

Formal MTCNA Test, New MTCNA Test Question

150 Question Certificate Mikrotik MTCNA 2020 (English Version)

1. When viewing a route (gateway) in Winbox, some routes (gateway) will display "DAC" in the first column. This flag means:

- A. Direct, Available, Connected
- B. Dynamic, Available, Created
- C. Dynamic, Active, Connected
- D. Dynamic, Active, Console

Answer: C

Discussion: Can be seen in the Mikrotik settings in the IP-Routes Tab in the section below

2. The PPPoE server only works in one Ethernet broadcast domain that is connected to it. If there is a router between the server and the end-user host, it will not be able to create a PPPoE Tunnel to the PPPoE server.

- A. Right
- B. False

Answer: A

Discussion: PPPoE uses Layer 2 (MAC) as a means to connect, so between the PPPoE server and the PPPoE Client must be able to know each other's MAC Address. If there is a Router between Server & End-User so the MAC cannot be recognized, PPPoE cannot connect.

3. Which configuration menu should you use to change the default Winbox router port?

- A. / system resource
- B. / ip firewall filter
- C. / ip service
- D. / ip firewall service-ports

Answer: c

Discussion:

If you purchase our MikroTik Certified Network Associate Exam guide torrent, we can make sure that you just need to spend twenty to thirty hours on preparing for your exam before you take the exam, it will be very easy for you to save your time and energy. So do not hesitate and buy our MTCNA study torrent, we believe it will give you a surprise, and it will not be a dream for you to pass your MikroTik Certified Network Associate Exam exam and get your certification in the shortest time.

To meet the needs of users, and to keep up with the trend of the examination outline, our products will provide customers with latest version of our products. Our company's experts are daily testing our MTCNA learning materials for timely updates. So we solemnly promise the users, our products make every effort to provide our users with the latest learning materials. As long as the users choose to purchase our MTCNA learning material, there is no doubt that he will enjoy the advantages of the most powerful update.

2025 Professional MTCNA – 100% Free Formal Test | New MikroTik Certified Network Associate Exam Test Question

If you lack confidence for your exam, you can strengthen your confidence for your exam through using MTCNA exam torrent of us. MTCNA Soft test engine can simulate the real exam environment, so that you can know the procedure for the exam, and your confidence for the exam can also be built up. What's more, MTCNA Exam Braindumps are famous for instant access to download, and you can receive downloading link and password within ten minutes, so you start the training right now. You can enjoy free

update for 365 days for MTCNA test materials after payment, and the update version will be sent to you automatically.

MikroTik Certified Network Associate Exam Sample Questions (Q68-Q73):

NEW QUESTION # 68

What kind of users are listed in the "/user" menu?

- A. router users
- B. wireless users
- C. PPTP users
- D. Hot-Spot users

Answer: A

Explanation:

The /user menu in MikroTik RouterOS lists users who are allowed to log in to the router itself - via Winbox, SSH, WebFig, console, or API. These are administrative users of the RouterOS system.

Let's evaluate:

- * A.#Correct - These are RouterOS users (admin, techs, operators)
- * B.#Wireless users are authenticated via security-profiles and access-lists
- * C.#Hotspot users are managed under /ip hotspot user
- * D.#PPTP users are managed under /ppp secrets

MTCNA User Management Section:

"/user is used to configure login accounts for RouterOS access."

Rene Meneses Guide - User Types:

"Only RouterOS admin users are listed under /user. VPN and hotspot users are managed elsewhere." Terry Combs Notes - User Menu Summary:

"/user = login to router (Winbox/SSH). Not for PPP or hotspot authentication."

NEW QUESTION # 69

Select valid subnet masks:

- A. 192.0.0.0
- B. 255.255.192.255
- C. 255.192.0.0
- D. 255.255.224.0

Answer: D

Explanation:

Subnet masks are used in IP networking to define the boundary between the network portion and the host portion of an IP address. A valid subnet mask must consist of a contiguous block of 1s followed by a contiguous block of 0s in its binary representation.

Let's analyze the given options:

- * A. 255.192.0.0- This is not a standard or valid subnet mask because the 1s are not contiguous beyond the second octet. This is typically used in class A subnetting but is not commonly considered valid in CIDR or MTCNA context. While technically binary-valid, it's not recommended or standard for practical subnetting.
- * B. 255.255.192.255-Invalid, because the last octet is 255, which implies all bits are 1s, but in the third octet only partial bits are set (192 is 11000000). This breaks the required rule of contiguous 1s followed by contiguous 0s.
- * C. 192.0.0.0-Invalid, as it doesn't represent a valid subnet mask. 192 in the first octet (11000000) followed by zeros is not a valid mask - it's actually a network address, not a subnet mask.
- * D. 255.255.224.0-Valid subnet mask. This represents /19 in CIDR notation. In binary: 11111111.11111111.11100000.00000000, which follows the correct rule of contiguous 1s followed by contiguous 0s.

Extract from MTCNA Study Guide by Rene Meneses:

Subnet masks must be a continuous string of 1s followed by a continuous string of 0s. Any deviation or split between the blocks renders the mask invalid.

Extract from MTCNA Official Course Manual:

Valid subnet masks include values such as 255.0.0.0 (/8), 255.255.0.0 (/16), 255.255.255.0 (/24), and also non-classful masks like 255.255.224.0 (/19) are allowed and used for more flexible subnetting.

Conclusion: Option D is the only one meeting the criteria for a valid subnet mask as taught in the MTCNA curriculum.

NEW QUESTION # 70

How many DHCP servers can be configured per interface on RouterOS?

- A. One
- B. Unlimited
- C. Two
- D. Five

Answer: A

Explanation:

RouterOS allows only one DHCP server instance per interface. If you attempt to assign more than one DHCP server to the same interface, RouterOS will throw an error.

If you need to serve multiple subnets or ranges, this must be done on different interfaces or by configuring DHCP relay or advanced routing.

MTCNA DHCP Module - Server Configuration:

"One DHCP server per interface is allowed. Assigning multiple servers to a single interface is not supported." Rene Meneses Study Guide - DHCP Design:

"Plan carefully: one server per interface. Use DHCP relay if multiple scopes are needed." Terry Combs Notes - DHCP Server Behavior:

"Trying to configure two servers on the same port results in failure."

NEW QUESTION # 71

NAT rule is going to catch SMTP traffic and send it to a specific mail server. What is the correct action for a NAT rule?

- A. passthrough
- B. tarpit
- C. dst-nat
- D. redirect

Answer: C

Explanation:

To redirect SMTP (port 25) traffic from users to a specific internal or external SMTP server, you must use dst-nat. This modifies the destination address and port to point to the desired mail server.

* A.#passthrough - Allows the packet to be evaluated by other NAT rules; it doesn't alter traffic

* B.#dst-nat - Rewrites destination IP/port; this is what is needed to redirect SMTP to a specific server

* C.#redirect - Sends traffic to the router itself; not suitable for external redirection

* D.#tarpit - Used for slowing down malicious TCP connections, not redirection Extract from MTCNA Course Material - NAT Types:

"Use dst-nat to change the destination IP address. This is suitable for port forwarding or service redirection." Extract from Rene Meneses Study Guide - NAT Rules:

"To redirect traffic to a specific server, use action=dst-nat and specify the new destination address."

NEW QUESTION # 72

MikroTik RouterOS is sending logs to an external syslog server. Which protocol and port is used by RouterOS for sending logs (by default)?

- A. UDP 113
- B. UDP 21
- C. TCP 110
- D. UDP 514

Answer: D

NEW QUESTION # 73

.....

Just like the old saying goes, motivation is what gets you started, and habit is what keeps you going. A good habit, especially a good study habit, will have an inestimable effect in help you gain the success. The MTCNA exam prep from our company will offer the help for you to develop your good study habits. If you buy and use our study materials, you will cultivate a good habit in study. More importantly, the good habits will help you find the scientific prop learning methods and promote you study efficiency, and then it will be conducive to helping you pass the MTCNA Exam in a short time. So hurry to buy the MTCNA test guide from our company, you will benefit a lot from it.
