You may be in a condition of changing a job, but having your own career is unbelievably hard. Then how to improve yourself and switch the impossible mission into possible is your priority. If you want to pass NSE7_EFW-7.2 exam, here come our NSE7_EFW-7.2 exam prep giving you a helping hand. Our company has the highly authoritative and experienced team to help you pass the NSE7_EFW-7.2 Exam. You can not only get the most helpful and valid NSE7_EFW-7.2 exam questions, but also you can get according suggestions on how to pass the NSE7_EFW-7.2 exam.

Fortinet NSE7_EFW-7.2 Exam Syllabus Topics:

Topic	Details
Topic 1	System configuration: This topic discusses Fortinet Security Fabric and hardware acceleration. Furthermore, it delves into configuring various operation modes for an HA cluster.
Topic 2	VPN: Implementing IPsec VPN IKE version 2 is discussed in this topic. Additionally, it delves into implementing auto-discovery VPN (ADVPN) to enable on-demand VPN tunnels between sites.
Topic 3	Central management: The topic of Central management covers implementing central management.
Topic 4	Security profiles: Using FortiManager as a local FortiGuard server is discussed in this topic. Moreover, it delves into configuring web filtering, application control, and the intrusion prevention system (IPS) in an enterprise network.
Topic 5	Routing: It covers implementing OSPF to route enterprise traffic and Border Gateway Protocol (BGP) to route enterprise traffic.

New NSE7_EFW-7.2 Dumps Ppt, NSE7_EFW-7.2 Practice Test Fee

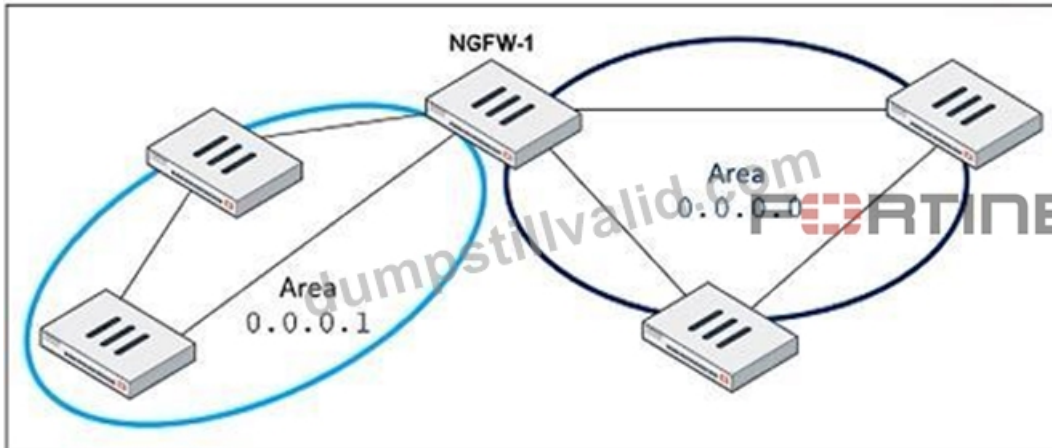

We will continue to pursue our passion for better performance and human-centric technology of latest NSE7_EFW-7.2 quiz prep. And we guarantee you to pass the exam for we have confidence to make it with our technological strength. A good deal of researches has been made to figure out how to help different kinds of candidates to get the NSE7_EFW-7.2 certification. We have made classification to those faced with various difficulties, aiming at which we adopt corresponding methods to deal with. According to the statistics shown in the feedback chart, the general pass rate for Latest NSE7_EFW-7.2 Test Prep is 98%, which is far beyond that of others in this field. In recent years, our NSE7_EFW-7.2 exam guide has been well received and have reached 99%

pass rate with all our dedication. As one of the most authoritative question bank in the world, our study materials make assurance for your passing the NSE7_EFW-7.2 exam.

Fortinet NSE 7 - Enterprise Firewall 7.2 Sample Questions (Q20-Q25):

NEW QUESTION # 20

Refer to the exhibit, which shows an OSPF network.

Which types of link-state advertisements (LSA) will NGFW-1 send, if it is a backup designated router (BDR)?

- A. NGFW-1 will send type 1 and type 4 LSA.
- B. NGFW-1 will send type 1 and type 2 LSAs.
- C. NGFW-1 will send type 1 and type 5 LSA.
- D. NGFW-1 will send type 1 and type 3 LSA.

Answer: D

NEW QUESTION # 21

Which two statements about IKE version 2 fragmentation are true? (Choose two.)

- A. IKEv2 fragmentation is performed at IP layer.
- B. The maximum number of IKE version 2 fragments are 64.
- C. The reassembly timeout default value is 30 seconds.
- D. Only some IKE version 2 packets are considered fragmentable.

Answer: B,D

NEW QUESTION # 22

Exhibit.

```
config vpn ipsec phase1-interface
edit "tunnel"
set interface "port1"
set ike-version 2
set keylife 28800
set peertype any
set net-device enable
set proposal aes128gcm-prfsha256 aes256gcm-prfsha384
set auto-discovery-receiver enable
set remote-id 100.64.1.1
set psksecret fortinet
next
```

Refer to the exhibit, which contains the partial ADVPN configuration of a spoke.

Which two parameters must you configure on the corresponding single hub? (Choose two.)

- A. Set auto-discovery-receiver enable
- B. Set ike-version 2

- C. Set auto-discovery-forwarder enable
- D. Set auto-discovery-sender enable

Answer: A,D

Explanation:

The hub must be configured to send (A) and receive (D) auto-discovery messages to establish ADVPN shortcuts with spokes.

Reference: = ADVPN | FortiManager 7.2.0 - Fortinet Documentation

NEW QUESTION # 23

Which statement about the designated router (DR) and backup designated router (BDR) in an OSPF multi-access network is true?

- A. Non-DR and non-BDR routers form full adjacencies to DR only.
- B. FortiGate first checks the OSPF ID to elect a DR.
- C. Only the DR receives link state information from non-DR routers.
- D. Non-DR and non-BDR routers send link state updates and acknowledgements to 224.0.0.6.

Answer: D

Explanation:

On the broadcast network, all routers that are NOT a DR or BDR are called DROTHER.

DROTHER will send their link state updates and LSack to the AllDRouter address, 224.0.0.6.

NEW QUESTION # 24

Which statement about network processor (NP) offloading is true?

- A. For TCP traffic FortiGate CPU offloads the first packets of SYN/ACK and ACK of the three-way handshake to NP
- B. You can disable the NP for each firewall policy using the command np-acceleration st to loose.
- C. The NP provides IPS signature matching
- D. The NP checks the session key or IPSec SA

Answer: A

Explanation:

Option A is correct because the FortiGate CPU offloads the first packets of TCP sessions to the NP for faster connection establishment and reduced CPU load¹. This feature is called TCP offloading and it is enabled by default on FortiGate models with NP6 or higher².

Option B is incorrect because the NP does not provide IPS signature matching. The NP only handles the packet forwarding and encryption/decryption functions, while the IPS signature matching is performed by the content processor (CP) or the CPU³.

Option C is incorrect because the command to disable the NP for each firewall policy is set np-acceleration disable, not set np-acceleration st to loose⁴. This command can be used to prevent certain traffic types from being offloaded to the NP, such as multicast, broadcast, or non-IP packets⁵.

Option D is incorrect because the NP does not check the session key or IPSec SA. The NP only offloads the IPSec encryption/decryption and tunneling functions, while the session key and IPSec SA are managed by the CPU. Reference: =

1: TCP offloading

2: Network processors (NP6, NP6XLite, NP6Lite, and NP4)

3: Content processors (CP9, CP9XLite, CP9Lite)

4: Disabling NP offloading for firewall policies

5: NP hardware acceleration alters packet flow

6: IPSec VPN concepts

NEW QUESTION # 25

.....

The Fortinet NSE7_EFW-7.2 exam material is getting updated on a daily basis according to the real Fortinet NSE7_EFW-7.2 exam questions so that the students don't face any issues while preparing themselves for the Fortinet NSE 7 - Enterprise Firewall 7.2 (NSE7_EFW-7.2) certification exam and pass it with ease. We guarantee our customers that they will pass NSE7_EFW-7.2 exam

on the first try with our given NSE7_EFW-7.2 exam material.
