

Fortinet FCSS_EFW_AD-7.4 Latest Exam Camp: FCSS - Enterprise Firewall 7.4 Administrator - itPass4sure Good-reputation Website

What's more, part of that itPass4sure FCSS_EFW_AD-7.4 dumps now are free: <https://drive.google.com/open?id=1tUuTQcNo9lfaT2BVhfrWdWayzFkNmXVQ>

We will give you full refund if you fail to pass the exam after purchasing FCSS_EFW_AD-7.4 learning materials from us. We are pass guarantee and money back guarantee, and money will be returned to your payment account. We have a professional team to collect and research the latest information for FCSS_EFW_AD-7.4 Exam Dumps, we can ensure you that the exam dumps you receive are the latest one we have. In order to let you know the latest information for the FCSS_EFW_AD-7.4 learning materials, we offer you free update for one year, and the update version will be sent to your email automatically.

Fortinet FCSS_EFW_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	• Routing: This section of the exam measures the skills of Security Administrators and covers the implementation of advanced routing protocols to manage enterprise traffic effectively. Candidates will gain expertise in configuring Open Shortest Path First (OSPF) for dynamic routing and Border Gateway Protocol (BGP) to facilitate communication between different networks, ensuring efficient traffic flow across enterprise environments.
Topic 2	• Central Management: This section of the exam measures the skills of Security Administrators and focuses on implementing central management for Fortinet security solutions. It includes configuring and managing devices centrally to streamline network security operations. Candidates will understand how to maintain consistency in security policies and automate deployments for efficient management of large-scale enterprise environments.

Topic 3	• VPN: This section of the exam measures the skills of Network Security Engineers and covers the implementation of secure communication tunnels for enterprise environments. Candidates will learn to configure IPsec VPN with IKE version 2 to establish encrypted connections. The section also includes the implementation of ADVPN to enable on-demand VPN tunnels between different sites, ensuring secure and dynamic connectivity.
Topic 4	• System Configuration: This section of the exam measures the skills of Network Security Engineers and covers the implementation of the Fortinet Security Fabric, ensuring seamless integration across security solutions. It also includes configuring hardware acceleration on FortiGate devices to optimize performance. Candidates will learn to set up different operation modes for high-availability clusters and implement enterprise networks using VLANs and VDOMs. Additionally, it covers various use case scenarios that demonstrate how Fortinet solutions contribute to secure network environments.
Topic 5	• Security Profiles: This section of the exam measures the skills of Network Security Engineers and focuses on managing security inspection profiles, including SSL and SSH inspections. Candidates will learn to apply a combination of web filtering, application control, and Internet Service Database (ISDB) to enhance network security. The section also covers integrating Intrusion Prevention Systems (IPS) to monitor and mitigate threats within enterprise networks.

Detail FCSS_EFW_AD-7.4 Explanation - FCSS_EFW_AD-7.4 Latest Exam Answers

In order to have better life, attending certification exams and obtaining certifications will be essential on the path to success. FCSS_EFW_AD-7.4 latest test cram sheet will help you achieve your goal. Only if you receive the certificate the companies require you can have the opportunities for raising-salary and promotion. Thousands of companies think highly of this certification. You will be popular if you pass exam with FCSS_EFW_AD-7.4 Latest Test Cram sheet.

Fortinet FCSS - Enterprise Firewall 7.4 Administrator Sample Questions (Q35-Q40):

NEW QUESTION # 35

Which two configuration settings change the behavior for content-inspected traffic while FortiGate is in conserve mode? (Choose two.)

- A. UTM failopen
- B. mem failopen
- C. IPS failopen
- D. AV failopen

Answer: C,D

NEW QUESTION # 36

The IT department discovered during the last network migration that all zero phase selectors in phase 2 IPsec configurations impacted network operations. What are two valid approaches to prevent this during future migrations? (Choose two.)

- A. Clearly indicate to the VPN which segments will be encrypted in the phase two selectors.
- B. Use routing protocols to specify allowed subnets over the tunnel.
- C. Configure an IPsec-aggregate to create redundancy between each firewall peer.
- D. Configure an IP address on the IPsec interface of each firewall to establish unique peer connections and avoid impacting network operations.

Answer: A,B

Explanation:

Zero phase selectors in IPsec Phase 2 mean that no specific traffic selectors (subnets) are defined, allowing any traffic to be encrypted through the VPN tunnel. This can cause unintended traffic forwarding issues and disrupt network operations.

To prevent this from happening during future migrations:

Using routing protocols ensures that only specific subnets are advertised over the tunnel.

Dynamic routing (such as OSPF or BGP) helps define which networks should use the tunnel, preventing unintended traffic from being encrypted.

Clearly defining phase 2 selectors avoids the problem of encrypting all traffic by explicitly stating the allowed source and destination subnets. This prevents the tunnel from affecting unrelated network traffic.

NEW QUESTION # 37

An administrator has configured two FortiGate devices for an HA cluster. While testing HA failover, the administrator notices that some of the switches in the network continue to send traffic to the former primary device.

What can the administrator do to fix this problem?

- A. Verify that the speed and duplex settings match between the FortiGate interfaces and the connected switch ports.
- B. Configure remote link monitoring to detect an issue in the forwarding path.
- C. Configure set send-garp-on-failover enable under config system ha on both cluster members.
- **D. Configure set link-failed-signal enable under config system ha on both cluster members.**

Answer: D

NEW QUESTION # 38

Why does the ISDB block layers 3 and 4 of the OSI model when applying content filtering?

(Choose two.)

- A. The ISDB limits access by URL and domain.
- **B. FortiGate has a predefined list of all IPs and ports for specific applications downloaded from FortiGuard.**
- **C. The ISDB blocks the IP addresses and ports of an application predefined by FortiGuard.**
- D. The ISDB works in proxy mode, allowing the analysis of packets in layers 3 and 4 of the OSI model.

Answer: B,C

Explanation:

The Internet Service Database (ISDB) in FortiGate is used to enforce content filtering at Layer 3 (Network Layer) and Layer 4 (Transport Layer) of the OSI model by identifying applications based on their predefined IP addresses and ports.

FortiGate has a predefined list of all IPs and ports for specific applications downloaded from FortiGuard:

FortiGate retrieves and updates a predefined list of IPs and ports for different internet services from FortiGuard.

This allows FortiGate to block specific services at Layer 3 and Layer 4 without requiring deep packet inspection.

The ISDB blocks the IP addresses and ports of an application predefined by FortiGuard:

ISDB works by matching traffic to known IP addresses and ports of categorized services. When an application or service is blocked, FortiGate prevents communication by denying traffic based on its destination IP and port number.

NEW QUESTION # 39

What are two functions of automation stitches? (Choose two.)

- A. Automation stitches can be configured on any FortiGate device in a Security Fabric environment.
- **B. An automation stitch configured to execute actions sequentially can take parameters from previous actions as input for the current action.**
- C. An automation stitch configured to execute actions in parallel can be set to insert a specific delay between actions.
- **D. Automation stitches can be created to run diagnostic commands and attach the results to an email message when CPU or memory usage exceeds specified thresholds.**

Answer: B,D

NEW QUESTION # 40

.....

The itPass4sure Fortinet FCSS_EFW_AD-7.4 exam dumps are ready for quick download. Just choose the right itPass4sure Fortinet FCSS_EFW_AD-7.4 exam questions format and download it after paying an affordable itPass4sure FCSS - Enterprise Firewall 7.4 Administrator (FCSS_EFW_AD-7.4) practice questions charge and start this journey. Best of luck in Fortinet FCSS_EFW_AD-7.4 exam and career!!!
