Study 156-836 Tool & 156-836 Valid Dumps Ebook

If you think that 156-836 certification exam is easy to crack, you are mistaken. It takes a lot of effort and hard work to get the results. The first step is to download real Check Point Certified Maestro Expert - R81 (CCME) (156-836) Exam Questions of Itcerttest. These Check Point Certified Maestro Expert - R81 (CCME) (156-836) exam questions are available in PDF, desktop practice test software, and web-based practice exam.

CheckPoint Check Point Certified Maestro Expert - R81 (CCME) Sample Questions (Q31-Q36):

NEW QUESTION # 31

How many orchestrators may Dual-Site include?

- A. 0
- B. 1
- C. 2 or 4
- D. Only 4

Answer: C

Explanation:

A Dual Site environment can include either two or four orchestrators, depending on the scenario. There are three primary scenarios for Dual Site configuration:

*Direct connectivity between remote site orchestrators: This scenario requires two orchestrators, one for each site, and a direct connection between them using the site-sync port.

*Two orchestrators on the same site are connected to the remote site orchestrators through two different switches: This scenario requires four orchestrators, two for each site, and a connection between them using the site-sync port and two external switches that support QinQ and MTU increment.

*Two orchestrators on the same site are connected to the remote site orchestrators through one switch: This scenario also requires four orchestrators, two for each site, and a connection between them using the site-sync port and one external switch that supports QinQ and MTU increment.

NEW QUESTION # 32

What is an uplink interface used for?

- A. To connect appliances to customer's infrastructure
- B. To connect in between Orchestrators
- C. To connect in between appliances
- **D. To connect Orchestrators to customer's infrastructure**

Answer: D

Explanation:

Explanation

Uplink interfaces are used to connect Maestro Hyperscale Orchestrators (MHOs) to the customer's network infrastructure, such as switches, routers, or firewalls. They are also used to send and receive management and control traffic from the customer's network to the MHOs.

NEW QUESTION # 33

What is a security group?

- A. A set of network interfaces and individual SGMs assigned to a logical group.
- B. A set of appliances of the same model that are collectively managed by the MHO.
- **C. A solution for Security Gateway redundancy and Load Sharing.**
- D. A set of objects in SmartConsole that are responsible for enforcing an access policy.

Answer: C

Explanation:

Security groups are used to simplify management and policy enforcement across multiple devices or network segments, often offering redundancy and load balancing features

NEW QUESTION # 34

What happens when you make changes from Clish on the SMO Master?

- **A. Changes are only applied on the SMO Master.**
- B. The changes are synchronized to the MHO as a backup.
- C. Changes are applied to all members in the SG.
- D. The changes are synchronized to the SMS/MDS as a backup.

Answer: A

Explanation:

NEW QUESTION # 35

When working with Maestro, what is the difference between using Clish and gClish?

- A. Clish commands are for testing purposes only and cannot be saved, gClish commands apply to all SG members, by default.
- B. Clish commands are run on the SG members. gClish commands are run on the MHO and applied to all connected SG members in a specified group.
- C. Clish commands apply to all UP SG members, by default. gClish commands apply to all SG members, by default.
- **D. Clish commands apply only to a specific SG member. gClish commands apply to all UP SG members, by default.**

Answer: D

Explanation:

Explanation

This is the correct answer because it describes the difference between using Clish and gClish when working with Maestro. Clish is the Check Point command line shell that allows users to configure and manage the SG members individually. gClish is the global Clish that allows users to run commands on all UP SG members of the current Security Group at once. UP SG members are the ones that are in the UP state and have the same policy installed as the SMO Master.
