With our professional ability, we can accord to the necessary testing points to edit PL-200 exam questions. It points to the exam heart to solve your difficulty. With a minimum number of questions and answers of PL-200 Test Guide to the most important message, to make every user can easily efficient learning, not to increase their extra burden, finally to let the PL-200 exam questions help users quickly to pass the exam.

## Microsoft Power Platform Functional Consultant Sample Questions (Q259-Q264):

### NEW QUESTION # 259

You are designing an app for a bank.

You must create entities for the app and configure relationships between entities:

Entity	Requirements
LoanApplicant	This entity represents a person who is applying for a loan. The entity must contain an attribute named Email. This attribute must provide look-up for the name of the applicant.
Loan	This entity represents a loan application. Loan applicants may apply for one loan per application. Loan applicants may have more than one active application.
Property	This entity represents the property that the applicant intends to purchase.

Which relationship types should you use? To answer, drag the appropriate relationship types to the correct requirements. Each relationship type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

### Relationship types Answer Area

Relationship types	Requirement	Relationship type
1 : N	The email attribute of the Loan Applicant entity must provide a look-up to the contact name and email.	<input type="text"/>
N : N	Loan applicants can apply for one type of loan per application. Applicants can have more than one application.	<input type="text"/>
N : 1	Loans must be applied for for a single property.	<input type="text"/>

Answer:

Explanation:

### Relationship types Answer Area

Relationship types	Requirement	Relationship type
1 : N	The email attribute of the Loan Applicant entity must provide a look-up to the contact name and email.	N : 1
N : N	Loan applicants can apply for one type of loan per application. Applicants can have more than one application.	N : N
N : 1	Loans must be applied for for a single property.	N : 1

Explanation

Text Description automatically generated

Requirement	Relationship type
The email attribute of the Loan Applicant entity must provide a look-up to the contact name and email.	N : 1
Loan applicants can apply for one type of loan per application. Applicants can have more than one application.	N : N
Loans must be applied for for a single property.	N : 1

Box 1: N:1

You add a lookup column with a many-to-one relationship.

Box 2: N:N

Box 3: N:1

Reference:

### NEW QUESTION # 260

A company plans to automate the following manual processes by using Power Automate. You need to identify UI flow types for the two business processes.

Process	Time to Complete	Comments
1	30 minutes	The user's device must remain unlocked when the business process runs. The user will be required to leave their device unattended in a secure setting while the business process runs so that the user can assist with other efforts.
2	45 minutes	The process must run after normal business hours. The device that runs the business process must remain unlocked when the business process is not running.

Which desktop flow type should you use? To answer, drag the appropriate desktop flow types to the correct business processes. Each desktop flow type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Desktop flow types

Attended

Unattended

Answer Area

Business process	Desktop flow type
1	Desktop flow type
2	Desktop flow type

**Answer:**

Explanation:

Desktop flow types

Attended

Unattended

Answer Area

Business process	Desktop flow type
1	Attended
2	Unattended

### NEW QUESTION # 261

A company has a canvas app that includes the following screens: Screen1 and Screen2.

The OnVisible property for Screen1 contains the following expression.

Set(AgeGroups, ["1-25", "26-54", "55+"])

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
AgeGroups can be accessed from Screen1 and Screen2.	<input type="radio"/>	<input type="radio"/>
AgeGroups is a collection.	<input type="radio"/>	<input type="radio"/>
You can use the Update function to change values in AgeGroups.	<input type="radio"/>	<input type="radio"/>

**Answer:**

Explanation:

Statements	Yes	No
AgeGroups can be accessed from Screen1 and Screen2.	<input type="radio"/>	<input checked="" type="radio"/>
AgeGroups is a collection.	<input type="radio"/>	<input checked="" type="radio"/>
You can use the Update function to change values in AgeGroups.	<input checked="" type="radio"/>	<input type="radio"/>

#### NEW QUESTION # 262

You are designing a chatbot for a sports outlet.

You need to complete the chatbot.

Which features should you use? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE Each correct selection is worth one point.

Features	Requirement	Feature
Topics	Enable the chatbot to relate to a real-world object or topic in a dialog.	Feature
Entities	Define the path and triggers for a chatbot conversation.	Feature
Variables	Implement conditional logic to dynamically route a conversation across different paths.	Feature
Flows		

Answer:

Explanation:

Features	Requirement	Feature
Topics	Enable the chatbot to relate to a real-world object or topic in a dialog.	Entities
Entities	Define the path and triggers for a chatbot conversation.	Topics
Variables	Implement conditional logic to dynamically route a conversation across different paths.	Variables
Flows		

Explanation

Graphical user interface, text, application, email Description automatically generated

Requirement	Feature
Enable the chatbot to relate to a real-world object or topic in a dialog.	Entities
Define the path and triggers for a chatbot conversation.	Topics
Implement conditional logic to dynamically route a conversation across different paths.	Variables

#### Box 1: Entities

Out of the box, Power Virtual Agents comes with a set of prebuilt entities, which represent the most commonly used stereotype information in real-world dialogs, such as age, colors, numbers, and names.

With the knowledge granted by entities, a bot can smartly recognize the relevant information from a user input and save it for later use.

#### Box 2: Topics

In Power Virtual Agents, a topic defines a how a bot conversation plays out.

You can author topics by customizing provided templates, create new topics from scratch, or get suggestions from existing help sites. A topic has trigger phrases - these are phrases, keywords, or questions that a user is likely to type that is related to a specific issue - and conversation nodes - these are what you use to define how a bot should respond and what it should do.

#### Box 3: Variables

Variables let you save responses from your customers in a conversation with your bot so that you can reuse them later in the conversation.

For example, you can save a customer's name in a variable called UserName. The bot can then address the customer by name as the conversation continues.

You can use variables to create logical expressions that dynamically route the customer down different conversation paths.
