Real CS0-002 Exams & New CS0-002 Exam Review

Our CompTIA Cybersecurity Analyst (CySA+) Certification Exam (CS0-002) practice exam can be modified in terms of length of time and number of questions to help you prepare for the CompTIA real test. We're certain that our CS0-002 Questions are quite similar to those on CS0-002 real exam since we regularly update and refine the product based on the latest exam content.

CompTIA CS0-002 (CompTIA Cybersecurity Analyst (CySA+) Certification) exam is a globally recognized certification that validates the skills and knowledge of cybersecurity professionals. CompTIA Cybersecurity Analyst (CySA+) Certification Exam certification is designed to assess the candidate's ability to identify and solve complex cybersecurity problems, analyze data to identify vulnerabilities, and implement effective solutions to protect an organization's systems and data.

CompTIA CS0-002 Exam is a certification exam for cybersecurity professionals who want to validate their skills and knowledge in identifying and mitigating cybersecurity threats. CompTIA Cybersecurity Analyst (CySA+) Certification is a vendor-neutral certification that is globally recognized and highly respected in the cybersecurity industry. The CS0-002 exam is designed to help professionals develop the skills needed to identify risk and vulnerabilities and respond to security incidents.

CompTIA Cybersecurity Analyst (CySA+) Certification Exam Sample Questions (Q156-Q161):

NEW QUESTION # 156

A security analyst is monitoring authentication exchanges over the company's wireless network.

A sample of the Wireshark output is shown below:

No	Time	Source	Destination	Protocol	Info
1345	191.12345	Cisco_91:aa	Netgear_a5:ef	EAP	Request, Identify
1350	191.12456	Netgear_a5:ef	Cisco_91:aa	EAP	Response, Identify
1355	191.12678	Cisco_91:aa	Netgear_a5:ef	EAP	Request, LEAP
1360	191.12690	Netgear_a5:ef	Cisco_91:aa	TLSv1.1	Client Hello
...					
2145	191.12345	fooHost	barServer	TCP	GET ./login.jsp
2150	191.12456	barServer	fooHost	TCP	Source port:80 ...

Which of the following would improve the security posture of the wireless network?

- A. Using SSL 2.0 instead of TLSv1.1
- B. Using UDP instead of TCP
- C. Using PEAP instead of LEAP
- D. using aspx instead of .jsp

Answer: C

NEW QUESTION # 157

A security analyst is reviewing vulnerability scan results and notices new workstations are being flagged as having outdated antivirus signatures. The analyst observes the following plugin output:

Antivirus is installed on the remote host:

Installation path: C:\Program Files\AVProduct\Win32\

Product Engine: 14.12.101

Engine Version: 3.5.71

Scanner does not currently have information about AVProduct version 3.5.71. It may no longer be supported.

The engine version is out of date. The oldest supported version from the vendor is 4.2.11.

The analyst uses the vendor's website to confirm the oldest supported version is correct.

Which of the following BEST describes the situation?

- A. This is a true negative, and the new computers have the correct version of the software.
- B. This is a false positive, and the scanning plugin needs to be updated by the vendor.
- C. This is a true positive, and the new computers were imaged with an old version of the software.
- D. This is a false negative, and the new computers need to be updated by the desktop team.

Answer: D

NEW QUESTION # 158

A development team recently released a new version of a public-facing website for testing prior to production. The development team is soliciting the help of various teams to validate the functionality of the website due to its high visibility. Which of the following activities best describes the process the development team is initiating?

- A. Static analysis
- B. Code review
- C. Stress testing
- D. User acceptance testing

Answer: D

Explanation:

User acceptance testing is a process of verifying that a software application meets the requirements and expectations of the end users before it is released to production. User acceptance testing can help to validate the functionality, usability, performance and compatibility of the software application with real-world scenarios and feedback. User acceptance testing can involve various

teams, such as developers, testers, customers and stakeholders.

NEW QUESTION # 159

A threat intelligence analyst who works for a technology firm received this report from a vendor.

"There has been an intellectual property theft campaign executed against organizations in the technology industry. Indicators for this activity are unique to each intrusion. The information that appears to be targeted is R&D data. The data exfiltration appears to occur over months via uniform TTPs. Please execute a defensive operation regarding this attack vector." Which of the following combinations suggests how the threat should MOST likely be classified and the type of analysis that would be MOST helpful in protecting against this activity?

- A. APT and behavioral analysis
- B. Insider threat and indicator analysis
- C. Ransomware and encryption
- D. Polymorphic malware and secure code analysis

Answer: A

NEW QUESTION # 160

A development team is testing a new application release. The team needs to import existing client PHI data records from the production environment to the test environment to test accuracy and functionality.

Which of the following would BEST protect the sensitivity of this data while still allowing the team to perform the testing?

- A. Watermarking
- B. Encoding
- C. Encryption
- D. Deidentification

Answer: D

NEW QUESTION # 161

.....

As the talent team grows, every fighter must own an extra technical skill to stand out from the crowd. To become more powerful and struggle for a new self, getting a professional CS0-002 certification is the first step beyond all questions. We suggest you choose our CS0-002 test prep ----an exam braindump leader in the field. Since we release the first set of the CS0-002 quiz guide, we have won good response from our customers and until now---a decade later, our products have become more mature and win more recognition. We promise to give you a satisfying reply as soon as possible. All in all, we take an approach to this market by prioritizing the customers first, and we believe the customer-focused vision will help our CS0-002 Test Guide' growth.
