The society warmly welcomes struggling people. You will really benefit from your correct choice. Our FCP_FMG_AD-7.4 Study Materials are ready to help you pass the exam and get the certification. You can certainly get a better life with the certification. Please make a decision quickly. We are waiting for you to purchase our FCP_FMG_AD-7.4 exam questions.

Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q52-Q57):

NEW QUESTION # 52

An administrator created a new ADOM named Training for FortiGate devices only, and added the root FortiGate device of a Security Fabric group to the Training ADOM.

Given the administrator's actions, which statement correctly describes the expected result for the downstream devices in the Security Fabric?

- A. The downstream devices will appear in the root ADOM.
- B. The downstream devices must be added using the Add Device wizard.
- C. The downstream devices show as unauthorized in the Training ADOM
- D. The downstream devices are automatically authorized.

Answer: C

Explanation:

When a root FortiGate device is added to a specific ADOM (like Training), the downstream devices (those that are part of the Security Fabric) will not automatically be authorized in that ADOM. They will typically appear as unauthorized until explicitly authorized by an administrator.

NEW QUESTION # 53

When using the FortiManager JSON API, what is the purpose of the session ID received after successful authentication?

- A. It contains information about the HTTP request method used.
- B. It is used to identify the FortiManager metadata on the client.
- C. It serves as an authentication token for subsequent API requests.
- D. It includes a hash to check the integrity of the JSON response sent by FortiManager.

Answer: C

NEW QUESTION # 54

Refer to the exhibit.

FortiManager Script

Create New Script

Script Name

Config

Comments

Type

CLI Script

Run script on

Remote FortiGate Directly (via CLI)

Script details

Search...

Q

↑

↓

```

1 config vpn ipsec phase1-interface
2 edit "H2S_0"
3 set auto-discovery-sender enable
4 next
5 end
6 config system interface
7 edit "H2S_0"
8 set vdom "root"
9 set ip 172.16.1.1 255.255.255.255
10 set remote-ip 172.16.1.254
11 next
12 end
13 config router bgp
14 set as 65100
15 set router-id 172.16.1.1
16 config neighbor-group

```

Advanced Device Filters >

What will happen if the script is run using the Remote FortiGate Directly (via CLI) option? (Choose two.)

- A. FortiManager provides a preview of CLI commands before executing this script on a managed FortiGate.
- **B. FortiGate will auto-update the FortiManager device-level database.**
- C. You must install these changes using the Install Wizard.
- **D. FortiManager will create a new revision history.**

Answer: B,D

NEW QUESTION # 55

What is a characteristic of the FortiManager high availability (HA) feature?

- A. All secondary units must be in the same network as the primary unit.
- B. When a secondary unit is removed, FortiManager updates the managed devices using TCP port 5199.
- C. Each cluster member must be upgraded manually, starting with the primary unit.
- **D. The primary unit synchronizes all configuration revision with the secondary units.**

Answer: D

NEW QUESTION # 56

Refer to the exhibit.

Import Device - Local-FortiGate - Interface Mapping & Policy (2/5)

Create a new policy package for import.

Policy Package Name: Local-FortiGate

Folder: root

Policy Selection: Import All (3) **Select Policies to Import**

Firewall Policy (2) **Select**

Object Selection: **Import only policy dependent objects** **Import all objects**

An administrator is importing a new device into FortiManager and has selected the options shown in the exhibit.

What will happen if the administrator makes changes and then installs the modified policy package on this managed FortiGate?

- A. Policies not imported are marked as modified for future import attempts.
- B. Policies not imported prompt a confirmation before being deleted.
- **C. Policies not imported are deleted on the managed FortiGate during the installation.**
- D. Policies not imported remain untouched on the managed FortiGate.

Answer: C

Explanation:

When importing a device into FortiManager, if certain policies are not imported and then changes are made to the imported policies, the next time the policy package is installed on the managed FortiGate, any policies that were not imported will be removed from the FortiGate. FortiManager expects the managed FortiGate to match the imported policy package exactly, so any discrepancies (such as unimported policies) will be removed to ensure synchronization.

NEW QUESTION # 57

.....

Our FCP_FMG_AD-7.4 preparation materials can have such good reputation and benefit from their own quality. You really can't find a more cost-effective product than FCP_FMG_AD-7.4 learning quiz!
