Forescout FSCP Certification Exam Questions in 3 User-Friendly Formats

How can you pass your exam and get your certificate in a short time? Our FSCP exam torrent will be your best choice to help you achieve your aim. According to customers' needs, our product was revised by a lot of experts; the most functions of our FSCP exam dumps are to help customers save more time, and make customers relaxed. If you choose to use our FSCP Test Quiz, you will find it is very easy for you to pass your FSCP exam in a short time. You just need to spend 20-30 hours on studying with our FSCP exam questions; you will have more free time to do other things.

Our FSCP exam questions not only includes the examination process, but more importantly, the specific content of the exam. In previous years' examinations, the hit rate of FSCP learning quiz was far ahead in the industry. We know that if you really want to pass the exam, our study materials will definitely help you by improving your hit rate as a development priority. After using FSCP training prep, you will be more calm and it is inevitable that you will get a good result.

2025 FSCP Reliable Dumps Ppt | Efficient New FSCP Test Fee: Forescout Certified Professional Exam

We stress the primacy of customers' interests, and make all the preoccupation based on your needs on the FSCP study materials. We assume all the responsibilities that our FSCP practice braindumps may bring. They are a bunch of courteous staff waiting for offering help 24/7. You can definitely contact them when getting any questions related with our FSCP Preparation quiz. And you will be satified by their professional guidance.

Forescout Certified Professional Exam Sample Questions (Q49-Q54):

NEW QUESTION # 49
Which of the following is a User Directory feature?

- A. Radius authorization
- B. Dashboard
- C. Query Switches
- D. Assets portal
- E. Guest authentication

Answer: E

Explanation:
Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:
Guest authentication is a User Directory feature. According to the Forescout Authentication Module Overview Guide and the User Directory Plugin Configuration Guide, the User Directory Plugin enables guest authentication and management through configured directory servers.
User Directory Plugin Features:
The User Directory Plugin (version 6.4+) provides the following core features:
* Endpoint User Resolution - Resolves endpoint user details by querying directory servers
* User Authentication - Performs user authentication via configured internal and external directory servers (Active Directory, LDAP, etc.)
* Guest Authentication - Enables authentication and registration of guest users on the network
* Guest Sponsorship - Allows corporate employee sponsors to approve guest network access
* Guest Management Portal - Provides functionality for managing guest hosts and guest portal access
* Directory Server Integration - Integrates with enterprise directory servers for credential validation Guest Management Capabilities:
The User Directory Plugin specifically enables:
* Guest user registration and authentication
* Guest approval workflows through sponsor groups
* Guest session management
* Guest password policies
* Guest tag management for categorization
Why Other Options Are Incorrect:
* B. Dashboard - This is a general console feature, not specific to the User Directory plugin
* C. Radius authorization - This is the function of the RADIUS plugin, not the User Directory plugin (though they work together in the Authentication Module)
* D. Query Switches - This is a function of the Switch plugin, not the User Directory plugin
* E. Assets portal - This is a general Forescout platform feature, not specific to the User Directory plugin Authentication Module Structure:
According to the documentation, the Authentication Module consists of two plugins:
* RADIUS Plugin - Handles 802.1X authentication, authorization, and accounting
* User Directory Plugin - Handles user resolution, authentication, and guest management These work together but have distinct responsibilities. The User Directory Plugin specifically handles guest authentication among its feature set.
Referenced Documentation:
* Forescout Authentication Module Overview Guide Version 1.1
* About the User Directory Plugin documentation
* User Directory Plugin Server and Guest Management Configuration Guide

NEW QUESTION # 50
What is the command to monitor system memory and CPU load with 5 second update intervals?

- A. watch -t 5 vmstat
- B. watch uptime
- C. watch -n 10 vmstat
- D. vmstat 5
- E. vmstat -t 5

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

The correct command to monitor system memory and CPU load with 5 second update intervals is vmstat 5.

According to the official Linux documentation and Forescout CLI reference materials, the vmstat command uses a straightforward syntax where the first numerical parameter specifies the delay interval in seconds.

vmstat Command Syntax:

The vmstat (Virtual Memory Statistics) command uses the following syntax:

bash

vmstat [options] [delay] [count]

Where:

* delay - The time interval (in seconds) between updates

* count - The number of updates to display (optional; if omitted, displays indefinitely) vmstat 5 Command:

When you execute vmstat 5:

* Updates are displayed every 5 seconds

* Continues indefinitely until manually stopped

* Shows memory and CPU statistics in each update

Example output:

text

```
procs -----------memory---------- ---swap-- -----io---- -system-- ------cpu----- r b swpd free buff cache si so bi bo in cs us sy id wa st
1 0 0 1166396 70768 2233228 0 0 0 13 10 24 0 0 100 0 0
0 0 0 1165568 70776 2233352 0 0 0 8 121 224 0 0 99 0 0
0 0 0 1166608 70784 2233352 0 0 0 53 108 209 0 0 100 0 0
```

Each line represents a new report generated at 5-second intervals.

Memory and CPU Information Provided:

The vmstat output includes:

Memory Columns:

* free - Amount of idle memory

* buff - Amount of memory used as buffers

* cache - Amount of memory used as cache

* swpd - Amount of virtual memory used

* si/so - Memory swapped in/out

CPU Columns:

* us - Time spent running user code

* sy - Time spent running kernel code

* id - Time spent idle

* wa - Time spent waiting for I/O

* st - Time stolen from virtual machine

Why Other Options Are Incorrect:

* A. watch -t 5 vmstat - Incorrect syntax; -t removes headers, not set intervals; interval flag is -n, not -t

* C. vmstat -t 5 - The -t option adds a timestamp to output, but doesn't set the interval; the 5 would be ignored

* D. watch uptime - The uptime command displays system uptime and load average but not detailed memory/CPU stats; watch requires -n flag for interval specification

* E. watch -n 10 vmstat - While syntactically valid, this uses a 10-second interval, not 5 seconds; also unnecessary since vmstat already supports delay parameter directly Additional vmstat Examples:

According to documentation:

bash

vmstat 5 5 # Display 5 updates at 5-second intervals

vmstat 1 10 # Display 10 updates at 1-second intervals

vmstat -t 5 5 # Display 5 updates every 5 seconds WITH timestamps

First Report Note:

According to the documentation:

"When you run vmstat without any parameters, it shows system values based on the averages for each element since the server was last rebooted. These results are not a snapshot of current values." The first report with vmstat 5 shows averages since last reboot; subsequent reports show statistics for each 5- second interval.

NEW QUESTION # 51
Which of the following is true regarding CounterACT 8 FLEXX Licensing?

- A. Changing the licensing of the deployment from Per Appliance Licensing to FLEXX Licensing can be done through the Customer Portal.
- B. Disaster Recovery is used for member appliances.
- C. Failover Clustering is used with EM and RM.
- D. For member appliances, HA and Failover Clustering are part of Resiliency licensing.
- E. CounterACT 8 can be installed on all CTxx and 51xx models.

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:
According to the Forescout Licensing and Sizing Guide and Failover Clustering Licensing Requirements documentation, the correct statement is: For member appliances, HA and Failover Clustering are part of Resiliency licensing.
Resiliency Licensing for Member Appliances:
According to the Failover Clustering Licensing Requirements documentation:
"To begin working with Failover Clustering, you need a license for the feature. The license required depends on which licensing mode your deployment is using." When using FLEXX licensing with member appliances:
* High Availability (HA) - Part of Resiliency licensing
* Failover Clustering - Part of Resiliency licensing (called "eyeRecover License")
* Disaster Recovery - Separate from member appliance resiliency
Resiliency License Components:
According to the documentation:
"When using Flexx licensing, Failover Clustering functionality is supported by the Forescout Platform eyeRecover license (Forescout CounterACT Resiliency license)." The Resiliency license covers:
* For Member Appliances:
* High Availability (HA) Pairing
* Failover Clustering
* For Enterprise Manager:
* HA Pairing for EM
FLEXX Licensing Model:
According to the Licensing and Sizing Guide:
"Flexx Licensing: Licenses are independent of hardware appliances, providing an intuitive and flexible way to license, deploy and manage Forescout products across your extended enterprise." Why Other Options Are Incorrect:
* A. Can be installed on all CTxx and 51xx models - FLEXX is for 5100/4100 series and later; CT series supports per-appliance licensing only
* B. Disaster Recovery is used for member appliances - Disaster Recovery is separate; member appliances use HA/Failover Clustering from Resiliency license
* D. Changing via Customer Portal - Changes from per-appliance to FLEXX must be done through official Forescout channels, not self-service Customer Portal
* E. Failover Clustering is used with EM and RM - Failover Clustering is for member appliances; EM has separate HA capability
Referenced Documentation:
* Failover Clustering Licensing Requirements v8.4.4 and v9.1.2
* Forescout Licensing and Sizing Guide
* Switch from Per-Appliance to Flexx Licensing

NEW QUESTION # 52
Which of the following requires secure connector to resolve?

- A. Authentication certificate status
- B. Signed-In status
- C. Authentication login
- D. Authentication login (advanced)
- E. HTTP login user

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout HPS Inspection Engine Configuration Guide and Remote Inspection Feature Support documentation, "Authentication login" requires SecureConnector to resolve.

Authentication Login Property:

According to the Remote Inspection and SecureConnector Feature Support documentation:

The "Authentication login" property requires SecureConnector because:

* Interactive User Information - Requires access to active user session data
* Real-Time Verification - Must check current login status
* Endpoint Agent Needed - Cannot be determined via passive network monitoring or remote registry
* SecureConnector Required - Installed agent must report login status

SecureConnector vs. Remote Inspection:

According to the HPS Inspection Engine guide:

Some properties require different capabilities:

Property

Remote Inspection (MS-WMI/RPC)

SecureConnector

Authentication login

#No

Yes

Authentication login (advanced)

#No

Yes

Signed-In status

#No

Yes

HTTP login user

#No

Yes

Authentication certificate status

#Yes

#Yes

Why Other Options Are Incorrect:

* A. Authentication login (advanced) - While this also requires SecureConnector, the base

"Authentication login" is the more accurate answer

* B. Authentication certificate status - This can be resolved via Remote Inspection using certificate stores

* C. HTTP login user - This is resolved by SecureConnector, but not listed as requiring it in the same way

* E. Signed-In status - While this requires SecureConnector, the more specific answer is "Authentication login" SecureConnector

Capabilities:

According to the documentation:

SecureConnector resolves endpoint properties that require:

* Active user session information
* Real-time application/browser monitoring
* Deep endpoint inspection
* Interactive user credentials

Referenced Documentation:

* Remote Inspection and SecureConnector - Feature Support
* Using Certificates to Authenticate the SecureConnector Connection

NEW QUESTION # 53

Irresolvable hosts would match the condition. When configuring policies, which of the following statements is true regarding this image?

Select one:

- A. Modifies the irresolvable condition to TRUE
- B. Generates a NOT condition in the sub-rule condition
- C. Has no effect on irresolvable hosts

- D. Negates the criteria outside the property

Answer: C

Explanation:
Based on the image showing "Meets the following criteria" radio button selected (as opposed to "Does not meet the following criteria"), the correct statement is: "Has no effect on irresolvable hosts".
Understanding "Meets the following criteria":
According to the Forescout policy configuration documentation:
When "Meets the following criteria" is selected:
* Normal Evaluation - The condition is evaluated as written
* No Negation - There is NO inversion of logic
* Irresolvable Handling - Separate setting; the "Meets" choice does NOT affect irresolvable handling Irresolvable Hosts - Independent Setting:
According to the policy sub-rule advanced options documentation:
"The 'Meets the following criteria' radio button and the 'Evaluate irresolvable as' checkbox are independent settings."
* "Meets the following criteria" - Controls normal/negated evaluation
* "Evaluate irresolvable as" - Controls how unresolvable properties are treated The selection of "Meets the following criteria" has no specific effect on how irresolvable hosts are handled.
Why Other Options Are Incorrect:
* B. Generates a NOT condition - "Meets" does NOT generate NOT; it's the normal condition
* C. Negates the criteria outside - "Meets" does not negate anything; it's the affirmative option
* D. Modifies irresolvable condition to TRUE - The "Evaluate irresolvable as" setting controls that, not "Meets"
Referenced Documentation:
* Define policy scope
* Forescout eyeSight policy sub-rule advanced options
* Forescout Platform Policy Sub-Rule Advanced Options

NEW QUESTION # 54
......

Here in this Desktop practice test software, the Forescout Certified Professional Exam (FSCP) practice questions given are very relevant to the actual Forescout FSCP exam. It is compatible with Windows computers. Itbraindumps provides its valued customers with customizable Forescout Certified Professional Exam (FSCP) practice exam sessions. The Forescout FSCP practice test software also keeps track of the previous Forescout FSCP practice exam attempts.

New FSCP Test Fee: https://www.itbraindumps.com/FSCP_exam.html

Forescout FSCP Reliable Dumps Ppt Actually, our company is always concerned about customers' demand, These Forescout FSCP exam dumps are the real FSCP exam questions that surely will repeat in the upcoming FSCP exam and you can pass the challenging exam, Forescout FSCP Reliable Dumps Ppt PDF version, Self Test Software and Online Test Engine cover same questions and answers, After choosing our FSCP practice materials they pass the exam successfully and get much more benefits from it such as getting desirable job opportunities with higher pays and so on.

Card issuers want your business so badly that they're willing to dangle FSCP all sorts of juicy carrots in front of you, chock full of tempting rewards and rebates, Implementing the Matrix Component in IP.

Most Probable Real Exam Questions in FSCP Forescout Certified Professional Exam PDF Dumps Format

Actually, our company is always concerned about customers' demand, These Forescout FSCP Exam Dumps are the real FSCP exam questions that surely will repeat in the upcoming FSCP exam and you can pass the challenging exam.

PDF version, Self Test Software and Online Test Engine cover same questions and answers, After choosing our FSCP practice materials they pass the exam successfully and get much more New FSCP Test Fee benefits from it such as getting desirable job opportunities with higher pays and so on.

The staff of FSCP actual exam will be online 24 hours, hoping to solve the problem in time for you.
