

First-grade Latest SDLCSA Exam Experience—100% Valid New Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam Exam Pattern

BTW, DOWNLOAD part of PassSureExam SDLCSA dumps from Cloud Storage: https://drive.google.com/open?id=12s_A4JS3lwUa1Pn1iCsa_6uXTZq8B2DQ

The pass rate is 98%, and we also pass guarantee if you buy SDLCSA study materials of us. We have received many good feedbacks of the SDLCSA exam dumps. You also enjoy free update for one year after your payment, and if you have any questions about the SDLCSA Exam Dumps, just ask our online service stuff, they will give a reply immediately, or you can send email to us, we will answer you as quickly as we can. Therefore, just contact us if you have the confusions about the SDLCSA study materials.

No one can be responsible for you except yourself. So you must carefully plan your life and future career development. Our SDLCSA training quiz might offer you some good guidance. Maybe you never find out your real interest in the past. Now, everything is different. So you still have the chance to change. Once you are determined to learn our SDLCSA Study Materials, you will become positive and take your life seriously. Through the preparation of the exam, you will study much SDLCSA practical knowledge. Of course, passing the SDLCSA exam and get the certificate is just a piece of cake.

New Supermicro SDLCSA Exam Pattern - SDLCSA Associate Level Exam

The Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam (SDLCSA) web-based practice test works on all major browsers such as Safari, Chrome, MS Edge, Opera, IE, and Firefox. Users do not have to install any excessive software because this Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam (SDLCSA) practice test is web-based. It can be accessed through any operating system like Windows, Linux, iOS, Android, or Mac. Another format of the practice test is the desktop software. It works offline only on Windows. Our Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam (SDLCSA) desktop-based practice exam software comes with all specifications of the web-based version.

Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam Sample Questions (Q40-Q45):

NEW QUESTION # 40

Before removing the LPIO board from the PCIe tray, what other component needs to be removed first?

- A. Metal bracket
- B. Air shroud
- C. Motherboard tray
- D. GPU tray

Answer: A

Explanation:

The LPIO (Low-Profile IO) board in Supermicro systems like the SYS-421GE-TNHR2-LCC, part of the PCIe tray, is typically secured by a metal bracket that must be removed first. This bracket holds the LPIO board and associated cables (e.g., BMC cable) in place, as seen in similar designs (e.g., SYS-420GP-TNAR). Removing it involves unscrewing (often 2 screws) and lifting it off, granting access to the LPIO board. A (GPU tray) is a separate assembly, C (motherboard tray) is unrelated to the PCIe tray's LPIO, and D (air shroud) covers components but doesn't secure the board. Supermicro's DLC systems emphasize modular access, making B the correct step. References: Supermicro PCIe tray service guides, DLC system IO component layouts.

NEW QUESTION # 41

Aside from ESD gloves, what additional tools do you need to remove a DIMM?

- A. Torque bit and driver
- B. Long-nose pliers (in order to grasp the card)
- C. Screwdriver
- **D. No additional tools are needed**

Answer: D

Explanation:

Removing a DIMM (memory module) in Supermicro systems like the SYS-421GE-TNHR2-LCC requires only ESD gloves for safety; no additional tools are needed. DIMMs are released by pushing down on slot latches and lifting out by hand, per Supermicro manuals (e.g., SYS-420GP-TNAR). A (pliers) risks damage, B (torque bit) and D (screwdriver) are for screws, not DIMMs. Supermicro's DLC systems maintain standard DIMM serviceability, making C correct. References: Supermicro DIMM replacement guides, DLC system maintenance standards.

NEW QUESTION # 42

What are the full steps and proper order for replacing a failed power supply unit in the SYS-421GE-TNHR2- LCC system?

- A. Lift the yellow lock to unlock the release lever > Lift the release lever and use it to pull out the failed power supply unit > Replace the failed power supply unit with a new one
- **B. Lift the red lock to unlock the release lever > Lift the release lever and use it to pull out the failed power supply unit > Replace the failed power supply unit with a new one > Ensure the gold connector pins are on the top > Push the new power supply unit into the tray > Push the release lever down and in until it clicks > Ensure the red lock on the release lever is locked**
- C. Lift the blue lock to unlock the release lever > Push the release lever down and in until it clicks > Ensure the red lock on the release lever is locked
- D. Lift the release lever and use it to pull out the failed power supply unit > Replace the failed power supply unit with a new one > Push the new power supply unit into the tray > Push the release lever down and in until it clicks

Answer: B

Explanation:

Replacing a PSU in Supermicro's SYS-421GE-TNHR2-LCC follows a detailed, safety-focused process:

Lift the red lock to unlock the release lever: Red is a common Supermicro color for PSU locks.

Lift the release lever and use it to pull out the failed PSU: Standard hot-swap mechanism.

Replace the failed PSU with a new one: Swap the unit.

Ensure the gold connector pins are on the top: Correct orientation for connection.

Push the new PSU into the tray: Slide it in fully.

Push the release lever down and in until it clicks: Locks the PSU.

Ensure the red lock is locked: Confirms security.

Option B covers all steps comprehensively, aligning with Supermicro's DLC system PSU replacement (e.g., SYS-420 manuals). A is incomplete, C reverses steps, and D skips locking, making B correct.

References: Supermicro PSU replacement guides, DLC system power protocols.

NEW QUESTION # 43

How many screws need to be removed from the metal bracket that holds down the LPIO board / BMC cable?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

The LPIO (Low-Profile IO) board and BMC cable in Supermicro systems are typically secured by a minimal number of screws for quick serviceability, a principle in DLC designs like the SYS-421GE-TNHR2-LCC.

Based on similar systems (e.g., SYS-420GP-TNAR), the metal bracket holding these components is fastened with 2 screws, balancing security and ease of access. Higher counts like 8 (A), 5 (B), or 6 (D) are excessive for a small bracket, while 2 (C) matches Supermicro's standard for IO-related brackets. In DLC contexts, modularity is key, supporting C as the verified number.

References: Supermicro IO board installation guides, DLC system service efficiency.

NEW QUESTION # 44

There are 2 slots for the M.2 drive. If only one is installed, it is important to note which slot it is removed from so that it can be re-installed to the same location. True or False.

- A. True
- B. False

Answer: B

Explanation:

In Supermicro systems with 2 M.2 slots (e.g., SYS-421GE-TNHR2-LCC), the slots are typically interchangeable unless specified by BIOS or hardware configuration (rare in standard setups). Re-installing an

M.2 drive to the same slot isn't critical for functionality, as the system auto-detects it, per Supermicro manuals. False (B) aligns with DLC system flexibility, making it correct over A. References: Supermicro M.2 installation guides, DLC system storage configs.

NEW QUESTION # 45

.....

The second form is Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam (SDLCSA) web-based practice test. It can be attempted through online browsing, and you can prepare via the internet. The SDLCSA web-based practice test can be taken from Firefox, Microsoft Edge, Google Chrome, and Safari. You don't need to install or use any plugins or software to take the SDLCSA web-based practice exam. Furthermore, you can take this online mock test via any operating system.
