Practice is one of the essential factors in passing the exam. To perform at their best on the real exam, candidates must use Fortinet FCP_FAZ_AD-7.4 practice test material. To this end, FCP_FAZ_AD-7.4 has developed three formats to help candidates prepare for their FCP_FAZ_AD-7.4 exam: desktop-based practice test software, web-based practice test, and a PDF format.

Fortinet FCP_FAZ_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	• Logs and Reports Management: This part of the exam measures the candidate's ability to handle log data and generate reports using FortiAnalyzer. Network and security analysts must show proficiency in managing, analyzing, and reviewing logs to ensure effective system monitoring and auditing processes are in place.
Topic 2	• Device Management: Here, Fortinet network and security analysts are evaluated on their ability to handle devices linked to FortiAnalyzer. This includes adding new devices, managing them efficiently, and troubleshooting communication issues.
Topic 3	• Administration: This section evaluates the ability of network and security analysts to configure administrative access and manage Administrative Domains (ADOMs). It covers tasks such as setting user permissions, managing backups, and disk quotas, and ensuring secure and efficient management of administrative privileges within FortiAnalyzer systems.

Topic 4	• System Configuration: This section assesses the capabilities of network and security analysts in managing FortiAnalyzer systems. It includes tasks like performing initial configurations, setting up high-availability systems, and configuring RAID for storage.

NEW QUESTION # 156

Which process is responsible for enforcing the log file size?

- A. miglogd
- B. logfiled
- C. oftpd
- D. sqlplugind

Answer: B

Explanation:

The logfiled process is responsible for enforcing log file size and managing log rotation on FortiAnalyzer. It ensures that log files do not exceed the configured size limits and handles the creation and rotation of new log files when necessary.

NEW QUESTION # 157

Which two parameters are used to calculate the Total Quota value available on FortiAnalyzer? (Choose two.)

- A. Retention policy
- B. Used storage
- C. Reserved space
- D. Total system storage

Answer: C,D

Explanation:

The Total Quota is derived from the total system storage minus any reserved space allocated for system use, such as databases, system files, or reserved space for log retention policies. Used storage and retention policies do not directly impact the calculation of the quota available, though they can influence overall space utilization.

NEW QUESTION # 158

You are trying to initiate an authorization request from FortiGate to FortiAnalyzer, but the Security Fabric window does not open when you click Authorize.

Which two reasons can cause this to happen? (Choose two.)

- A. The fabric authorization settings on FortiAnalyzer are misconfigured.
- B. The Security Fabric root is unauthorized and needs to be added as a trusted host.
- C. A pre-shared key needs to be established on both sides.
- D. The management computer does not have connectivity to the authorization IP address and port combination.

Answer: A,D

Explanation:

B . The management computer does not have connectivity to the authorization IP address and port combination. If the FortiGate cannot reach the FortiAnalyzer on the configured IP address and port (typically HTTPS), the authorization request will fail. This could be due to firewall rules, routing issues, or incorrect configuration.

D . The fabric authorization settings on FortiAnalyzer are misconfigured. FortiAnalyzer needs to be properly configured to accept authorization requests. This includes settings like enabling Security Fabric and configuring the correct authorization method.
