator configured GoogleCloud as an external fabric connector on FortiGate.
Which conclusion can you draw from the output?

- A. The external fabric connector shows that an administrator created three dynamic firewall addresses.
- B. The external fabric connector is misconfigured.
- C. The external fabric connector is unable to find a valid Google Cloud project.
- **D. The external fabric connector found multiple IP addresses assigned to Google Cloud instances.**

Answer: D

Explanation:

The output shows the connector successfully retrieved project information and instance IP addresses (GCP Lab got 3 addresses), indicating it found multiple IPs assigned to Google Cloud instances.

NEW QUESTION # 31

You are tasked with deploying a load balancer in Google Cloud that does not terminate sessions arriving from outside the VPC and that forwards traffic to the organization's internal web servers.

Which load balancer type should you deploy?

- **A. External passthrough load balancer**
- B. External application load balancer
- C. Proxy network load balancer
- D. Internal passthrough load balancer

Answer: A

Explanation:

An external passthrough load balancer forwards traffic without terminating sessions, preserving the original client connection, which is ideal for forwarding traffic directly to internal web servers.

NEW QUESTION # 32

An administrator has been tasked with modifying their organization's existing active-passive high-availability (HA) FortiGate cluster and turn it into an active-active HA cluster.

Which two behavior changes will the administrator see in the cluster after the change? (Choose two.)

- A. The cluster no longer act as a single logical instance.
- B. The configuration will no longer be synchronized between cluster members.
- C. There is no longer a need to reserve a dedicated port for HA communications.
- D. The sessions will no longer be synchronized between cluster members.

Answer: A,C

Explanation:

Active-active HA does not require a dedicated HA communication port as each member handles traffic independently.

In active-active mode, cluster members operate more independently and do not present as a single logical device like in active-passive mode.

NEW QUESTION # 33

Your organization has decided to deploy a high-availability (HA) cluster. One key requirement of the deployment is to support configuration synchronization.

Which three deployment types should be considered? (Choose three.)

- A. Active-passive HA using software-defined networking (SDN)
- B. Active-active HA using auto scaling
- C. Active-passive HA using FGSP
- D. Active-passive HA using passthrough load balancers

Answer: A,C,D

Explanation:

These three deployment types support configuration synchronization between HA cluster members, which is critical for maintaining consistent state and seamless failover.

NEW QUESTION # 34

An administrator is tasked to deploy two FortiGate devices in two different zones to achieve geographical redundancy.

Which two architectural considerations must the administrator address? (Choose two.)

- A. The FortiGate devices must not be deployed in the same VPC.
- B. The FortiGate devices cannot be assigned the second IP address in the subnets that they are deployed in.
- C. The FortiGate devices must be deployed in two different regions.
- D. The FortiGate devices can be deployed in the same subnet.

Answer: B,C

Explanation:

Deploying FortiGate devices in different regions ensures geographic redundancy.

The second IP address in a subnet is reserved for the default gateway in Google Cloud, so FortiGate devices cannot use that IP.

NEW QUESTION # 35
