

# Fortinet NSE5\_FSM-6.3 Valid Test Syllabus - NSE5\_FSM-6.3 Testking Exam Questions

P.S. Free 2025 Fortinet NSE5\_FSM-6.3 dumps are available on Google Drive shared by Free4Dump:  
<https://drive.google.com/open?id=16stO5tUgizPXt-oTz8ZJdsEywGznbqp8>

Our NSE5\_FSM-6.3 study materials are very popular in the international market and enjoy wide praise by the people in and outside the circle. We have shaped our NSE5\_FSM-6.3 exam braindumps into a famous and top-ranking brand and we enjoy well-deserved reputation among the clients. Our NSE5\_FSM-6.3 Training Questions boost many outstanding and superior advantages which other same kinds of products don't have. You won't regret if you buy them!

Fortinet NSE5\_FSM-6.3 Certification Exam is a vendor-neutral exam that is recognized globally. NSE5\_FSM-6.3 exam is designed to test the candidate's knowledge and skills in using Fortinet's FortiSIEM 6.3 platform, which is a leading security information and event management solution. Successful candidates will gain recognition for their skills and knowledge in using Fortinet's security solutions, which can enhance their career prospects and increase their earning potential.

## Reliable NSE5\_FSM-6.3 Practice Exam Learning Materials: Fortinet NSE 5 - FortiSIEM 6.3 - Free4Dump

Free4Dump has many Fortinet NSE 5 - FortiSIEM 6.3 (NSE5\_FSM-6.3) practice questions that reflect the pattern of the real Fortinet NSE 5 - FortiSIEM 6.3 (NSE5\_FSM-6.3) exam. Free4Dump allows you to create a Fortinet NSE 5 - FortiSIEM 6.3 (NSE5\_FSM-6.3) exam dumps according to your preparation. It is easy to create the Fortinet NSE5\_FSM-6.3 Practice Questions by following just a few simple steps. Our Fortinet NSE 5 - FortiSIEM 6.3 (NSE5\_FSM-6.3) exam dumps are customizable based on the time and type of questions.

Fortinet NSE5\_FSM-6.3 exam is an essential certification for cybersecurity professionals who wish to specialize in managing and deploying Fortinet FortiSIEM solutions. Fortinet NSE 5 - FortiSIEM 6.3 certification validates the candidate's proficiency in configuring, managing, and monitoring FortiSIEM's various components. Certified professionals can provide their organizations with the necessary skills to effectively manage and respond to security threats.

Fortinet NSE5\_FSM-6.3 Exam is a 60-minute exam that consists of 35 multiple-choice questions. NSE5\_FSM-6.3 exam is designed to test your knowledge and skills in deploying and managing FortiSIEM 6.3. NSE5\_FSM-6.3 exam covers topics such as SIEM deployment, data collection, analysis, and reporting. NSE5\_FSM-6.3 exam is available in multiple languages, including English, Japanese, and Chinese.

## Fortinet NSE 5 - FortiSIEM 6.3 Sample Questions (Q50-Q55):

### NEW QUESTION # 50

Which protocol is almost always required for the FortiSIEM GUI discovery process?

- A. Syslog

- B. SNMP
- C. Telnet
- D. WMI

**Answer: B**

#### NEW QUESTION # 51

An administrator is using SNMP and WMI credentials to discover a Windows device. How will the WMI method handle this?

- A. WMI method will collect security, application, and system events logs.
- B. WMI method will collect only DNS logs.
- C. WMI method will collect only traffic and IIS logs.
- D. WMI method will collect only DHCP logs.

**Answer: C**

Explanation:

\* WMI Method: Windows Management Instrumentation (WMI) is a set of specifications from Microsoft for consolidating the management of devices and applications in a network.

\* Log Collection: WMI is used to collect various types of logs from Windows devices.

Security Logs: Contains records of security-related events such as login attempts and resource access.

Application Logs: Contains logs generated by applications running on the system.

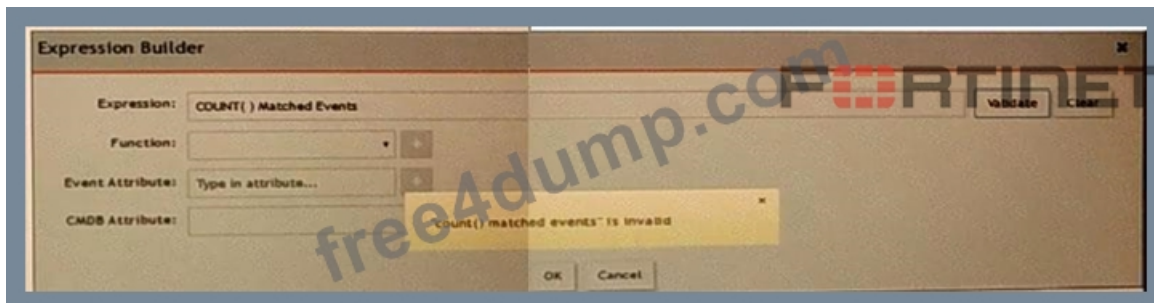

System Logs: Contains logs related to the operating system and its components.

\* Comprehensive Data Collection: By using WMI, FortiSIEM can gather a wide range of event logs that are crucial for monitoring and analyzing the security and performance of Windows devices.

\* Reference: FortiSIEM 6.3 User Guide, Data Collection Methods section, which details the use of WMI for collecting event logs from Windows devices.

#### NEW QUESTION # 52

Refer to the exhibit.

An administrator is trying to identify an issue using an expression based on the Expression Builder settings shown in the exhibit; however, the error message shown in the exhibit indicates that the expression is invalid.

Which is the correct expression?

- A. Matched Events COUNT()
- B. (COUNT) Matched Events
- C. COUNT(Matched Events)
- D. Matched Events(COUNT)

**Answer: C**

Explanation:

Expression Builder in FortiSIEM: The Expression Builder is used to create expressions for analyzing event data.

Correct Syntax: The correct syntax for counting matched events is COUNT(Matched Events).

\* Function: COUNT is a function that takes a parameter, in this case, "Matched Events," to count the number of occurrences.

Common Errors: Incorrect syntax, such as reversing the order or using parentheses improperly, can lead to invalid expressions.

References: FortiSIEM 6.3 User Guide, Expression Builder section, which explains the correct syntax and usage for creating valid expressions for event analysis.

### NEW QUESTION # 53

Which two FortiSIEM components work together to provide real-time event correlation?

- A. Supervisor and worker
- B. Supervisor and collector
- C. Collector and Windows agent
- D. Worker and collector

**Answer: A**

Explanation:

FortiSIEM Architecture: The FortiSIEM architecture includes several components such as Supervisors, Workers, Collectors, and Agents, each playing a distinct role in the SIEM ecosystem.

Real-Time Event Correlation: Real-time event correlation is a critical function that involves analyzing and correlating incoming events to detect patterns indicative of security incidents or operational issues.

Role of Supervisor and Worker:

\* Supervisor: The Supervisor oversees the entire FortiSIEM system, coordinating the processing and analysis of events.

\* Worker: Workers are responsible for processing and correlating the events received from Collectors and Agents.

Collaboration for Correlation: Together, the Supervisor and Worker components perform real-time event correlation by distributing the load and ensuring efficient processing of events to identify incidents in real-time.

References: FortiSIEM 6.3 User Guide, Event Correlation and Processing section, details how the Supervisor and Worker components collaborate for real-time event correlation.

### NEW QUESTION # 54

Device discovery information is stored in which database?

- A. Event DB
- B. SVN DB
- C. Profile DB
- D. CMDB

**Answer: D**

Explanation:

Device Discovery Information: Information about discovered devices, including their configurations and statuses, is stored in a specific database.

CMDB: The Configuration Management Database (CMDB) is used to store detailed information about the devices discovered by FortiSIEM.

\* Function: It maintains comprehensive details about device configurations, relationships, and other metadata essential for managing the IT infrastructure.

Significance: Storing discovery information in the CMDB ensures that the FortiSIEM system has a centralized repository of device information, facilitating efficient management and monitoring.

References: FortiSIEM 6.3 User Guide, Configuration Management Database (CMDB) section, which details the storage and usage of device discovery information.
